Horace Walpole,1891 *Goethe* Ronald Gray,1967-06 A concise survey and criticism of Goethe s work for the general reader and the student *Ten Masterpieces of Music* Harvey Sachs,2021-10-26 Some pieces of music survive Most fall into oblivion What gives the ten masterpieces selected for this book their exceptional vitality In this penetrating volume Harvey

Sachs acclaimed biographer and historian of classical music takes readers into the hearts of ten extraordinary works of classical music in ten different genres showing both the curious novice and the seasoned listener how to recognize appreciate and engage with these masterpieces on a historical and compositional level Far from what is often thought classical music is neither dead nor dying As a genre it is constantly evolving its pieces passing through countless permutations and combinations yet always retaining that essential life force The works collected here composed in the years between 1784 and 1966 are a testament to this fact As Sachs skillfully demonstrates they have endured not because they were exceptionally well made or interesting but because they were created by composers Mozart and Beethoven Schubert Schumann Berlioz Verdi and Brahms Sibelius Prokofiev and Stravinsky who had a particular genius for drawing music out of their deepest wellsprings Through music Sachs writes they universalized the intimate In describing how music actually sounds *Ten Masterpieces of Music* seems to do the impossible animating the process of composing as well as the coming together of disparate scales and melodies trills and harmonies It tells us too how particular compositions came to be often revealing that the pieces we now consider classic were never intended to be so In poignant exquisite prose Sachs shows how Mozart a former child prodigy under constant pressure to produce new music hastily penned Piano Concerto No 17 in G major one of his finest piano concertos for a teenage student and likewise demonstrates how Goethe's *Faust Part One* became a springboard for the musical imagination of the French composer Berlioz As Sachs explains these pieces are not presented as candidates for a new Top Ten They represent neither the most well known nor the most often performed works of each composer Instead they were chosen precisely because he had something profound to say about them about their composers about how each piece fits into its composer's life and about how each of these lives can be contextualized by time and place In fact Sachs encourages readers to form their own favorites and teaches them how to discern special characteristics that will enhance their own listening experiences With *Ten Masterpieces of Music* it becomes evident that Sachs has lived with these pieces for a veritable lifetime His often soaring descriptions of the works and the dramatic lives of the men who composed them bring a heightened dimension to the musical perceptions of all listeners communicating both the sheer improbability of a work becoming a classic and why certain pieces these ten among them survive the perilous test of time

**Dark Thoughts** Steven Jay Schneider, Daniel Shaw, 2003-09-16 Is horror a fundamentally nihilistic genre Why are those of us who enjoy horror films so attracted to watching things on screen that in real life we would almost certainly find repellent Do monster movies have a deleterious moral effect on their viewers In seeking to answer such questions as well as a host of related ones Dark Thoughts reveals that our fascination with horror cinema and the pleasure we take in it is in the end simply a natural extension of a philosopher's inclination to wonder This is a collection of highly engaging and provocative essays by top scholars in the increasingly interrelated fields of Philosophy Film Studies and Communication Arts that deal with the epistemology aesthetics ethics metaphysics and genre dynamics of horror cinema past and present Contributors include Curtis Bowman No 1 Carroll Elizabeth Cowie Angela Curran Cynthia Freeland Michael Grant Matt Hills Deborah Knight George McKnight Ken Mogg Aaron Smuts Robert C Solomon and J P Telotte Over the past several years one of the hottest topics in the realm of philosophical aesthetics has been cinematic horror The emotional effects it has on audiences the mysterious metaphysics of its impossible beings the controversial ethics of its violent contents these are just a few of the concerns to have drawn the attention of scholars and students alike not to mention the genre's legions of fans Since the publication of No 1 Carroll's groundbreaking study The Philosophy of Horror or Paradoxes of the Heart 1990 and including most recently Cynthia Freeland's The Naked and the Undead Evil and the Appeal of Horror 2000 a plethora of articles have been authored by seemingly normal philosophers about the decidedly abnormal activities of the antagonists of fright flicks

Harper, 2024-11-01 This title was first published in 2003 The secular song of the 17th century represents a relatively neglected area of German culture In this book Anthony J Harper first studies the songs of the two great models of the time Martin Opitz and Paul
