Lakes John Richard Saylor, 2022-06-07 Lakes is my favorite kind of natural history meticulously researched timely comprehensive and written with imagination and verve Jerry Dennis author of The Living Great Lakes Lakes might be the most misunderstood bodies of water on earth And while they may seem commonplace without lakes our world would never be the same In this revealing look at these lifegiving treasures John Richard Saylor shows us just how deep our connection to still waters run Lakes is an illuminating tour through the most fascinating lakes around the world Whether it is Lake Vostok located more than two miles beneath the surface of Antarctica whose water was last exposed to the atmosphere perhaps a million years ago Lake Baikal in southern Siberia the world's deepest and oldest lake formed by a rift in the earth's crust or Lake Nyos the so called Killer Lake that exploded in 1986 resulting in hundreds of

deaths Saylor reveals to us the wonder that exists in lakes found throughout the world Along the way we learn all the many forms that lakes take how they come to be and how they feed and support ecosystems and what happens when lakes vanish

the large variety of methodological approaches and research directions applied The contributions cover monitoring of modern sediment fluxes using sediment traps geochronological and sedimentological analyses of annually laminated lacustrine sediments or varves and multiproxy investigations including geochemical and biological proxies as well as spatiotemporal analyses based on multicore studies supported by satellite images and X ray computed tomography CT The scientific issues discuss the influences of hydrological and climatological phenomena on short term changes in sediment flux the relationships between biogeochemical limnological processes in the water column and the formation of varves the preservation of environmental signals in varved sediments and possibilities of synchronizing varved records with other high resolution environmental archives such as tree rings Lake and Reservoir Management S.E. Jorgensen, Heinz Löffler, Walter Rast, Milan Straskraba, 2005-03-17 Presents readers with an overview of lake management problems and the tools that can be applied to solve problems Lake management tools are presented in detail including environmental technological methods ecotechnological methods and the application of models to assess the best management strategy

Cook's Traveller's Handbook: Switzerland with the Italian Lakes, 1925 *The Lake Charr *Salvelinus namaycush*: Biology, Ecology, Distribution, and Management* Andrew M. Muir, Charles C. Krueger, Michael J. Hansen, Stephen C. Riley, 2021-03-03 The lake charr *Salvelinus namaycush* is a ubiquitous member of cold water lake ecosystems in previously glaciated regions of northern continental U S Alaska and Canada that often support important commercial recreational and subsistence fisheries The lake charr differs from other charrs by its large size longevity iteroparity top predator specialization reduced sexual dimorphism prevalence of lacustrine spawning and use of deepwater habitat The species is remarkably variable in phenotype physiology and life history some of which is reflected in its ecology and genetics with as many as four morphs or ecotypes co occurring in a single lake The lake charr is often the top predator in these systems but is highly adaptable trophically and is frequently planktivorous in small lakes The lake charr by their name highlights their common habitat lakes both large and small but often frequents rivers and occasionally moves into the Arctic Ocean Movement and behaviour of lake charr are motivated by access to cool well oxygenated water foraging opportunities predator avoidance and reproduction Owing to their broad distribution and trophic level the lake charr serves as a sentinel of anthropogenic change This volume will provide an up to date summary of what is currently known about lake charr from distribution to genetics to physiology to ecology The book provides a compilation and synthesis of available information on the lake charr beginning with an updated distribution and a revised treatment of the paleoecology of the species Understanding of ecological and genetic diversity and movement and behaviour of the species has advanced remarkably since the last major synthesis on the species over 40 years ago Mid sections of the book provide detailed accounts of the biology and life history of the species and later sections are devoted to threats to conservation and fishery management practices used to ensure sustainability A new standard lake charr specific terminology is also presented The book will be a

valuable reference text for biologists around the world ecologists and fishery managers and of interest to the angling public
