Lacustrine Basin Exploration Case Studies And Modern Analogs:

Lacustrine Basin Exploration Barry Jay Katz,1990 Basin Analysis, Global Sedimentary Geology and Sedimentology Baojun Liu,Li Sitian,1997-05 The 30th International Geological Congress was held in Beijing China in August 1997 Leading scientists convened to present their findings and views to the international geological research community Volume 8 of 26 focuses on basin analysis global sedimentary geology and sedimentology All articles in the proceedings have been refereed and keynote papers have been included in Volume 1 These proceedings aim to present a view of contemporary geology and should be of interest to researchers in the geological sciences Global Geological Record of Lake Basins: Volume 1 E. Gierlowski-Kordesch,K. Kelts,2006-11-23 The sequence of sediments deposited in lakes forms an archive of a high resolution record of the changes and rates of changes in continental palaeoenvironments Global Geological Record of Lake Basins is the first in a short series of books containing concise geological summaries of lake basin deposits Geoscientists worldwide have co operated to bring together the information available on a global spectrum of lacustrine deposits looking in particular at palaeoenvironmental aspects The compilation has resulted from IGCP 219 Comparative Lacustrine Sedimentology in Space and Time which has given impetus to the field of limnogeology Lacustrine deposits are widespread throughout the geological record and this series of books will assess for every geological time window key lacustrine sequences worldwide in the form of short summaries of specific deposits A common language will be defined to describe these deposits **Paleolimnology** Andrew S. Cohen,2003-05-29 This text written by a leading researcher in the field describes the origin and formation of lakes in order to give context to the question of how lacustrine deposits form It explains the process of sedimentation in lakes and the chemistry of those deposits and describes how the age of lake deposits are determined Additionally this book shows how different groups of fossils are used in interpreting the paleontological record of lakes In order to illustrate the more synthetic approaches to interpreting the history of lakes the author also discusses such special topics as lake level history lake evolution and the impact of environmental change on lakes *The Geology of Stratigraphic Sequences* Andrew D. Miall,1997 This book provides a unique survey of the worldwide database of sequence stratigraphy reviews the methods for describing sequences and assessing causes of sequence generation and provides an in depth analysis of the mechanisms of sequence development The book reviews the present status of global cycle correlation and the hypothesis of global eustacy and examines the applications of sequence stratigraphy to studies in practical petroleum geology Students lecturers researchers and practitioners are provided with a critical but balanced appraisal of modern concepts in this rapidly developing and controversial area Ideas and concepts originating from a wide range of individuals and schools of thought are discussed and evaluated A very extensive bibliography is included Age of the Lospe Formation (Early Miocene) and Origin of the Santa Maria Basin, California Richard G. Stanley,Jean-Luc Schneider,Richard Virgil Fisher,1996 **Conjugate Divergent Margins** Webster Mohriak,Al Danforth,Paul J. Post,G. C. Tari,Michal Nemčok,Sudipta T. Sinha,2013 The main

focus of the book is the geological and geophysical interpretation of sedimentary basins along the South Central and North Atlantic conjugate margins but concepts derived from physical models outcrop analogues and present day margins are also discussed in some chapters There is an encompassing description of several conjugate margins worldwide based on recent geophysical and geological datasets An overview of important aspects related to the geodynamic development and petroleum geology of Atlantic type sedimentary basins is also included Several chapters analyse genetic mechanisms and break up processes associated with rift phase structures and salt tectonics providing a full description of conjugate margin basins based on deep seismic profiles and potential field methods

Fluvial Depositional Systems Andrew Miall, 2013-08-23

This book is intended to complement the author's 1996 book The geology of fluvial deposits not to replace it The book summarizes methods of mapping and interpretation of fluvial depositional systems with a detailed treatment of the tectonic climatic and eustatic controls on fluvial depositional processes It focuses on the preserved ancient depositional record and emphasizes large scale basin scale depositional processes Tectonic and climatic controls of fluvial sedimentation and the effects of base level change on sequence architecture are discussed Profusely illustrated and with an extensive reference to the recent literature this book will be welcomed by the student and professional geologist alike

Carbonate Reservoirs Clyde H. Moore, William J.

Wade, 2013-08-12 The biological influence over the origin distribution composition texture and mineralogy of carbonate sediments is stressed Environmental factors such as light temperature and water depth directly affect these biological processes Abiotic carbonate precipitation is discussed Three carbonate factories are identified shallow water tropical deep water mud mound cool water factory developed in high and low latitudes Basic attributes of each factory are developed The rimmed shelf and ramp facies models of the tropical factory are detailed with the Belize shelf and Middle East Abu Dhabi as examples The facies tract of the mud mound factory is detailed and the Devonian Canning Basin used as an example The role

of sea level changes and carbonate sedimentation in platform development is discussed High sea level carbonate sediment shedding combined with lowstand sediment starvation is opposite to what is seen in regions of siliciclastic sedimentation The dominance and importance of the Dunham rock classification is stressed Finally lacustrine carbonates are discussed using the African rift lakes as modern examples and developing a simple model of continental rift lake carbonate sedimentation emphasizing potential source rock and reservoir facies The Brazil Cretaceous subsalt play of the south Atlantic rift and the potential of its African counterpart are discussed Regional Geology and Tectonics: Phanerozoic Passive Margins, Cratonic Basins and Global Tectonic Maps A.W. Lake Systems from the Ice Age to Industrial Time Daniel Ariztegui, Walter Wildi, 2013-03-07 During the 20th century lake research has become an internationally recognised field of scientific activity improving our understanding on physical chemical and biological processes on fresh water ecology and water resources among others The interdisciplinary approaches mainly developed in historical research as performed by archaeologists and earth scientists to reconstruct the

environmental and climate history of the continents of human settlements and culture and to evaluate human impact on the local and global environments The Geological Society of Switzerland publishes in this volume a selected number of contributions presented during a scientific conference on Lake Systems from Ice Age to Industrial Time at Yverdon from 17 to 20 October 2001 **Paying Attention to Mudrocks: Priceless!** Daniel Larsen, Sven O. Egenhoff, Neil S.
