LaGG Fighters in Action Hans-Heiri Stapfer, 1996-01-01 Gennemgang af det sovjetiske jagerfly LaGG 3 fra 2 verdenskrig

Soviet Fighters of the Second World War Jason Nicholas Moore, 2021-07-30 The Red Air Force had just started to re equip with modern monoplane fighters when the Germans opened Operation Barbarossa the invasion of the Soviet Union Hundreds of fighters were destroyed in the first few days but many of these were obsolete biplanes Soviet Fighters of the Second World War details fighter development from the dark days of Barbarossa to eventual triumph over Berlin Starting with outdated aircraft such as the Polikarpov Po 2 biplane and monoplane fighters the Soviets then settled on two main lines of development the inline engine LaGG 3 and its radial engine derivatives the La 5 and La 7 and the inline engine Yakovlev fighters which were produced in greater numbers than any other series of fighters Not only are these aircraft accurately described but experimental fighters are also dealt with In addition colour profiles illustrate these aircraft in terms of design camouflage and markings From the I 15bis biplane of the late 1930s to the superb La 7 and Yak 3 fighters of the last year of the war all Red Air Force fighters are covered in this comprehensive volume **International Warbirds** John C.

Fredriksen, 2001-08-01 In depth descriptions and photographs of the aircraft of 21 nations presented with a unique human dimension that goes behind the machines to the people involved Invaluable for specialists accessible to enthusiasts

back by the Soviets amid mud and freezing temperatures Excellent well researched fast paced and enjoyable to read Military Review At the end of September 1941 more than a million German soldiers lined up along the frontline just 180 miles west of Moscow They were well trained confident and had good reasons to hope that the war in the East would be over with one last offensive Facing them was an equally large Soviet force but whose soldiers were neither as well trained nor as confident When the Germans struck disaster soon befell the Soviet defenders German panzer spearheads cut through enemy defenses and thrust deeply to encircle most of the Soviet soldiers on the approaches to Moscow Within a few weeks most of the Russian soldiers marched into captivity where a grim fate awaited them Despite the overwhelming initial German success

however the Soviet capital did not fall German combat units as well as supply transport were bogged down in mud caused by autumn rains General Zhukov was called back to Moscow and given the desperate task to recreate defense lines west of Moscow The mud allowed him time to accomplish this and when the Germans again began to attack in November they met stiffer resistance Even so they came perilously close to the capital and if the vicissitudes of weather had cooperated would have seized it Though German units were also fighting desperately by now the Soviet build up soon exceeded their own The Drive on Moscow 1941 is based on numerous archival records personal diaries letters and other sources It recreates the battle from the perspective of the soldiers as well as the generals The battle had a crucial role in the overall German strategy in the East and its outcome reveals why the failure of the German assault on Moscow may well have been true turning point of World War II

Brewster F2A Buffalo Aces of World War 2 Kari Stenman, Andrew Thomas, 2013-06-20 A complete survey of all of the pilots who achieved Aces status using the Brewster F2A Buffalo Although designed and built for the US Navy the F2A fought in only one major US engagement the battle of Midway in which F2A pilots managed to shoot down a number of Japanese fighters Soon replaced by the navy the F2A was exported to Britain where it was nicknamed the Buffalo thanks to its stubby appearance The British sent most of these fighters to the Far East where they were used in the defence of Singapore and Malaya It was in the Winter War however that the F2A truly found a home Calling the plane simply the Brewster the Finnish flew it against the invading Russians As this volume shows overall 37 Finns achieved ace status flying the Brewster and it was the Finnish fighter of choice until succeeded by the Bf 109 in 1943

In Furious Skies Tim Heath, 2022-09-21 When a proud Adolf Hitler revealed his new Luftwaffe to the world in March 1935 it was the largest most modern military air arm the world had seen Equipped with the latest monoplane fighter and bomber aircraft manned by well trained and motivated crews it soon became evident that the Luftwaffe also possessed a high degree of technical superiority over Germany's future enemies Yet within just nine years the once mightiest air force in the world had reached total collapse destroyed in part by the very people responsible for creating it By 1944 the Luftwaffe wearied by aerial battles on multiple fronts combined with tactical mismanagement from the highest levels of command were unable to match their enemies in both production and manpower By this time the Luftwaffe was fighting for its survival and for the survival of Germany itself above the burning cities of the Third Reich facing odds sometimes as high as ten to one in the air Told through the eyes of the fighter and bomber crews themselves this book explores previously unpublished first hand accounts of the rise and fall of one of the most formidable air forces in twentieth century military history It paints a haunting picture of the excitement fear romance intertwined with the brutality futility and wastefulness that is war

Lavochkin Fighters of the Second World War Jason Moore , 2017-03-13 The Lavochkin fighters remain little known in the West although with the Yakovlev fighter series they were the backbone of the Red Air Force fighter force during the Second World War The author rectifies that with this comprehensive history of these fighters With this book he describes in great detail the three main variants of the Lavochkin

fighter series during the Second World War the only partially successful LaGG 3 inline engined fighter the successful radial engined La 5 fighter and the superb radial engined La 7 fighter one of the best piston engined fighter aircraft of the entire Second World War Both the design and history of these fighters are featured including how the mediocre inline engined LaGG 3 was turned into a top notch fighter by the replacement of the Klimov inline engine by the Shvetsov M 82 radial engine Besides describing the wartime designs he includes a section on the postwar successors to the Second World War fighters the completely new all metal La 9 and La 11 which saw extensive postwar service Accurate color profiles illustrate all variants

Soviet Aircraft Industry Peter G Dancey,2017-04-22 Soviet aircraft industry was an essential part of the USSR s campaign for global dominance in the twentieth century Thanks to the thick fog of secrecy that enveloped it throughout the Cold War it has long inspired the fascination of analysts and enthusiasts in the West until the collapse of the USSR in 1991 details of Soviet aircraft were often a matter of conjecture This book aims to uncover fully the mystery surrounding this topic Drawing on original and previously unpublished information obtained directly from the former USSR Soviet Aircraft Industry examines the unique characteristics of Soviet designed aircraft particularly military types which were the cause of great concern to the West Further by virtue of the industry s central role throughout Soviet history this book provides a rare and important perspective into the broader theme of Russia s great communist experiment Russian Aviation and Air Power in the Twentieth Century John Greenwood,Von Hardesty,Robin Higham,2014-06-11 In the light of new archival material the editors take a fresh look at Russian aviation in the twentieth century Presenting a comprehensive view of Russian aviation from its genesis in the late czarist period to the present era the approach is essentially chronological with a major emphasis on the evolution of military aviation The contributions are diverse with appropriate attention to civilian and institutional themes

Finnish Aces of World War 2 Kari Stenman,Kalevi Keskinen,2012-10-20 Always outnumbered by their Soviet counterparts the small band of Finnish fighter pilots who defended their Scandinavian homeland from the communist hordes in three separate wars between 1939 and 1945 amassed scores only bettered by the Luftwaffe s Jagdflieger Initially equipped with a motley collection of biplane and monoplane fighters garnered from sources across the globe the Finnish Air Force was thrust into combat in November 1939 Given little chance against the massive Soviet force the Finnish fighter pilots confounded the sceptics and decimated the attacking fighter and bomber formations prompting the Russians to call a halt in March 1940 This scenario was repeated in 1941 and by 1943 the Finns had become uneasy allies with the Germans Complete with first hand accounts and detailed colour illustrations this book profiles aces like Juutilainen and Wind who proved unbeatable in the final months of conflict *Fokker D.XXI Aces of World War 2* Kari Stenman,Peter de Jong,2013-04-20 The Dutch D XXIs saw less than a week of action following the German invasion of the west on 10 May 1940 with many of the country s 28 fighters being destroyed on the ground However those that survived the initial onslaught inflicted losses on the Luftwaffe By then however the D XXI had found everlasting fame in Finland during the Winter War of

1939 40 Proving itself a real thorn in the side of the Soviets the fighter operating in primitive conditions and against vastly superior numbers Finnish D XXIs racked up an incredible score against the Red Air Force The D XXI also has the distinction of producing the first ace in a single mission in World War 2 when then 1Lt Jorma Sarvanto shot down six Ilyushin DB 3 bombers on 6 January 1940 After spending a year providing home defence and flying coastal patrols during the early stages of the Continuation War in 1941 all surviving Finnish Fokker D XXIs were relegated to the reconnaissance role which they performed through to the end of hostilities in September 1944 [Assault from the Sea](#) Blythe Bartlett,2015-02-15 This collection of 51 essays provides a history of amphibious landings that include European Asian and American operations It describes in detail some of history s most significant amphibious assaults as well as planned attacks that were never carried out [La-5/7 vs Fw 190](#) Dmitriy Khazanov,Aleksander Medved,2011-09-20 A look at the head to head match up between two important Eastern Front fighters Soviet fighter aviation suffered terribly at the hands of the Jagdwaffe in the first year of the war in the east and with the arrival of JG 51 and its Fw 190s on the Stalingrad Front in September 1942 things only got worse However help was on its way in the form of the La 5 Tougher faster and with a greater rate of climb than its predecessors most were flow by a new generation of better trained pilots led by combat veterans These new fighters soon found themselves pitted into action on the Central Sector against the equally new Fw 190As of JG 51 From then on these two fighters would battle it out in the skies over the Eastern Front This book tells the complete story of the battles between these two important fighters **Air Combat** ,2019-01-24 This book brings together the best and most iconic fighters of World War II pitted against one another in desperate aerial combat The battle for the skies in World War II fuelled a race between rival air forces to develop ever faster and more capable fighter aircraft and the struggle for air superiority was never over until the war itself ended This volume explores four clashes of some of the finest planes and pilots in key theatres of the war Spitfires duelling the formidable Bf 109 over the Channel the Fw 190 battling the Soviet La 5 and 7 on the Eastern Front the F4F Wildcat in a desperate clash with the legendary A6M Zero sen and the F4U Corsair in combat with the second generation Japanese Ki 84 in the closing days of the war Fully illustrated with contemporary photographs maps and colour artwork Air Combat conveys the full story behind these dramatic aviation duels *Air Battle for Moscow 1941-1942* Dmitry Degtev,Dmitry Zubov,2021-10-31 This is the story of the aerial element of the Battle for Moscow between 1941 and 1942 known to the Germans as Operation Typhoon In October 1941 Operation Typhoon and the battle for Moscow began According to Hitler s plan it was to be the last offensive after which nothing could stop Germany from conquering Britain and the rest of Europe but first he had to overcome the Soviets and especially their air force Air Battle for Moscow is the first detailed description of one of the most vital yet little known air battles of the Second World War The battle for Moscow opened with the flights of long range reconnaissance aircraft which photographed Moscow and the Kremlin Then on 22 July 1941 Operation Clara Zetkin the Luftwaffe s aerial assault on Moscow began But the Luftwaffe was opposed by the Stalin s

Falcons the elite 6th Air Defence Corps which defended the Soviet capital with a determination which saw bitter duels to the death and horrendous casualties on both sides The book presents new facts about this dramatic battle and describes in detail the actions of the aircrew on both sides Yet this is not just the story of the air war The authors also describe the lives of people during the war of suppressed anti Soviet opposition in Moscow and of the bloodthirsty and inhuman actions of the Stalin regime The book also tells of the fate of German pilots caught in Russian captivity and the adventures of those who were able to survive and escape from the Russian executioners Many myths concerning the battle are also challenged such as the often stated belief that Moscow's anti aircraft defenses were the most powerful in the world and that it was the Soviets who were the finest pilots In this comprehensive account details of losses biographical outlines of the key individuals analyses of the different aircraft and a full chronology of the battle are presented as well as numerous exclusive photos documents and drawings But it is the stories of those who fought in the Battle for Moscow that undeniably have the greatest impact The harrowing tales of death and survival in conditions that are almost beyond description demonstrate just how important this conflict was to both Russia and the Third Reich and ultimately to the outcome of the Second World War

Day Fighter Aces of the Luftwaffe 1943-45 Neil Page, 2020-08-31 The second volume of this excellent overview of Germany's World War II fighter pilots filled with photos maps and aircraft profiles Air Power History This volume of Day Fighter Aces of the Luftwaffe traces the story of the Luftwaffe's day fighter arm from 1942 through to the end of the war in Europe covering missions over Russia in 1943 over the West and the Reich the Eastern Front and the Mediterranean Organized campaign by campaign this chronological account interweaves brief biographical details newly translated personal accounts and key moments in the careers of a host of notable and lesser known Luftwaffe aces Fully illustrated with 200 contemporary photographs maps and profiles of the aircraft flown by these aces this is a visual delight for anyone with an interest in the day fighter aces of the Luftwaffe [Bf 109E/F vs Yak-1/7](#) Dmitriy Khazanov, Aleksander Medved, 2015-06-20 Step into the cockpits of the Luftwaffe's Bf 109 and the Red Air Force's Yaks 1/7 two fighters which were involved in some of the largest fiercest aerial battles in history The iconic Messerschmitt fighter and its combat hardened pilots inflicted a fearful beating on the Yaks in the beginning of the war Some of the highest scoring aces in history benefitted from the Bf 109's technical superiority over the overweight and underpowered Yak 1 racking up incredible successes against their poorly trained and equipped adversaries And yet as the Soviets accumulated combat experience their tactics improved as did their mounts in the upgraded Yak 1B and gradually the Red Force eroded the Jagdwaffe's dominance of the skies in the eastern front though with the 109G they would never lose qualitative superiority Featuring first hand accounts from veteran pilots rare archival photographs and expert analysis this volume brings to life the vicious dogfights that took place between the Bf 109 and the Yak as they vied for mastery of the frozen skies of the Eastern Front [P-36 Hawk Aces of World War 2](#) Lionel Persyn, Kari Stenman, Andrew Thomas, 2012-12-20 A fascinating account of a plane that served on both sides during World

War 2 and in a variety of environments from Pearl Harbor to the deserts of North Africa to the barren forests of Karelia and the jungles of Burma The Curtiss P 36 was considered a revolution in performance design in comparison to other US fighters Yet by the time of the Japanese attack on Pearl Harbor the P 40 was increasingly supplanting the P 36 which the US then exported to France under the guise of the Hawk 75 Flown by the French captured by the Germans sold to the Finns transferred to India and Africa and even incorporated into the RAF the Hawk 75 saw service in every theatre of operations and in a variety of combat environments This book depicts the interesting life of this plane with colour artwork photographs and first hand accounts *Day Fighter Aces of the Luftwaffe* Jeremy Dixon,2023-12-30 The second of two comprehensive directories of all the Luftwaffe s single seater fighter pilots who were awarded the Knight s Cross during the Second World War The German fighter pilots of the Second World War are among the undoubted heroes of the conflict their reputation for flying skill single minded determination and solitary courage hasn t diminished or been clouded by controversy over the years Their daring and commitment often displayed when towards the end of the war they were fighting against the odds matches that of any of the other air forces they fought against This detailed highly illustrated reference book which covers the exploits of the most famous and successful individuals among them shows just how effective and undaunted they were All the Luftwaffe day fighter pilots who flew single seater aircraft and won the Knight s Cross during the war are featured The entries give information about their early lives and pre war careers and record how many aircraft they shot down the type of aircraft involved and where and when the combat took place Included are accounts of particular actions which led to the award of the Knight s Cross and the fate of these remarkable pilots later in the war and in the post war world is described too Jeremy Dixon s book will be fascinating reading and reference for anyone who is interested in the aviation history of the Second World War **German Fighters Over Russia** Bryan Philpott,1980
