## **How Do We Know Animals Can Think:**

**How Do We Know Animals Can Think?** Steve Parker, 1994 Presents information on many different animals while investigating whether animals understand or simply react to the environment      **The Animal Mind** Kristin Andrews, 2020-05-17 The philosophy of animal minds addresses profound questions about the nature of mind and the relationships between humans and other animals In this fully revised and updated introductory text Kristin Andrews introduces and assesses the essential topics problems and debates as they cut across animal cognition and philosophy of mind citing historical and cutting edge empirical data and case studies throughout The second edition includes a new chapter on animal culture There are also new sections on the evolution of consciousness and tool use in animals as well as substantially revised sections on mental representation belief communication theory of mind animal ethics and moral psychology Further features such as chapter summaries annotated further reading and a glossary make The Animal Mind an indispensable introduction to those teaching philosophy of mind philosophy of animal minds or animal cognition It will also be an excellent resource for those in fields such as ethology biology and psychology      **Persons, Animals, Ourselves** Paul F. Snowdon, 2014-10-09 The starting point for this book is a particular answer to a question that grips many of us what kind of thing are we The particular answer is that we are animals of a certain sort a view nowadays called animalism This answer will appear obvious to many but on the whole philosophers have rejected it Paul F Snowdon proposes contrary to that attitude that there are strong reasons to believe animalism and that when properly analysed the objections against it that philosophers have given are not convincing One way to put the idea is that we should not think of ourselves as things that need psychological states or capacities to exist any more than other animals do The initial chapters analyse the content and general philosophical implications of animalism including the so called problem of personal identity and that of the unity of consciousness and they provide a framework which categorises the standard philosophical objections Snowdon then argues that animalism is consistent with a perfectly plausible account of the central notion of a person and he criticises the accounts offered by John Locke and by David Wiggins of that notion In the two next chapters Snowdon argues that there are very strong reasons to think animalism is true and proposes some central claims about animal which are relevant to the argument In the rest of the book the task is to formulate and to persuade the reader of the lack of cogency of the standard philosophical objections including the conviction that it is possible for the animal that I would be if animalism were true to continue in existence after I have ceased to exist and the argument that it is possible for us to remain in existence even when the animal has ceased to exist In considering these types of objections the views of various philosophers including Nagel Shoemaker Johnston Wilkes and Olson are also explored Snowdon concludes that animalism represents a highly commonsensical and defensible way of thinking about ourselves and that its rejection by philosophers rests on the tendency when doing philosophy to mistake fantasy for reality      Animals Like Us Mark Rowlands, 2002 Foot and mouth and mad cow disease are

but two of the results of treating animals as commodities subject only to commercial constraints and ignoring all natural and moral considerations Chickens hanging by their necks on conveyor belts caged pigs with sores bloated dead sheep with their legs in the air mutilated dogs waiting to die after undergoing horrendous experiments in the name of science or just product testing these are some of the images that illustrate the indifference of a consumerist society to the suffering of animals Few are willing to recognize that the packaged sanitized supermarket meat that materializes on their dinner tables every day is the result of an industrial process involving unimaginable pain and suffering We would be horrified if our pets were harmed yet every day we eat animals that have been tortured and executed Mark Rowlands claims that it is simply unjust to harm animals As conscious sentient beings biologically continuous with humans they have interests that cannot simply be disregarded Using simple principles of justice he argues that animals have moral rights and examines the consequences of this claim in the contexts of vegetarianism animal experimentation zoos and hunting and animal rights activism
