already populated by these great carnivores Before we mastered iron and later developed firearms we had few defences against bears only watchful caution and elaborate ceremonies and sacrifices to ward off fear Where human populations grow bears have traditionally dwindled or disappeared But when we return to the wild to places where bears still survive all our primeval fears awaken again The risk of an automobile accident on the way to bear country far outstrips the risk of a close range encounter with a bear but it is the bear that worries us as we hurtle down the pavement at a hundred kilometres an hour In this timely and sensitive book Kevin Van Tighem calls on decades of experience knowledge and understanding in order to enlighten readers about our relationship with and attitude toward bears Along the way we are confronted with the realities confronting these great animals as a result of our ever expanding human population and their ever shrinking natural habitat Through historical research field observation practical advice personal anecdotes and an array of stunning photos Van Tighem has written a comprehensive book that is meant to demystify bears in order to promote a deeper understanding of these powerful yet vulnerable creatures
