Korea The Search For Sovereignty:

Korea Geoffrey Leslie Simons,1995 Offers a history of Korea from its earliest times to the present focusing on the major events of the twentieth century that helped to shape the current political climate **Korea** Geoff Simons,1995-07-13 A broad history of Korea with a particular focus on key twentieth century events Particular attention is given to the dispute over North Korea s controversial nuclear development programme This issue is profiled in the context of the post Soviet world and against such crucial modern events as the Japanese colonization of the Korean peninsula the US partition the resulting Korean War and the subsequent development of North and South The detailed information both supports a succinct history and encourages an interpretation that transcends Western propaganda Sovereignty Experiments Alyssa M. Park,2019-03-15 Sovereignty Experiments tells the story of how authorities in Korea Russia China and Japan through diplomatic negotiations border regulations legal categorization of subjects and aliens and cultural policies competed to control Korean migrants as they suddenly moved abroad by the thousands in the late nineteenth century Alyssa M Park argues that Korean migrants were essential to the process of establishing sovereignty across four states because they tested the limits of state power over territory and people in a borderland where authority had been long asserted but not necessarily enforced Traveling from place to place Koreans compelled statesmen to take notice of their movement and to experiment with various policies to govern it Ultimately states efforts culminated in drastic measures including the complete removal of Koreans on the Soviet side As Park demonstrates what resulted was the stark border regime that still stands between North Korea Russia and China today Skillfully employing a rich base of archival sources from across the region Sovereignty Experiments sets forth a new approach to the transnational history of Northeast Asia By focusing on mobility and governance Park illuminates why this critical intersection of Asia was contested divided and later reimaged as parts of distinct nations and empires The result is a fresh interpretation of migration identity and state making at the crossroads of East Asia and Russia *The Review of Korean Studies* ,2001 **Sovereignty and Status in East Asian International Relations** Seo-Hyun Park,2017-05-11 This book provides a theoretical and empirical analysis of a key concept in East Asian security debates sovereign autonomy and how it reproduces hierarchy in the regional order Park argues that contemporary strategic debates in East Asia are based on shared contextual knowledge that of international hierarchy reconstructed in the late nineteenth century The mechanism that reproduces this lens of hierarchy is domestic legitimacy politics in which embattled political leaders contest the meaning of sovereign autonomy Park argues that the idea of status seeking has remained embedded in the concept of sovereign autonomy and endures through distinct and alternative security frames that continue to inform contemporary strategic debates in East Asia This book makes a significant contribution to debates in international relations theory and security studies about autonomy and status as well as to the now extensive literature on the nature of East Asian regional order Asia's Latent Nuclear Powers Mark Fitzpatrick,2017-10-03 If the nuclear weapons

club were to further expand would Americas democratic allies in Northeast Asia be among the next entrants Japan South Korea and Taiwan all have robust civilian nuclear energy programmes that make them virtual nuclear powers according to many analysts All three once pursued nuclear weapons and all face growing security threats from nuclear armed adversaries But will they or rather under what circumstances might they This book analyses these past nuclear pursuits and current proliferation drivers In explaining the nuclear technology that the three now possess it considers how long it would take each to build a nuclear weapon if such a fateful decision were made Although nuclear dominoes Northeast Asia cannot be ruled out the author does not predict such a scenario Unlike when each previously went down a nuclear path democracy and a free press now prevail as barriers to building nukes in the basement Reliance on US defence commitments is a better security alternative as long as such guarantees remain credible an issue that is also assessed But extended deterrence is not a tight barrier to proliferation of sensitive nuclear technologies Nuclear hedging by its Northeast Asian partners will challenge Washingtons nuclear diplomacy

Christianity, the Sovereign Subject, and Ethnic Nationalism in Colonial Korea Hannah Amaris Roh, 2022-08-12 One of the first philosophical approaches to the study of Korea s ethnic nationalism Christianity the Sovereign Subject and Ethnic Nationalism in Colonial Korea traces the impact of Christianity in the formation of Korean national identity outlining the metaphysical origins of the concept of the sovereign subject This monograph takes a meta historical approach and engages the moral questions of Korean historiography amid the fraught politics of narrating colonialism and the postcolonial period Indebted to Jacques Derrida s philosophy of deconstruction and his framework of hauntology this monograph unpacks the ethical consequences of ethnic nationalism exploring how Western metaphysics has haunted imaginations of freedom in colonial Korea While most studies of modern Korean nationalism and post colonialism have taken a cultural literary or social scientific approach this book draws on the thought of Jacques Derrida to offer an innovative intellectual history of Korea s colonial period By deconstructing the metaphysical claims of turn of the century Protestant missionaries and early modern Korean intellectuals the book showcases the relevance of Derrida s philosophical method in the study of modern Korean history This is a must read for scholars interested in Derrida historiography and Korean history

The Pacific War and Its Political Legacies Denny Roy, 2009-04-30 Intends to recount the events of the Pacific War that continue to vex international relations in Northeast Asia This title explains the origins of contending interpretations of the war and how those interpretations have led to the positions and policies of postwar governments and societal groups on issues directly related to the war

Korean Studies , 1997 Boundless Winds of Empire Sixiang Wang, 2023-07-11 For more than two hundred years after its establishment in 1392 the Chos n dynasty of Korea enjoyed generally peaceful and stable relations with neighboring Ming China which dwarfed it in size population and power This remarkably long period of sustained peace was not an inevitable consequence of Chinese cultural and political ascendancy In this book Sixiang Wang demonstrates how Chos n political actors strategically deployed cultural practices values and

narratives to carve out a place for Korea within the Ming imperial order *Boundless Winds of Empire* is a cultural history of diplomacy that traces Chosŏn's rhetorical and ritual engagement with China Chosŏn drew on classical Chinese paradigms of statecraft political legitimacy and cultural achievement It also paid regular tribute to the Ming court where its envoys composed paeans to Ming imperial glory Wang argues these acts were not straightforward affirmations of Ming domination instead they concealed a subtle and sophisticated strategy of diplomatic and cultural negotiation He shows how Korea's rulers and diplomats inserted Chosŏn into the Ming Empire's legitimating strategies and established Korea as a stakeholder in a shared imperial tradition *Boundless Winds of Empire* recasts a critical period of Sino Korean relations through the Korean perspective emphasizing Korean agency in the making of East Asian international relations **Sovereignty**

Christopher Smith, 2022-11-03 This volume brings the concept of sovereignty into a fresh light through a study of its long history and the realities of a globalised world **Africa in the Post Cold War International System** Sola

Akinrinade, Amadu Sesay, 1998-05-31 *Africa in the Post Cold War International System* is an informed critical and comprehensive analysis of the impact of the end of the Cold War on Africa and the attempts by African states to adjust to the emerging international order [Nuclear Debates in Asia](#) Mike Mochizuki, Deepa M. Ollapally, 2016-07-21 This important

book analyzes nuclear weapon and energy policies in Asia a region at risk for high stakes military competition conflict and terrorism The contributors explore the trajectory of debates over nuclear energy security and nonproliferation in key countries China India Japan Pakistan South Korea Taiwan Vietnam and other states in the Association of Southeast Asian Nations ASEAN Arguing against conventional wisdom the contributors make a convincing case that domestic variables are far more powerful than external factors in shaping nuclear decision making The book explores what drives debates and how decisions are framed the interplay between domestic dynamics and geopolitical calculations in the discourse where the center of gravity of debates lies in each country and what this means for regional cooperation or competition and U S nuclear energy and nonproliferation policy in Asia **Bibliographic Guide to East Asian Studies** New York Public Library

Citizenship Suren Pillay, 2023-01-26 This volume brings together reflections on citizenship political violence race ethnicity and gender by some of the most critical voices of our times Detailed and wide ranging individual reflections take the writings of prominent Ugandan political theorist Mahmood Mamdani as a touchstone for thinking about the world from Africa Contributors apply this theory to argue that we cannot make sense of the political contentions of difference identity and

citizenship today without understanding the legacies of colonial rule on our world Chapters examine the persistence of the past and how we must reckon with its tragedies its injustices and its utopias in order to chart a new politics the politics of possible futures that are more inclusive and more egalitarian and that can think of difference in more equitable ways In a time when the call to decolonize knowledge and politics rings loud and clear this is both a timely and a crucial intervention

Korea Naval War College (U.S.). Asia-Pacific Studies Group. Asia-Pacific Forum, 2006 This book is a collection of 16 essays by international authors who participated in an academic conference on Korea sponsored by the U S Naval War College Papers were originally presented at the Naval War College s Asia Pacific Forum the annual conference of the college s Asia Pacific Studies Group held in Newport R I on 26 27 August 2004 Plutonium Frank von Hippel, Masafumi Takubo, Jungmin Kang, 2019-12-23 This book provides a readable and thought provoking analysis of the issues surrounding nuclear fuel reprocessing and fast neutron reactors including discussion of resources economics radiological risk and resistance to nuclear proliferation It describes the history and science behind reprocessing and gives an overview of the status of reprocessing programmes around the world It concludes that such programs should be discontinued While nuclear power is seen by many as the only realistic solution to the carbon emission problem some national nuclear establishments have been pursuing development and deployment of sodium cooled plutonium breeder reactors and plutonium recycling Its proponents argue that this system would offer significant advantages relative to current light water reactor technology in terms of greater uranium utilization efficiency and that separating out the long lived plutonium and other transuranics from spent fuel and fissioning them in fast reactors would greatly reduce the duration of the toxicity of radioactive waste However the history of efforts to deploy this system commercially in a number of countries over the last six decades has been one of economic and technical failure and in some cases was used to mask clandestine nuclear weapon development programs Covering topics of significant public interest including nuclear safety fuel storage environmental impact and the spectre of nuclear terrorism this book presents a comprehensive analysis of the issue for nuclear engineers policy analysts government officials and the general public Frank von Hippel Jungmin Kang and Masafumi Takubo three internationally renowned nuclear experts have done a valuable service to the global community in putting together this book which both historically and comprehensively covers the plutonium age as we know it today They articulate in a succinct and clear manner their views on the dangers of a plutonium economy and advocate a ban on the separation of plutonium for use in the civilian fuel cycle in view of the high proliferation and nuclear security risks and lack of economic justification Mohamed ElBaradei Director General International Atomic Energy Agency 1997 2009 Nobel Peace Prize 2005 The 1960s dream of a plutonium economy has not delivered abundant low cost energy but instead has left the world a radioactive legacy of nuclear weapons proliferation and the real potential for nuclear terrorism Kang Takubo and von Hippel explain with power and clarity what can be done to reduce these dangers The governments of the remaining countries whose nuclear research and development

establishments are still pursuing the plutonium dream should pay attention Senator Edward Markey a leader in the US nuclear disarmament movement as a member of Congress since 1976 The authors have done an invaluable service by putting together in one place the most coherent analysis of the risks associated with plutonium and the most compelling argument for ending the practice of separating plutonium from spent fuel for any purpose They have given us an easily accessible history of the evolution of thinking about the nuclear fuel cycle the current realities of nuclear power around the world and arguably most important a clear alternative path to deal with the spent fuel arising from nuclear reactors for decades to centuries to come Robert Gallucci Chief US negotiator with North Korea 1994 Dean Georgetown University School of Foreign Service 1996 2009 President MacArthur Foundation 2009 2014 **Korea Between Empires, 1895-1919** Andre Schmid, 2002 Turning from more traditional modes of historical inquiry Korea Between Empires explores the formative influence of language and social discourse on conceptions of nationalism national identity and the nation state

Bibliographie Internationale de Science Politique, 1995 *Negotiating Asymmetry* Anthony Reid, Yangwen Zheng, 2009-11-30 Though wary of China's rapid rise her neighbors have considerable experience of dealing with unequal power without surrendering their autonomy For its part China has a long memory of unequal or tributary relations and a relatively brief and turbulent experience of working within the current useful fiction of sovereign equality in international relations The emerging pattern will have to take account of the great discrepancy in economic and military power between the future China and her neighbours and of how such asymmetry can be managed peacefully Negotiating Asymmetry explores how the real or imagined norms governing past relations may shape China's future position in the region by considering how relationships have changed over the past two centuries The volume argues that neither the Chinese world order of tribute relations nor the Westphalia model of sovereign equality ever operated effectively in Asia but suggests that the past does offer strong indicators about the shape of a new order in Asia
