Worlds in Shadow Patrick Nunn, 2021-08-05 Discover ancient civilizations that have disappeared beneath the ocean's surface and explore how the science of submergence adds to our knowledge of human history The traces of much of human history and that which preceded it lie beneath the ocean surface broken up dispersed often buried and always mysterious This is fertile ground for speculation even myth making but also a topic on which geologists and climatologists have increasingly focused in recent decades We now know enough to tell the true story of some of the continents and islands that have disappeared throughout Earth's history to explain how and why such things happened and to unravel the effects of submergence on the rise and fall of human civilizations In *Worlds in Shadow* Patrick Nunn sifts the facts from the fiction using the most up to date research to work out which submerged places may have actually existed versus those that probably only exist in myth He looks at the descriptions of recently drowned lands that have been well documented those that are plausible and those that almost certainly didn't exist Going even further back Patrick examines the presence of more ancient lands submerged beneath the waves in a time that even the longest reaching folk memory can't touch Such places may have played important roles in human evolution but can only be reconstructed through careful geological detective work Exploring how lands become submerged whether from sea level changes tectonic changes gravity collapse giant waves or volcanoes helps us determine why when and where land may disappear in the future and what might be done to prevent it **Historic Movie Theaters of Downtown Cleveland** Alan F. Dutka, 2016-07-04 The first movie theaters in Cleveland consisted of converted storefronts with sawed off telephone poles substituting for chairs and bedsheets acting as screens In 1905 Clevelanders marveled at moving images at Rafferty's Monkey House while dodging real monkeys and raccoons that wandered freely through the bar By the early 1920s a collection of marvelous movie palaces like the Stillman Theater lined Euclid Avenue but they survived for just two generations Clevelanders united to save the State Ohio and Allen Theaters

among others as wrecking balls converged for demolition Those that remain compose one of the nation s largest performing arts centers Alan F Dutka shares the remarkable histories of Cleveland s downtown movie theaters and their reemergence as community landmarks

Javaphilia Henry Spiller, 2015-03-31 Fragrant tropical flowers opulent batik fabrics magnificent bronze gamelan orchestras and of course aromatic coffee Such are the exotic images of Java Indonesia's most densely populated island that have hovered at the periphery of North American imaginations for generations Through close readings of the careers of four javaphiles individuals who embraced Javanese performing arts in their own quests for a sense of belonging *Javaphilia* American Love Affairs with Javanese Music and Dance explores a century of American representations of Javanese performing arts by North Americans While other Asian cultures made direct impressions on Americans by virtue of firsthand contacts through immigration trade and war the distance between Java and America and the vagueness of Americans imagery enabled a few disenfranchised musicians and dancers to fashion alternative identities through bold and idiosyncratic representations of Javanese music and dance *Javaphilia*'s main subjects Canadian born singer Eva Gauthier 1885 1958 dancer painter Hubert Stowitts 1892 1953 ethnomusicologist Mantle Hood 1918 2005 and composer Lou Harrison 1917 2003 all felt marginalized by the mainstream of Western society Gauthier by her lukewarm reception as an operatic mezzo soprano in Europe Stowitts by his homosexuality Hood by conflicting interests in spirituality and scientific method and Harrison by his predilection for prettiness in a musical milieu that valued more anxious expressions All four parlayed their own direct experiences of Java into a defining essence for their own characters By identifying aspects of Javanese music and dance that were compatible with their own tendencies these individuals could literally perform unconventional yet coherent identities based in Javanese music and dance Although they purported to represent Java to their fellow North Americans they were in fact simply representing themselves In addition to probing the fascinating details of these javaphiles lives *Javaphilia* presents a novel analysis of North America's first significant encounters with Javanese performing arts at the 1893 World's Columbian Exposition in Chicago An account of the First International Gamelan Festival in Vancouver BC at Expo 86 almost a century

later bookends the epoch that is the focus of Javaphilia and sets the stage for a meditation on North Americans ongoing relationships with the music and dance of Java

Volcanoes in Human History Jelle Zeilinga de Boer, Donald Theodore Sanders, 2025-10-07 The classic account of how volcanism has shaped human culture and science from the Bronze Age eruption that destroyed Minoan Crete to Mount St Helens When the volcano Tambora erupted in Indonesia in 1815 as many as one hundred thousand people perished from the blast and ensuing famine Gases and dust particles ejected into the atmosphere changed weather patterns around the world resulting in the infamous year without a summer in North America food riots in Europe and a widespread cholera epidemic And the gloomy weather inspired Mary Shelley to write the gothic novel *Frankenstein* This panoramic book tells the story of nine such epic volcanic events explaining the related geology and exploring the myriad ways our planet's volcanism has affected human history

Scratch Trivia - Movies Trip Payne, 2007-04 Suitable for the avid movie buff this book from the Sit and Solve series is filled with intriguing questions about favourite actors best pictures great directors memorable film lines super screen moments behind the scenes gossip and Oscar trademark wins It comes in a handy size that can slip in to your bag or pocket

When Humans Nearly Vanished Donald R. Prothero, 2018-10-16 The fascinating true story of the explosion of the Mount Toba supervolcano the Earth's largest eruption in the past 28 million years and its lasting impact on Earth and human evolution Some 73 000 years ago the huge dome of Mount Toba in today's Sumatra Indonesia began to rumble A deep vibration shook the entire island Jets of steam and ash emanated from the summit followed by an explosion louder than any sound heard by Homo sapiens since our species evolved on Earth The eruption of the Toba supervolcano released the energy of a million tons of explosives seven hundred cubic miles of magma spewed outward in an explosion forty times larger than the largest hydrogen bomb and more than a thousand times as powerful as the Krakatau eruption in 1883 So much ash and debris was injected into the stratosphere that it partially blocked the sun's radiation and caused global temperatures to drop by five to nine degrees It took a full decade for Earth to recover to its pre eruption temperatures When *Humans Nearly Vanished* presents the controversial argument that the Toba catastrophe nearly wiped out the human race leaving only about a thousand to ten thousand breeding pairs of humans worldwide Human genes today show evidence of a genetic bottleneck an effect seen when a population of organisms becomes so small that their genetic diversity is greatly reduced This group of survivors could be the ancestors of all humans alive today Donald R Prothero explores the geological and biological evidence supporting the Toba bottleneck theory reveals how the explosion itself was discovered and offers insight into how the world changed afterward and what might happen if such an eruption occurred today Prothero's riveting account of this calamitous supervolcanic explosion is not to be missed

Imagining Atlantis Richard Ellis, 2012-01-11 Ever since Plato created the legend of the lost island of Atlantis it has maintained a uniquely strong grip on the human imagination For two and a half millennia the story of the city and its catastrophic downfall has inspired people from Francis Bacon to Jules Verne to Jacques Cousteau to speculate on the island's

origins nature and location and sometimes even to search for its physical remains It has endured as a part of the mythology of many different cultures yet there is no indisputable evidence let alone proof that Atlantis ever existed What then accounts for its seemingly inexhaustible appeal Richard Ellis plunges into this rich topic investigating the roots of the legend and following its various manifestations into the present He begins with the story s origins Did it arise from a common prehistorical myth Was it a historical remnant of a lost city of pre Columbians or ancient Egyptians Was Atlantis an extraterrestrial colony Ellis sifts through the scientific evidence marshaled to prove these theories and describes the mystical and spiritual significance that has accrued to them over the centuries He goes on to explore the possibility that the fable of Atlantis was inspired by a conflation of the high culture of Minoan Crete with the destruction wrought on the Aegean world by the cataclysmic eruption around 1500 b c of the volcanic island of Thera or Santorini A fascinating historical and archaeological detective story Imagining Atlantis is a valuable addition to the literature on this essential aspect of our mythohistory
