Microbial Biosorption of Metals Pavel Kotrba, Martina Mackova, Tomas Macek, 2011-01-13 Heavy metals always pose serious ecological risks when released into the environment due to their elemental non degradable nature regardless of their chemical form. This calls for the development of efficient and low cost effluent treatment and metal recuperation technologies for contaminated waste water not only because regulatory limits need to be met but also because the waste itself can be a resource for certain precious metals. Biosorption is a general property of living and dead biomass to rapidly bind and abiotically concentrate inorganic or organic compounds from even very diluted aqueous solutions. As a specific term biosorption is a method that utilizes materials of biological origin biosorbents formulated from non living biomass for the removal of target substances from aqueous solutions. Recent research on biosorption provides a solid understanding of the mechanism underlying microbial biosorption of heavy metals and related elements. This book gathers review articles analyzing current views on the mechanism and bio chemistry of biosorption the performance of bacterial fungal and algal biomass and the practical aspects of biosorbent preparation and engineering. It also reviews the physico chemical evaluations of biosorbents and modelling of the process as well as the importance of biosorption during heavy metal removal using living cells. It is a reference work for scientists environmental safety engineers and R D specialists who wish to further promote biosorption research and use the accumulated knowledge to develop and build industrial applications of biosorption in heavy metal separation technologies.

La ciencia de la compasión Javier García-Campayo, Ausiàs Cebolla, Marcelo M. P. Demarzo, 2016-05-26 Las terapias centradas en la compasión CFT se basan en la dimensión social del ser humano y en su búsqueda de contacto y relación con los demás miembros de su especie. Teniendo en cuenta los tres sistemas de regulación de los afectos el sistema de amenaza el de activación y el de confortamiento se establece la compasión como el regulador principal de los tres sistemas. La mayor parte de lo publicado en español sobre compasión proviene del budismo o de maestros espirituales por eso hay que destacar que este texto es un libro sobre divulgación científica y multidisciplinar de las técnicas y programas laicos de la compasión especialmente para profesionales de la salud y la educación.
