

An aerial photograph of an industrial site undergoing restructuring. A large, dark, cylindrical pipe or structure has collapsed, lying diagonally across the frame. The ground is covered in debris, including twisted metal and scattered materials. In the lower-left foreground, a group of about seven workers wearing hard hats and work clothes are standing in a line, looking towards the collapsed structure. The overall scene conveys a sense of large-scale industrial demolition or dismantling.

Lefts Dirty Job:

The Left's Dirty Job W. Rand Smith, 2010-06-15 The Left's Dirty Job compares the experiences of recent socialist governments in France and Spain examining how the governments of Francois Mitterrand 1981 1995 and Felipe Gonzalez 1982 1996 provide a key test of whether a leftist approach to industrial restructuring is possible This study argues that in fact both governments's policies generally resembled those of other European governments in their emphasis on market adapting measures that eliminated thousands of jobs while providing income support for displaced workers Featuring extensive field work and interviews with over one hundred political labor and business leaders this study is the first systematic comparison of these important socialist governments

The Left Divided Sara Watson, 2015-09-11 Why do some countries construct strong systems of social protection while others leave workers exposed to market forces In the past three decades scholars have developed an extensive literature theorizing how hegemonic social democratic parties working in tandem with a closely allied trade union movement constructed models of welfare capitalism Indeed among the most robust findings of the comparative political economy literature is the claim that the more political resources controlled by the left the more likely a country is to have a generous universal system of social protection The Left Divided takes as its starting point the curious fact that despite this conventional wisdom very little of the world actually approximates the conditions identified by mainstream scholarship for creating universal generous welfare states In most countries outside of northern Europe divisions within the left within the labor movement among left parties as well as between left parties and a divided union movement are a defining feature of

politics The Left Divided in contrast focuses on the far more common and deeply consequential situation where intra left divisions shape the development of social protection Arguing that the strength and position taken by the far left is an important and overlooked determinant of social protection outcomes the book presents a framework for distinguishing between different types of left movements and analyzes how the distribution of resources within the left shapes party strategies for expanding social protection in theoretically unanticipated ways To demonstrate the counterintuitive effects of having the far left control significant political resources Watson combines in depth case studies of Iberia with cross national analysis of OECD countries and qualitative comparative analyses of other divided lefts

Protest Movements and Parties of the Left David J. Bailey, 2017-11-01 How successful are social movements and left parties at achieving social and political change How if at all can movements and parties work together to challenge existing hierarchies Is the political left witnessing a revival in contemporary politics This book highlights some of the key achievements of left parties and protest movements in their goal of challenging different types of inequality and considers the ways in which their challenge to authority and power could be intensified It combines new theoretical ideas with rich empirical detail on the debates and concrete activities undertaken by left parties and protest movements over a broad historical period from the early European labour movement to the recent anti austerity global protests The book will offer unique insight into the broad history and theory of emancipatory politics as well as making an important contribution to ongoing debates between left leaning academics researchers and activists

States' Gains, Labor's Losses Dorothy J. Solinger, 2018-07-05 In this explicitly comparative work Dorothy J Solinger examines the effects of global markets on the domestic politics of major states In the late 1970s leaders around the world faced a need both to continue productive investment and to cut labor costs to compete internationally in a changed world market To accommodate forces seemingly beyond their control they often opted to reduce

social protections and benefits that citizens had come to expect in the process recalibrating their established political economic coalitions For countries whose governance was built on a coalition between workers and the state the political conundrum was particularly intense *States Gains Labor's Losses* concentrates on three countries China France and Mexico where revolution inspired political compacts between labor and the state had to be renegotiated In all three cases choices to forge a deepened dependence on international capital markets required the ruling parties to fire large numbers of workers and cut social benefits while attempting not to provoke widespread social unrest or even full scale revolt among their supporters China France and Mexico also shared strong legacies of protectionism and state intervention in the economy so the decision of each to join a supranational economic organization France and the EU China and the GATT WTO Mexico and NAFTA in the hope of alleviating crises of capital shortage involved submission to a new set of liberal economic rules that further compromised their sociopolitical compacts Examining a fundamental question about the dynamics of globalization and worker protest through an innovative comparative perspective *States Gains Labor's Losses* emphasizes the growing tensions and new compromises between the working class and their political leaders in the face of intense international economic pressures
