Leges Henrici Primi:

Leges Henrici Primi L. J. Downer, 1972 The *Leges Henrici Primi* or Laws of Henry I is a legal treatise written between 1114 and 1118 by an unknown Norman that records the legal customs of medieval England in the reign of King Henry I of England Although it is not an official document it was written by someone apparently associated with the royal administration It lists and explains the laws and includes explanations of how to conduct legal proceedings Although its title implies that these laws were issued by King Henry it lists laws issued by earlier monarchs that were still in force in Henry's reign the only law of Henry that is included is the coronation charter he issued at the start of his reign It covers a diverse range of subjects including ecclesiastical cases treason murder theft feuds assessment of danegeld and the amounts of judicial fines The book offers a clear image of the beginning of Common Law This treatise identifies itself as a record of the laws from the time of Henry I and is made up of original descriptions of contemporary law edited selections from pre-conquest legal texts and additional source materials The law code recognised the difference in the laws of the Danelaw the old Kingdom of Mercia and the lands of the Kingdom of Wessex It seems probable that this treatise was the work of the translator responsible for the *Quadripartitus* The translator of that collection promised to produce a further book on contemporary law and a significant portion of the material in the *Quadripartitus* is deployed in the *Leges* However the *Leges* also drew on the author's personal knowledge of the law's operations The second longest legal treatise or code produced before 1154 the *Leges* contents treat almost all matters of law and its administration *Voir Speculum* Vol 49 No 3 Jul 1974 p 556 557

the Medieval period Questions still remain unanswered and require further investigation thus many scholars have collaborated to produce this collection which offers a synthesis of the most recent scholarship This book relates the workings of seigneurial systems in different areas of Europe from the Baltic to the Mediterranean from Castile to Pontus In this way the perspective remains the same institutional and material This book emphasises both the institutional and informal forms of lordship identified and crystallised by social and political actors for example communities sovereigns nobles bishops and abbots It offers a general framework for those approaching the subject for the first time and a useful in depth tool with numerous regional cases for long term scholars

Decoding Domesday David Roffe, 2015 New light is shed on the motives and objectives for the compiling of the still mysterious Domesday Book revolutionising our understanding of the period The Domesday Book is one of our major sources for a crucial period of English history yet it remains difficult to interpret This provocative new book proposes a complete re assessment with profound implications for our understanding of the society and economy of medieval England In particular it overturns the general assumption that the Domesday inquest was a comprehensive survey of lords and their lands and so tells us about the economic underpinning of power in the late eleventh century rather it suggests that in 1086 matters of taxation and service were at issue and data were collected to illuminate these concerns What emerges from this is that Domesday Book tells us less about a real economy and those who sustained it than a tributary one with much of the wealth of England being omitted The source then is not the transparent datum that social and economic historians would like it to be In return however the book offers a richer understanding of late eleventh century England in its own terms and elucidates many long standing conundrums of the Domesday Book itself DAVID ROFFE is an honorary research fellow at Sheffield University He has written widely on Domesday Book and edited five volumes of the Alecto County Edition of the text

High-Ranking Widows in Medieval Iceland and Yorkshire Philadelphia Ricketts, 2010-09-24 This book provides an evocative insight into the property power remarriage and identity of high ranking widows in two fundamentally different societies Iceland and Yorkshire The legal position of widows in each region is examined in light of evidence from charters royal records and sagas to establish a detailed picture of practice Comparison and family reconstruction are important elements enabling the book to emphasize the placement of widows within the context of society and its institutions and to consider fully the impact of individual circumstances on the widows opportunities for action The result offers a fresh approach that tests widely accepted generalizations about widows independence highlights differences between regions and suggests the need to reconsider traditional rigid definitions of kinship systems

The Moral Economy of the Countryside Rosamond Faith, 2019-10-31 Shows the moral economy

of early medieval England transformed by feudal thinking in the aftermath of the Norman Conquest **The Sources and Literature of English History from the Earliest Times to about 1485** Charles Gross,1900 *The Government of England Under Henry I* Judith A. Green,1986 The is a full length analysis of the machinery and men of government under Henry I which looks in much greater detail than is possible for other contemporary states at the way government worked and at the careers of royal servants Royal government in England in the early twelfth century was developing fast under political and military pressures At the centre above all during the king s long absences in Normandy new ways of supervision were found especially in the financial field Government also provided distinct opportunities in administration and for the first time it is possible to identify a number of men who were effectively professional administrators The book will therefore become essential reading on the reign of Henry I and on the general development of English government in the twelfth century

Disputes and Settlements John Bossy,Lyndal Roper,2003-01-30 This collection of essays by British American and French scholars uses the records of the law in Western Europe from the fall of Rome to the nineteenth century in an attempt to outline a social history of the West considered as a history of human relations The primary themes are dispute arbitration and conjugal relations the primary influences considered are feud Christianity and the state The contributions are discussed overall by an anthropologist lawyer Simon Roberts who writes an anthropological introduction and by the editor in a short historical postscript The aim has been to strike a new note in social history by attending more closely to actual people and their actual relations by drawing on the resources of anthropology legal history the history of religious feelings and institutions and of states to illuminate their behaviour and by combining the efforts of scholars representing a diversity of intellectual traditions and a long perspective of human experience **Canon Law and the Letters of Ivo of Chartres**

Christof Rolker,2010-01-28 Ivo of Chartres was one of the most learned scholars of his time a powerful bishop and a major figure in the so called Investiture Contest Christof Rolker here offers a major new study of Ivo his works and the role he played in the intellectual religious and political culture of medieval Europe around 1100 AD Comparing Ivo s extensive correspondence to the contemporary canon law collections attributed to him Dr Rolker provides a new interpretation of their authorship Contrary to current assumptions he reveals that Ivo did not compile the Panormia showing that its compiler worked in a distinctly different mental framework from Ivo These findings call for a reassessment of the relationship between Church reform and scholasticism and shed new light on Ivo as both a scholar and bishop **Secular laws** Great Britain,1840
