Heavy Freight Locomotives Of Britain:

Heavy Freight Locomotives of Britain Denis Griffiths,1993 The heavy freight locomotive has always been an important part of Britain's railway operations This book is a history of the development of the freight locomotive from the steam era to the high powered and technologically advanced diesel electrics of today [British Rail Class 60 Locomotives](#) Edward Gleed,2016-07-15 During the mid 1980s in a drive for greater efficiency British Rail required another heavy freight locomotive some of the earlier Type 5 freight locomotives being outdated and no longer regarded as suitable for heavy freight duties The new Class 60 locomotive was to be constructed using lessons learned from the Classes 56 and 58 Six organisations were invited to tender but only three did so The contract was awarded to Brush Electrical Machines today Brush Traction part of the Wabtec Rail Group for a powerful 60mph Type 5 Co Co design which resulted in an order being placed for one hundred Class 60 diesel electric locomotives Using original research from the National Archives British Rail Class 60 Locomotives is a high illustrated guide that explores the commissioning of the Class 60s and their construction testing and running It undertakes an in depth technical appraisal of the class and details names liveries modifications and preservation and includes the Super 60 refurbishment programme and acquisition of ten Class 60s for Colas Rail UK bringing the timeline to the present day Of interest to all diesel loco enthusiasts and railway modellers this book is lavishly illustrated with 280 colour and black white photographs many previously unpublished **The Locomotives of Robert Riddles** Colin Boocock,2023-11-09 The Locomotives of Robert Riddles guides the reader in the quest to understand how Robert Riddles career on the LMS and in war service shaped his knowledge and character and led to him becoming the obvious choice for leading the locomotive engineering function within the newly formed Railway Executive The book outlines the substantial impact Riddles had on the design and supply of locomotives that were to support the Allied military campaigns in the second world war including useful analysis of the types of locomotives specifically designed for that work The bulk of the book outlines the decision making processes that led to the twelve designs of standard steam locomotives that were intended to be the future stop gap before electrification and the political and practical reasons for successive policy changes that led to their unexpectedly short lives Those events include the 1955 Modernization Plan with its emphasis on dieselization and the subsequent railway rationalizations that reduced the need not only for new steam locomotives but also made relatively new diesels redundant Each BR standard locomotive type is described in its own chapter The performance of each class is given its rightful emphasis The book is comprehensively illustrated with largely unpublished pictures that cover a wide range of locations and locomotive duties [British Diesel Locomotives of the 1950s and '60s](#) Greg Morse,2016-07-28 After the Second World War the drive for the modernisation of Britain's railways ushered in a new breed of locomotive the Diesel Diesel powered trains had been around for some time but faced with a coal crisis and the Clean Air Act in the 1950s it was seen as a part of the solution for British Rail This beautifully illustrated book written by an expert on rail history charts the

rise and decline of Britain's diesel powered locomotives It covers a period of great change and experimentation where the iconic steam engines that had dominated for a century were replaced by a series of modern diesels including the ill fated Westerns and the more successful Deltics British Steam: BR Standard Locomotives Keith Langston,2012-11-19 A history of post second world war steam locomotive design and construction in Great Britain the perfect gift for railroad history buffs After WWII the existing railway companies were all put into the control of the newly formed British Transport Commission and that government organization spawned British Railways which came into being on January 1st 1948 The railway infrastructure had suffered badly during the war years and most of the steam locomotives were tired and badly maintained and or life expired Although the management of British Railways was already planning to replace steam power with diesel and electric engines they still decided to build more steam locomotives as a stop gap Some 999 Standard locomotives were built in twelve classes ranging from super powerful express and freight engines to suburban tank locomotives The locomotives were mainly in good order when the directive came in 1968 to end steam some trains were only eight years old There still exists a fleet of forty six preserved Standards of which 75% are in working order in and around the UK's preserved railways furthermore three new build standard locomotives are proposed Steam fans who were around in the 1960s all remember the Standards Classic British Steam Locos compiled from Wikipedia entries and published by DrGoogelberg,2012-06-11 do you want to know everything on steam locos how they work Read about the technology and lots of steam locos like the flying Scotsman Compiled from Wikipedia pages and published by dr Googelberg **British Rail Class 20 Locomotives** Pip Dunn,2016-05-31 The first of the English Electric Type 1 design what we now know as the Class 20s appeared in June 1957 With their distinctive chopper engine sound these single cabbed locomotives soon gained a reputation for rugged reliability brought about by their simplicity and use of tried and tested components British Rail Class 20 Locomotives looks back at the operations of these fine locomotives since 1957 covering their varied workings and duties regional use and railtour operations The book also covers the technical aspects and specifications of the locomotives including liveries and detailing Electric Locomotives on Britain's Railways George Woods,2023-09-15 Previously unpublished images covering a range of different electric powered traffic on Britain's railways **British Steam Military Connections: London, Midland and Scottish Railway Steam Locomotives** Keith Langston,2019-08-30 This British Railways history explores the long held tradition of naming steam locomotives in honor of the military The naming of steam locomotives was a beloved British tradition since the first railway locomotives appeared in 1804 Many of the names were chosen in honor of military personnel regiments squadrons naval vessels aircraft battles and associated historic events This volume looks specifically at the steam locomotives with military inspired names that were built by the London North Eastern Railway which joined the British Railways stock in 1948 A large number of the company's Jubilee class locomotives were given names with a military connection as were a small number of Black Five class engines Famously the majority of the

much admired Royal Scot class of engines carried names associated with the military in general and regimental names in particular. Many of the nameplates were adorned with ornate crests and badges. Long after the demise of mainline steam, rescued nameplates have become prized collectors' items. This generously illustrated publication highlights the relevant steam locomotives and explains the origins and social history surrounding their military names. [The Steel Highway](#) Cecil J. British Atlantic Express Tender Locomotives David Maidment, 2025-08-15 The British Atlantic locomotive flourished in the first decade of the nineteenth century especially on the relatively level stretches of the East Coast mainline. This book describes the design, construction, history, operation and performance of the Great Northern, Great Central, North Eastern and North British Atlantics and the London Brighton South Coast engines that were developed from the GN design. More unusual were the Lancashire Yorkshire Highflyers which were some of the earliest and also included are the most powerful of all Churchward's Great Western Atlantics converted to 4 6 0s later and his three French Compounds. Most had been replaced by 4 6 0 and 4 6 2 designs by the 1920s and were withdrawn before the Second World War though a few lingered to the post war period and just reached the era of British Railways though only the Brighton Atlantics survived longer. The last of all 32424 Beachy Head was withdrawn in 1958 and has been recreated for the Heritage industry. The book concludes with a brief look for comparative purposes at some of the most influential Atlantics on the rest of the world's railways. *Revue de l'ingénieur et index technique*, 1903 [Index of the technical press](#), 1903
