Hellas And Rome The Story Of Greco Roman Civilization:

Hellas and Rome Robert Douglas Mead,1972 *Teacher's Manual for Hellas and Rome* Adele Stern,Robert Douglas Mead,1972 The Story of Greece and Rome Antony Spawforth,2018-01-01 The extraordinary story of the intermingled civilizations of ancient Greece and Rome spanning more than six millennia from the late Bronze Age to the seventh century The magnificent civilization created by the ancient Greeks and Romans is the greatest legacy of the classical world However narratives about the civilized Greek and Roman empires resisting the barbarians at the gate are far from accurate Tony Spawforth an esteemed scholar author and media contributor follows the thread of civilization through more than six millennia of history His story reveals that Greek and Roman civilization to varying degrees was supremely and surprisingly receptive to external influences particularly from the East From the rise of the Mycenaean world of the sixteenth century B C Spawforth traces a path through the ancient Aegean to the zenith of the Hellenic state and the rise of the Roman empire the coming of Christianity and the consequences of the first caliphate Deeply informed provocative and entirely fresh this is the first and only accessible work that tells the extraordinary story of the classical world in its entirety What Is Ancient History? Walter Scheidel,2025-04-22 From one of today s most innovative ancient historians a provocative new vision of why ancient history matters and why it needs to be told in a radically different global way It s easy to think that ancient history is well ancient history obsolete irrelevant unjustifiably focused on Greece and Rome and at risk of extinction In What Is Ancient History Walter Scheidel presents a compelling case for a new kind of ancient history a global history that captures antiquity s pivotal role as a decisive phase in human development one that provided the shared foundation of our world and continues to shape our lives today For Scheidel ancient history is when the earliest versions of today s ways of life were created and spread from farming mining and engineering to housing and transportation cities and government writing and belief systems Transforming the planet this process unfolded all over the world in Eurasia Africa and the Americas often at different times sometimes haltingly but ultimately unstoppably Yet it s rarely studied or taught that way Since the eighteenth century Western intellectuals have dismembered the ancient world driven not only by their quest for professional expertise but also by nationalism colonialism racism and the idealization of Greece and Rome Specialized scholarship has fractured into numerous academic niches obscuring broader patterns and dynamics and keeping us from understanding just how much humanity has long had in common The time has come Scheidel argues to put the ancient world back together by moving beyond the limitations of Greco Roman classics by systematically comparing ancient societies and by exploring early exchanges and connections between them The time has come in other words for an ancient history for everyone **Library of Congress Subject Headings** Library of Congress,2004 **Library of Congress Subject Headings** Library of Congress. Civilization in World History Peter N. Stearns, 2008-01-28 Western civilization and world history are often seen as different or even mutually exclusive routes into historical studies This volume shows that they can be successfully linked providing a tool to see each subject in the context of the other identifying influences and connections Western Civilization in World History takes up the recent debates about the merits of the well established Western civ approach versus the newer field of world history Peter N Stearns outlines key aspects of Western civilization often assumed rather than analyzed and reviews them in a global context

Teaching Global History Alan J. Singer, 2012-04-27 Teaching Global History challenges prospective and beginning social studies teachers to formulate their own views about what is important to know in global history and why It explains how to organize the curriculum around broad social studies concepts and themes and student questions about humanity history and the contemporary world All chapters include lesson ideas a sample lesson plan with activity sheets primary source documents and helpful charts graphs photographs and maps High school students responses are woven in throughout Additional material corresponding to each chapter is posted online at http://people.hofstra.edu/alan_j_singer The traditional curriculum tends to highlight the Western heritage and to race through epochs and regions leaving little time for an in depth exploration of concepts and historical themes for the evaluation of primary and secondary sources and for students to draw their own historical conclusions Offering an alternative to such pre packaged textbook outlines and materials this text is a powerful resource for promoting thoughtful reflection and debate about what the global history curriculum should be and how to teach it

The Decline of Nature Gilbert LaFreniere, Gilbert F. LaFreniere, 2008 An environmental history of ideas embedded in a compact account of Western civilization s ecological impact upon the planet particularly in Europe and its colonies
