How Families Still Matter Vern L. Bengtson, Timothy J. Biblarz, Robert E. L. Roberts, 2002-10-17 How Families Still Matter casts doubt on the conventional wisdom about family decline during the last decades of the twentieth century The authors draw from the longest running longitudinal study of families in the world the Longitudinal Study of Generations conducted at the University of Southern California to discover whether parents are really less critical in shaping the life choices and achievements of their children than they were a generation ago They compare the influence of parents on self confidence values and levels of achievement on the Baby Boomer generation with that of Baby Boomer parents on their own Generation X children The findings may surprise many readers Generation X youth showed higher levels of education career attainments and self esteem than their parents as youth and similar values were found across generations They indicate the resilience of family bonds across generations even against the backdrop of massive social and family changes since the 1960s

Families and Faith Vern L. Bengtson, 2013-10-04 Winner of the Distinguished Book Award from American Sociology Association Sociology of Religion Section Winner of the Richard Kalish Best Publication Award from the Gerontological Society of America Few things are more likely to cause heartache to devout parents than seeing their child leave the faith And it seems from media portrayals that this is happening more and more frequently But is religious change between generations common How does religion get passed down from one generation to the next How do some families succeed in passing on their faith while others do not *Families and Faith How Religion is Passed Down across Generations* seeks to

answer these questions and many more For almost four decades Vern Bengtson and his colleagues have been conducting the largest ever study of religion and family across generations Through war and social upheaval depression and technological revolution they have followed more than 350 families composed of more than 3 500 individuals whose lives span more than a century the oldest was born in 1881 the youngest in 1988 to find out how religion is or is not passed down from one generation to the next What they found may come as a surprise despite enormous changes in American society a child is actually more likely to remain within the fold than leave it and even the nonreligious are more likely to follow their parents example than to rebel And while outside forces do play a role the crucial factor in whether a child keeps the faith is the presence of a strong fatherly bond Mixing unprecedented data with gripping interviews and sharp analysis Families and Faith offers a fascinating exploration of what allows a family to pass on its most deeply held tradition its faith Families Count Alison Clarke-Stewart, Judy Dunn, 2006-03-13 This book is concerned with the question of how families matter in young people's development a question of obvious interest and importance to a wide range of readers which has serious policy implication A series of key current topics concerning families are examined by the top international scholars in the field including the key risks affecting children individual differences in their resilience links between families and peers the connections between parental work and children's family lives the impact of childcare divorce and parental separation grandparents and new family forms such as lesbian and surrogate mother families The latest research findings are brought together with discussion of policy issues raised Inventing the Modern American Family Isabel Heinemann, 2012-05-14 Die USA durchliefen im 20.
