

THE FIRST BOOK OF MOSES, CALLED GENESIS

CHAPTER 1

1 IN the beginning God created the heaven and the earth.
2 And the earth was without form, and void; and darkness was upon the face of the deep. And the Spirit of God moved upon the face of the waters.
3 And God said, Let there be light, and there was light.

4 And God saw the light, that it was day, and the lesser light to rule the night: *he made* the stars also.
5 And God set them in the firmament of the heaven to give light upon the earth.
6 And to rule over the day and the night, and to divide the light from the darkness.
7 And God saw that it was good.
8 And the evening and the morning were the first day.
9 And God said, Let the waters bring forth abundant life, and the fowl of the air, and the beasts, and man.
10 And God created the great whales, and every living creature that creepeth, and every beast that hath life, of every kind, after his kind, and every fowl of the air according to his kind, and every beast of the earth according to his kind, and man.

The Bestseller, 2000 Yes the Bible is the world's all time best seller It has been translated into most of the world's languages Yet unlike most other best sellers it often gathers dust on the shelf Research by the Scripture Union at the end of the twentieth century showed that fewer Christians read the bible regularly than at any point during that century and a large proportion of 15's 25's hardly read it at all These days we can't say it's too hard to read because there are excellent modern versions available It probably has more to do with the fact that the Bible isn't just one book it's a library There's history law poetry biography romance and adventure But where do you start Where do you look You need to have a balanced diet in what you read There is danger in only learning a few favourite verses or sticking to easy books We need the wider picture or we will get things out of context This booklet is designed to help by giving an overview of the Bible with a brief summary and outline of each of its 66 books

Science and Christianity in Pulpit and Pew Ronald L. Numbers,2007-09-10 As past president of both the History of Science Society and the American Society of Church History Ronald L Numbers is uniquely qualified to assess the historical relations between science and Christianity In this collection of his most recent essays he moves beyond the clichés of conflict and harmony to explore the tangled web of historical interactions involving scientific and religious beliefs In his lead essay he offers an unprecedented overview of the history of science and Christianity from the perspective of the ordinary people who filled the pews of churches or loitered around outside Unlike the elite scientists and theologians on whom most historians have focused these vulgar Christians cared little about the discoveries of Copernicus Newton and Einstein Instead they worried about the causes of the diseases and disasters that directly affected their lives and about scientists preposterous attempts to trace human ancestry back to apes Far from dismissing opinion makers in the pulpit Numbers closely looks at two the most influential Protestant theologians in nineteenth century America Charles Hodge and William Henry Green Hodge after decades of struggling to harmonize Gods two revelations in nature and in the Bible in the end famously described Darwinism as atheism Green on the basis of his careful biblical studies concluded that Ussher s chronology was unreliable thus opening the door for Christian anthropologists to accommodate the subsequent discovery of human antiquity In *Science without God* Numbers traces the millennia long history of so called methodological naturalism the commitment to explaining the natural world without appeals to the supernatural By the early nineteenth century this practice was becoming the defining characteristic of science in the late twentieth century it became the central point of attack in the audacious attempt of intelligent designers to redefine science Numbers ends his reassessment by arguing that although science has markedly changed the world we live in it has contributed less to secularizing it than many have claimed Taken together these accessible and authoritative essays form a perfect introduction to Christian attitudes towards science since the 17th century
