How Things Are:

How Things Are Mark Siderits, 2021-11-02 It is widely known that Buddhists deny the existence of the self However Buddhist philosophers defend interesting positions on a variety of other issues in fundamental ontology In particular they have important things to say about ontological reduction and the nature of the causal relation Amidst the prolonged debate over global anti realism Buddhist philosophers devised an innovative approach to the radical nominalist denial of all universals and real resemblances While some defend presentism others propound eternalism In *How Things Are* Mark Siderits presents the arguments that Buddhist philosophers developed on these and other issues Those with an interest in metaphysics may find new and interesting insights into what the Buddhists had to say about their ideas This work is designed to introduce some of the more important fruits of Buddhist metaphysical inquiry to philosophers with little or no prior knowledge of that tradition While there is plenty of scholarship on the Indian Buddhist philosophical tradition it is primarily concerned with the historical details often presupposes background knowledge of the major schools and figures and makes ample use of untranslated Sanskrit technical terms What has been missing from this area of philosophical inquiry are studies that make the Buddhist tradition accessible to philosophers who are interested in solving metaphysical problems This work fills that gap by focusing not on history and texts but on the metaphysical puzzles themselves and on ways of trying to solve them

How Things Are J. Bogen, J.E. McGuire, 2012-12-06 One of the earliest and most influential treatises on the subject of this volume is Aristotle's *Categories* Aristotle's title is a form of the Greek verb for speaking against or submitting an accusation in a legal proceeding By the time of Aristotle it also meant to signify or to predicate Surprisingly the predicates Aristotle talks about include not only bits of language but also such nonlinguistic items as the color white in a body and the knowledge of grammar in a man's soul *Categories* I ii Equally surprising are such details as Aristotle's use of the terms homonymy and synonymy in connection with things talked about rather than words used to talk about them Judging from the evidence in the *Organon* the *Metaphysics* and elsewhere Aristotle was both aware of and able to mark the distinction between using and mentioning words and so we must conclude that in the *Categories* he was not greatly concerned with it For our purposes however it is best to treat the term predication as if it were ambiguous and introduce some jargon to disambiguate it Code Modrak and other authors of the essays which follow use the terms linguistic predication and metaphysical predication for this

Nothing in This Book Is True, But It's Exactly How Things Are Bob Frissell, 2024-11-05 Describes the forgotten history of the lost civilizations of Atlantis and Lemuria and how after their destruction due to pole shifts the Ascended Masters seeded the great civilizations of ancient Egypt Incan Peru and the Himalayas Explores our impending planetary ascent into higher consciousness and provides tools and exercises to support it including Merkaba Light Body activation meditation Breath Alchemy practices and techniques to access your Higher Self In this 30th anniversary edition of the underground classic Bob Frissell shares an updated account of Earth's ancient past as
