In Pursuit of the Unknown Ian Stewart, 2012-03-13 The seventeen equations that form the basis for life as we know it Most people are familiar with history's great equations Newton's Law of Gravity for instance or Einstein's theory of relativity But the way these mathematical breakthroughs have contributed to human progress is seldom appreciated In *In Pursuit of the Unknown* celebrated mathematician Ian Stewart untangles the roots of our most important mathematical statements to show that equations have long been a driving force behind nearly every aspect of our lives Using seventeen of our most crucial equations including the Wave Equation that allowed engineers to measure a building's response to earthquakes saving countless lives and the Black Scholes model used by bankers to track the price of financial derivatives over time Stewart illustrates that many of the advances we now take for granted were made possible by mathematical discoveries An approachable lively and informative guide to the mathematical building blocks of modern life *In Pursuit of the Unknown* is a penetrating exploration of how we have also used equations to make sense of and in turn influence our world

100 Year Cover-Up Revealed James Edward Gilmer, 2011-09-15 *100 Year Cover up Revealed We Lived With Dinosaurs* makes our past coexistence with dinosaurs effortlessly apparent with a wide variety of proof ranging from artistic to documentary to scientific Although it automatically invalidates evolution by proving coexistence this book takes the extra step of examining and destroying with logic and science every major assumption and claim made by evolutionists including the absurd notion that dinosaurs and humans missed each other by 65 million years The sub topic that runs throughout the entire book is that for the past century evolutionists have been brainwashing us with bogus claims while actively and passively covering up evidence showing that humans coexisted with dinosaurs and that evolution is basically a hoax *100 Year Cover up Revealed We Lived With Dinosaurs* not only proves the reality of coexistence and the fallacy of evolution but also shows how the suppression of these facts has polluted our laboratories classrooms and media Finally this book highlights the scientific and educational implications of its conclusions and offers an intelligent alternative to evolution

Creation: Fact or Fiction - You Decide Howard Mishne, 2016-09-01 Finally Heres a book about Creation that you dont have to be a rocket scientist or Bible scholar to understand For most people complex biblical and scientific studies of our origin are boring They make your

head spin by the end of the first few pages That's not what this book is going to be like for you This book is for us typical people When you talk with believers of Creation some will tell you to just read the Bible Others say This can only be God's work or What else could it be Or they try to poke holes in the well known theories Creation is not a theory it's a belief You either believe it or you don't So how do you believe in something that nobody can prove In his first book Howard Mishne combines interesting and cool facts with basic science to methodically tie it all together From the universe down to the very unique aspects of our life on earth he lays out an easy to understand perspective in ways you haven't thought about before Instead of trying to answer the questions Howard lets you decide by looking at our existence in a different way

Living in a Microbial World, Second Edition Bruce Hofkin, 2017-03-02 As with the first edition this new edition of Living In A Microbial World is written for students taking a general microbiology course or a microbiology based course for non science majors The conversational style and use of practical everyday examples make the essential concepts of microbiology accessible to a wide audience While using this approach the text maintains scientific rigour with clear

explanations spanning the breadth of microbiology including health evolution ecology food production biotechnology and industrial processes Each chapter contains a series of case studies based on microbiology in the news in history and in literature There are questions at the end of each case study and the end of each chapter as well as an online quiz with help on answering the questions The text questions and cases have been updated to reflect the changing influence of microbiology in the world today from the microbiome to new disease outbreaks Ebola and Zika and antibiotic resistance to new biotechnology tools CRISPR Cas

How to Safely Tailor Your Food, Medicines, & Cosmetics to Your Genes Anne Hart, 2003-10 Your DNA including your ancient ancestry and ethnicity has a lot to do with how your body responds to food medicine illness exercise and lifestyle but just how much And how do you know which DNA kits and gene testing are reliable and recognized Learning about DNA to understand and improve your health is now interactive and available to the average consumer not limited to students and teachers but to anyone else In the last few years genealogy buffs parents and anyone interested in DNA without a science background took an interest in DNA tests tests that reveal deep maternal and paternal ancestry No science background Don't worry There's a DNA summer camp near you or an educational experience in learning about DNA now available to the average consumer Educators scientists and multimedia producers have teamed up to teach you the wonders of DNA your genes and your lifestyle It looks like it's the consumer's job to bring people together through the media and through consumer's watchdog organizations professional associations and support groups

Back to the Stone Age Ben Pitcher, 2022-12-15 Prehistoric human life is a common reference point in contemporary culture inspiring attempts to become happier healthier or better people Exploited by capitalism overwhelmed by technology and living in the shadow of environmental catastrophe we call on the prehistoric to escape the present and to model alternative ways of living our lives In *Back to the Stone Age* Ben Pitcher explores how ideas about race are tightly woven into the powerful origin stories we use to explain who we are where we came from and what we are like Using a broad range of examples from popular culture from everyday practices like lighting fires and walking in the woods to engagements with genetic technologies and Neanderthal DNA from megaliths and museum mannequins to television shows and best selling nonfiction Pitcher demonstrates how prehistory is alive in the twenty first century and argues that popular flights back in time provide revealing insights into present day anxieties obsessions and concerns *Back to the Stone Age* shows that the human past is not set in stone By opening up the prehistoric to critical contestation Pitcher places racial justice at the centre of questions about the existence and persistence of Homo sapiens in the contemporary world

Conspiracy Norma A. Wyman, 2021-04-15 Two women a generation apart in age move into a small community in southeastern Vermont The people in town are unsophisticated and kind However some have a secret that should never be revealed Neither of these two women have any knowledge of their past The older of the two Jackie Patnode is content with her day to day life and is not curious about her history The younger Carrie Franklin has no knowledge of her life before she was four years old She was a very difficult child

who could never develop relationships with other children or the adults who entered her life She still has this affliction She cannot abide being touched Carrie believes she may have lived in this town as a very small child She hopes to learn about her life there and if events there caused her to have this distrust of people She is less than candid with the townspeople about her reason for moving into their community Carrie s landlady Maggie Scranton is determined that she meet people from town especially those her own age The people Carrie meets will have a significant impact on her life both positively and negatively One person watches Carrie s every move If she learns too much about her past she will not be allowed to live 1
