the REAL world of animals began to open up I soon realized that even the most insignificant animals in our world were really superstars when compared to humans By using math we are able to truly get a comparison of animals and how they relate to our own human abilities As I began to create the problems and do the math it became very evident that I began to get the responses that I had hoped for I soon began to call these responses the Wow factor A number of times the teachers that have worked on the problems would actually go back and do the problems a second time because there has to be a mistake or no way that this can be true There were no mistakes and the math did not lie The math allowed us to look at the animals in a totally different way I hope that you too will be amazed and wowed by some of these amazing animals that we share our world with CK-12 Middle School Math Grade 6, Volume 2 Of 2 CK-12 Foundation,2012-01-27 CK 12 s Middle School Math Grade 6 covers the fundamentals of fractions decimals and geometry Also explored are units of measurement graphing concepts and strategies for utilizing the book AOs content in practical situations Volume 2 includes the last 6 chapters
