Weitz, 2021-06 A global history of human rights in a world of nations that grant rights to some while denying them to others Once dominated by vast empires the world is now divided into some 200 independent countries that proclaim human rights a transformation that suggests that nations and human rights inevitably develop together But the reality is far more problematic as Eric Weitz shows in this compelling global history of the fate of human rights in a world of nation states Through vivid histories from virtually every continent *A World Divided* describes how since the eighteenth century nationalists have established states that grant human rights to some people while excluding others setting the stage for many of today's problems from the refugee crisis to right wing nationalism Only the advance of international human rights will move us beyond a world divided between those who have rights and those who don't

The Political Economy of the Small Welfare State in South Korea Jae-jin Yang, 2017-09-28 This book explains why the Korean welfare state is underdeveloped despite successful industrialization democratization a militant labor movement and a centralized meritocracy Unlike most social science books on Korea which tend to focus on its developmental state and rapid economic development this book deals with social welfare issues and politics during the critical junctures in Korea's history industrialization in the 1960-70s the democratization and labor movement in the mid 1980s globalization and the financial crisis in the 1990s and the wind of free welfare in the 2010s It highlights the self-interested activities of Korea's enterprise unionism at variance with those of a more solidaristic industrial unionism in the European welfare states Korean big business the chaebol accommodated the unions call for higher wages and more corporate welfare which removed practical incentives for unions to demand social welfare Korea's single member district electoral rules also induce politicians to sell geographically targeted narrow benefits rather than public welfare for all while presidents are significantly constrained by unpopular tax increase issues Strong economic bureaucrats acting as veto player also lead Korea to a small welfare state

Regional Orders at Century's Dawn Etel

Solingen, 2021-05-11 Etel Solingen provides a comprehensive explanation of foreign policy based on how states throughout the world have confronted the rapid emergence of a global economy and international institutions. A major advance in international relations theory, *Regional Orders at Century's Dawn* skillfully uses a key issue, internationalization, to clarify other recent debates, from the notion of a democratic peace to the relevance of security dilemmas, nationalism, and the impact of international institutions. The author discusses in rich detail the Middle East, Latin America's Southern Cone, and the Korean peninsula, and builds on examples drawn from almost every other region of the world. As Solingen demonstrates, economic liberalization, with its dramatic political and economic consequences, invariably attracts supporters and detractors who join in coalitions to advance their agendas. Each coalition's agenda or grand strategy has consequences at all levels: domestic, regional, and international. At home, coalitions struggle to define the internal allocation and management of resources and to undermine their rivals. Throughout their regional neighborhoods, coalitions opposing internationalization often compete for dominance, sometimes militarily. Coalitions favoring internationalization instead often cooperate. At the global level, each coalition finds support for its grand strategies from different international institutions and from competing global economic trends. Solingen's concept of grand strategy proposes more than a theory of foreign policy and explains the role of nationalism and ethno-religious revivalism in the politics of liberalization.
