## **Krakatoa The Day The World Exploded Vik Csd:**

*Krakatoa* Simon Winchester, 2004-06-03 Bracingly apocalyptic stuff atmospheric chock full of information and with a constantly escalating sense of pace and tension Sunday Telegraph Simon Winchester's brilliant chronicle of the destruction of the Indonesian island of Krakatoa in 1883 charts the birth of our modern world He tells the story of the unrecognized genius who beat Darwin to the discovery of evolution of Samuel Morse his code and how rubber allowed the world to talk of Alfred Wegener the crack pot German explorer and father of geology In breathtaking detail he describes how one island and its inhabitants were blasted out of existence and how colonial society was turned upside down in a cataclysm whose echoes are still felt to this day

**Krakatoa** Simon Winchester, 2003-04-01 The bestselling author of *The Professor and the Madman* and *The Map That Changed the World* examines the enduring and world changing effects of the catastrophic eruption off the coast of Java of the earth's most dangerous volcano Krakatoa The legendary annihilation in 1883 of the volcano island of Krakatoa the name has since become a byword for a cataclysmic disaster was followed by an immense tsunami that killed nearly forty thousand people Beyond the purely physical horrors of an event that has only very recently been properly understood the eruption changed the world in more ways than could possibly be imagined Dust swirled round the planet for years causing temperatures to plummet and sunsets to turn vivid with lurid and unsettling displays of light The effects of the immense waves were felt as far away as France Barometers in Bogot and Washington D C went haywire Bodies were washed up in Zanzibar The sound of the island's destruction was heard in Australia and India and on islands thousands of miles away Most significant of all in view of today's new political climate the eruption helped to trigger in Java a wave of murderous anti Western militancy among fundamentalist Muslims one of the first outbreaks of Islamic inspired killings anywhere Simon Winchester's long experience in the world wandering as well as his knowledge of history and geology give us an entirely new perspective on this fascinating and iconic event as he brings it telling back to life

*Krakatoa* Simon Winchester, 2004

*The 1883 Eruption of Krakatoa* Charles River Editors, 2014-09-02 Includes pictures Includes accounts of the eruption Includes a bibliography for further reading In 1883 Krakatoa suddenly sprang into notoriety Insignificantly though it had hitherto seemed the little island was soon to compel by its tones of thunder the whole world to pay it instant attention It was to become the scene of a volcanic outbreak so appalling that it is destined to be remembered throughout the ages Sir Robert Ball Volcanic eruptions have amazed people for millennia and notorious ones like the eruption of Mount St Helens can still be immediately recalled even by some who weren't alive at the time but perhaps the most famous and most destructive eruption in modern history was the 1883 eruption of Krakatoa Even without the instantaneous forms of communication that are now available the world watched in wonder for new updates about a tiny South Pacific island and though few of them would ever go there Krakatoa remained a source of fascination for the much of the world for the next 50 years Krakatoa had already been the scene of volcanic activity for hundreds of years and some of the eruptions had been documented by early European

explorers in the 17th century In 1681 one Dutchman named Johann Wilhelm Vogel noted I saw with amazement that the island of Krakatoa on my first trip to Sumatra June 1679 completely green and healthy with trees lay completely burnt and barren in front of our eyes and that at four locations was throwing up large chunks of fire And when I asked the ship's Captain when the aforementioned island had erupted he told me that this had happened in May 1680 He showed me a piece of pumice as big as his fist Nonetheless nobody could have prepared for the scope of the 1883 eruption which was so violent that it destroyed most of the island of Krakatoa and could be heard about 3 000 miles away The force of the explosion was equivalent to four times the strength of the most powerful nuclear weapon ever detonated and the spread of ash and lava as well as the tsunamis generated by the force of the eruption ultimately killed at least 35 000 people and possibly over 100 000 across the Dutch East Indies With plumes of smoke rising upwards of 50 miles in the air Krakatoa's eruption influenced the entire global climate for several years and debris and corpses were still washing up on shores across the Pacific throughout that time The force was so powerful that it actually affected the height of waves in the English Channel The 1883 Eruption of Krakatoa chronicles the history of one of the world's most notorious natural disasters Along with a bibliography and pictures of important people and places you will learn about Krakatoa like never before in no time at all
