**Religious**

**Transnational Actors and Soft Power** Jeffrey Haynes, 2016-03-23 Haynes looks at religious transnational actors in the context of international relations with a focus on both security and order With renewed scholarly interest in the involvement of religion in international relations many observers and scholars have found this move unexpected because it challenges conventional wisdom about the nature and long term historical impact of secularisation The return of religion to international relations necessarily involves deprivatisation Recent challenges to international security and order emanate from various entities notably extremists people often said to be excluded from the benefits of globalisation for reasons of culture history and geography This study looks at the dynamics of this new religious pluralism as it influences the global political landscape

Several specific transnational religious actors are examined in the chapters including American Evangelical Protestants Roman Catholics the Organisation of the Islamic Conference Sunni extremist groups al Qaeda and Lashkar e Taiba and Shia transnational networks While varying widely in what they seek to achieve they also share an important characteristic each seeks to use religious soft power to advance their interests In sum these religious transnational actors all wish to see the spread and development of certain values and norms which impact on international security and order

*Cultural Economies Past and Present* Rhoda H. Halperin, 1994 When anthropologists and other students of culture want to compare different societies in such areas as the organization of land labor trade or barter they often discover that individual researchers use these concepts inconsistently and from a variety of theoretical approaches so that data from one society cannot be compared with data from another In this book Rhoda Halperin offers an analytical tool kit for studying economic processes in all societies and at all times She uniquely organizes the book around key concepts economy ecology equivalencies householding storage and time and the economy These concepts are designed to facilitate the understanding of similarities differences and changes between contemporary and past economies While this is not only a how to book or handbook it can be used as such It will be of great value to scholars and students of archaeology and history as well as to ethnographers and economists

*The Human Dilemma* Barbara Dole Larsen, 2009-12 Who has never wondered why people behave the way they do They create glorious music art and literature They have uncovered the secrets of the universe and disease yet have not been able to figure out how to get along with each other without war The Human Dilemma sets out to find out why It describes how humans evolved how their wonderful brains work and what they are like when they are born The author explores the reasons individuals grow up with different personalities depending on the societies in which they mature from hunter gatherers in Africa to industrial Americans She then turns to relationships between the sexes the temptations of power and why religious differences lead to violence The Human Dilemma explains in simple readable language how human nature customs and beliefs interfere with mankind's ability to resolve the overwhelming problems facing the world today Violent conflicts between cultures have become more volatile over the years Many believe it is man's nature to fight yet ancient civilizations like Crete were peaceful and everyone was treated equally women as well as men The same is true of two hunting gathering tribes in Africa that have followed the same way of life for thousands of years Perhaps it is just as human to cooperate peacefully in solving problems as it is to fight over them and just as human to see our fellows as equal instead of superior or inferior Why then do men regard women as inferior in so many societies And why do so many nations plunge into battle especially since the invention of nuclear bombs makes it possible to wipe out our entire species The newest peril is global warming caused by the spewing of carbon into the atmosphere from burning fossil fuels which may eventually change our climate back to the days before mankind existed Some animals have already become extinct because they cannot adjust to warmer weather Humans may not survive such a drastic change Our magnificent brains are capable of

inventing solutions to all the problems confronting us and entrepreneurs are eager to put these inventions into practice Why then don t we do it Is there some flaw in our nature that makes it easier to blame each other instead and find excuses for relieving our frustrations in warfare As the author studied the sciences for answers to her questions she became convinced that only by fully understanding our nature and the reasons why it is difficult for us to confront our problems can we hope to resolve them and continue to survive Her conclusions are found in *The Human Dilemma* An original and thought provoking book which will appeal to a very wide audience Richard Edelman Psychoanalyst In her wonderfully wide ranging exploration of human nature Barbara Larsen has distilled her research into a lucid and absolutely fascinating book Richard Edelman Psychoanalyst The writer s style is open and exploratory warmly self sharing and it is an enjoyable as well as a searching and provocative learning experience Saul L Brown Emeritus Chairman Department of Psychiatry Cedars Sinai Medical Center Los Angeles CA Larsen skillfully weaves together current theory and research from an impressive variety of sources Arthur A Dole Emeritus Professor of Education University of Pennsylvania

*The Third Side* William L. Ury,2000-09-01 According to William Ury it takes two sides to fight but a third to stop Distilling the lessons of two decades of experience in family struggles labor strikes and wars he presents a bold new strategy for stopping fights He also describes ten practical roles as managers teachers parents and citizens that each of us can play every day to prevent destructive conflict Fighting isn t an inevitable part of human nature Ury explains drawing on his training as an anthropologist and his work among primitive tribes and modern corporations We have a powerful alternative *The Third Side* which can transform our daily battles into creative conflict and cooperation at home at work and in the world
