The Invention of Terrorism in France, 1904-1939 Chris Millington, 2023-09-26 The Invention of Terrorism in France 1904-1939 investigates the political and social imaginaries of terrorism in the early twentieth century. Chris Millington traces the development of how the French conceived of terrorism from the late nineteenth century notion that terrorism was the deed of the mad anarchist bomber to the fraught political clashes of the 1930s when terrorism came to be understood as a political act perpetrated against French interests by organized international movements. Through a close analysis of a series of terrorist incidents and representations thereof in public discourse and the press, the book argues that contemporary ideas of terrorism in France as *un-French* that is contrary to the ideas and values however defined that make up Frenchness emerged in the interwar years and subsequently took root long before the terrorist campaigns of Algerian nationalists during the 1950s and 1960s. Millington conceptualizes terrorism not only as the act itself but also as a political and cultural construction of violence composed from a variety of discourses and deployed in particular circumstances by commentators, witnesses and perpetrators. In doing so, he argues that the political and cultural battles inherent to perceptions of terrorism lay bare numerous concerns, not least anxieties over immigration, antiparliamentarianism, representations of gender and the future of European peace.

Thresholds: A 'Complete' Table of the Borrowings in Yambo Ouologuem's Le Devoir de violence, and Why They Matter Christopher L. Miller,2024-06-19 Recent research has revealed that the borrowings in Yambo Ouologuem s epochal novel Le Devoir de violence Bound to Violence are far more extensive than was previously thought Accused of plagiarism Ouologuem quit the Parisian literary world and returned to a definitive silence in Mali This book attempts to provide both a complete table of the borrowings in Le Devoir de Violence and a new theory of their meaning Miller dispels the myth that the borrowings are minor negligible or criminal he argues that they are artful thresholds openings to a profound reconsideration of African history Ouologuem set up this system of borrowings as a way to invite readers down unexpected paths of meaning The borrowings are not mere stunts they are inseparable from Ouologuem s radical revision of African history and his rejection of Negritude The table of borrowings in part three of this book will serve as a resource for readers and scholars

Constructions in French Myriam Bouveret,Dominique Legallois,2012-12-19 The book Constructions in French is the first collected volume to focus on French syntax from a constructionist perspective It has been written with two kinds of readers in mind for readers interested in the relationship between the French linguistic tradition and cognitive linguistics and for readers who would like to examine how constructional analysis can be applied to a variety of French language phenomena The eleven papers illustrate the insights generated by combining lexicalist and constructionist approaches focusing on syntax as a dynamic system and using corpus data from a variety of speech genres The contributions provide new findings about French usage trends in linguistics and in psycholinguistics including insights into new nonstandard and poorly studied constructions *The Canada Gazette* Canada,1916 **The Radiance of France, new edition** Gabrielle Hecht,2009-07-31 How it happened that technological prowess and national glory or radiance which also means radiation in French became

synonymous in France as nowhere else In the aftermath of World War II as France sought a distinctive role for itself in the modern postcolonial world the nation and its leaders enthusiastically embraced large technological projects in general and nuclear power in particular The Radiance of France asks how it happened that technological prowess and national glory or radiance which also means radiation in French became synonymous in France as nowhere else To answer this question Gabrielle Hecht has forged an innovative combination of technology studies and cultural and political history in a book that as Michel Callon writes in the new foreword to this edition not only sheds new light on the role of technology in the construction of national identities but is also a seminal contribution to the history of contemporary France Proposing the concept of technopolitical regime as a way to analyze the social political cultural and technological dynamics among engineering elites unionized workers and rural communities Hecht shows how the history of France s first generation of nuclear reactors is also a history of the multiple meanings of nationalism from the postwar period and France s desire for post Vichy redemption to 1969 and the adoption of a Frenchified American design This paperback edition of Hecht s groundbreaking book includes both Callon s foreword and an afterword by the author in which she brings the story up to date and reflects on such recent developments as the 2007 French presidential election the promotion of nuclear power as the solution to climate change and France s aggressive exporting of nuclear technology
