

Language, Students with Learning Disabilities, and Students with Attention Deficit Hyperactivity Disorder

Students with learning disabilities comprise a large, if somewhat poorly defined, segment of the population of children with special needs. This chapter describes both the specific language characteristics of children with learning disabilities and the effects of these language difficulties on their academic and social performance. In addition, the language and communication difficulties of students with attention deficit hyperactivity disorder are reviewed. Although these are considered separate disorders, both children with learning disabilities and those with attention deficit disorders often have language difficulties that impact their school success. Some suggestions are provided for teaching children with language-learning disabilities.

Learning Outcomes

After reading this chapter, you should be able to:

1. Explain the difficulties in defining learning disabilities and attention deficit hyperactivity disorder.
2. Identify the major language difficulties experienced by many students with learning disabilities and those with attention deficit hyperactivity disorder and the impact of language difficulties on learning.
3. Identify appropriate instructional approaches for students with language-learning disabilities.

Keisha was observed in the classroom during a group reading lesson and during group work on a writing assignment that followed the reading lesson. When called on to read, she read very quietly. She hesitated frequently and misread a number of words. She needed a great deal of
