## **Leges Palatinae:**

**The Court as a Stage** Steven J. Gunn, A. Janse, 2006 European and English courtly culture and history reappraised through the prism of the court as theatre In the past half century court history has lost the air of frivolity that once relegated it to the margins of serious historical study and has rightfully taken a central part in the study of European states and societies in the age of personal monarchy Yet it has been approached from so many different angles and appropriated to so many different models that it can be hard to put all our new understandings together to achieve a proper perspective on the functions of the court as a whole This collection of essays uses the idea of the court as a stage for social and political interaction to re integrate different styles of court history focusing on courts in England and the Low Countries from the age of Richard II and Albert of Bavaria to that of Elizabeth I and Philip II Themes studied include the relationship between court politics and cultural change the social and political functions of court office holding the military judicial and propagandist roles of the court the economic relationships between courts and cities and the wider social and political significance of court rituals and traditions

**Medieval Manuscripts and Their Provenance** A S G Edwards, 2024-07-02 Essays about the creation circulation and collection of medieval manuscripts The essays collected here celebrate the work of Barbara Shailor the distinguished scholar of medieval manuscripts They explore various aspects of their provenance The subjects addressed range from studies of the history of individual manuscripts to the evidence afforded by the understanding of their textual traditions to the significance of the identification of fragments to the roles of individual scholars and collectors As a whole the volume contributes to a wider understanding of how the history and ownership of medieval manuscripts can be fruitfully examined a flourishing area of interest in the field

**Transforming the State** Marta VanLandingham, 2021-07-26 In the thirteenth and fourteenth centuries the Crown of Aragon was among the most active powers of the Mediterranean world This volume examines the attempt by its ruling dynasty to rationalize its court so as to expand the monarchy's ability to gather and deploy resources in support of royal ambitions Because change in medieval institutions however is based as much on exigency and personality as on political theory and program this volume also focuses on the way in which the processes of transformation functioned at a human level The book explores the quotidian operations of the various bureaus of the court as well as their social milieu paying particular attention to the correlation between programmatic ideal and reality

**The Princely Court** Malcolm Vale, 2001-12-20 In this fascinating new book Malcolm Vale sets out to recapture the splendour of the court culture of western Europe in the thirteenth and fourteenth centuries Exploring the century or so between the death of St Louis and the rise of Burgundian power in the Low Countries he illuminates a period in the history of princes and court life previously overshadowed by that of the courts of the dukes of Burgundy Taking in subjects as diverse as art patronage and gambling hunting and devotional religion Malcolm Vale rediscovers a richness and abundance of artistic literary and musical life He shows how despite the pressures of political fragmentation unrest and a nascent awareness of national

identity a common culture emerged in English French and Dutch courtsocieties at this time The result is a ground breaking re evaluation of the nature and role of the court in European history and a celebration of a forgotten age Princes of the Church David Rollason,2017-06-14 Princes of the Church brings together the latest research exploring the importance of bishops palaces for social and political history landscape history architectural history and archaeology It is the first book length study of such sites since Michael Thompson s Medieval Bishops Houses 1998 and the first work ever to adopt such a wide ranging approach to them in terms of themes and geographical and chronological range Including contributions from the late Antique period through to the eighteenth and nineteenth centuries it deals with bishops residences in England Scotland Wales the Byzantine Empire France and Italy It is structured in three sections design and function which considers how bishops palaces and houses differed from the palaces and houses of secular magnates in their layout design furnishings and functions landscape and urban context which considers the relationship between bishops palaces and houses and their political and cultural context the landscapes and towns or cities in which they were set and the parks forests and towns that were planned and designed around them and architectural form which considers the extent of shared features between bishops palaces and houses and their relationship to the houses of other Church potentates and to the houses of secular magnates **The Crime of Poison in the Middle Ages** Franck Collard,2008-09-30 This book will lead readers into a medieval culture of ambition greed and jealousy that motivated men and women to take the lives of individuals who trusted them Collard examines the perception of the crime of poisoning in the West in medieval times from about 500 to 1500 AD exploring the ways the alleged crime was perceived in contemporary minds His primary sources are chronicles that cover the entire medieval period and legal texts that are limited to the late medieval centuries In order to portray the culture of murder by poisoning in the West it was necessary to take into account Byzantine and Islamic documents as well as ancient texts such as the Scriptures and the writings of Roman historians both of which were widely known in the Middle Ages This book will lead readers into a medieval culture of ambition greed and jealousy that motivated men and women to take the lives of individuals who trusted them In these pages French medievalist Franck Collard examines the perception of the crime of poisoning in the West from about 500 to 1500 His primary sources of information are chronicles that cover the entire medieval period and legal texts that are limited to the late medieval centuries In order to portray the culture of murder by poisoning in the West he takes into account Byzantine and Islamic documents as well as ancient texts such as the Scriptures and the writings of Roman historians both of which were widely known in the Middle Ages The resulting volume is concerned with the criminal actions that involve poison and not poison as such Poisonous substances as such are described only when necessary for an understanding of a crime What is important here is an examination of the ways the alleged crime was perceived in contemporary minds Poisoning avoids the use of violence It was committed without a drawn weapon or bloodshed in a world in which wounds swords knives and clubs represented aggression and in which the flow of blood

determined the gravity of the crime. Necessarily involving preparation and secrecy it was often perpetrated treacherously during a meal, a particularly heinous act in a universe that was united by the companionship of a meal and the sociability of drinking. The special horror associated with poisoning resulted from the treachery of those close to the victim and a sudden death that prevented a final confession of sins.

*Jews, Muslims and Christians In and Around the Crown of Aragon* Harvey Hames, 2003-12-01 This volume in honour of Professor Elena Lourie focuses on various areas of interaction between Jews, Muslims and Christians in the late medieval Crown of Aragon and its environs. The articles deal with topics such as war, military campaigns, government, politics and economics, relations between scholars of the different faiths and their sources, sexual relations and the politics of conversion, mythology and music. Other articles touch on issues such as vassalage, mercenaries, fiscal politics, communal politics and the inquisition. This book presents a mosaic of studies written by three generations of scholars who, using a broad variety of sources and methodologies, examine areas of great interest to Elena Lourie.

*The Making of Polities* John Watts, 2009-05-07 This major survey of political life in late medieval Europe provides a framework for understanding the developments that shaped this turbulent period. Rather than emphasising crisis, decline, disorder or the birth of the modern state, this account centres on the mixed results of political and governmental growth across the continent. The age of the Hundred Years War, schism and revolt was also a time of rapid growth in jurisdiction, taxation and representation of spreading literacy and evolving political technique. This mixture of state formation and political convulsion lay at the heart of the making of polities. Offering a full introduction to political events and processes from the fourteenth century to the sixteenth, this book combines a broad comparative account with discussion of individual regions and states, including eastern and northern Europe alongside the more familiar west and south.

*Before Orientalism* Kim M. Phillips, 2014 Drawing on medieval accounts of the earliest European journeys to China, India, Mongolia and southeast Asia, *Before Orientalism* explores European attitudes toward Asian eating habits, sexual practices, femininities and civility, reconstructing a precolonial vision of the East that was often neutral or admiring.

*Artistic and Cultural Dialogues in the Late Medieval Mediterranean* María Marcos Cobaleda, 2020-12-16 This book analyses the artistic and cultural legacy of Western Islamic societies and their interactions with Islamic, Christian and Jewish societies in the framework of the late medieval Mediterranean from a range of multi-disciplinary perspectives. The book, organised in four parts, addresses the Andalusí legacy from its presence in the East and the West, analyses the relations and transfers between Al Andalus and the artistic productions of the Christian kingdoms of the Iberian Peninsula, explores other manifestations of the Andalusí legacy in the fields of knowledge, construction, identity and religious studies, and reconsiders ornamental transfers and exchanges in artistic manifestations between East and West.

**A History of Medieval Spain** Joseph F. O'Callaghan, 2013-04-15 Medieval Spain is brilliantly recreated in all its variety and richness in this comprehensive survey Likely to become the standard work in English the book treats the entire Iberian Peninsula and all the people who inhabited it from the coming of the Visigoths in the fifth century to the reign of Ferdinand and Isabella Integrating a wealth of information about the diverse peoples institutions religions and customs that flourished in the states that are now Spain and Portugal Joseph F O Callaghan focuses on the continuing attempts to impose political unity on the peninsula O Callaghan divides his story into five compact historical periods and discusses political social economic and cultural developments in each period By treating states together he is able to put into proper perspective the relationships among them their similarities and differences and the continuity of development from one period to the next He gives proper attention to Spain

s contacts with the rest of the medieval world but his main concern is with the events and institutions on the peninsula itself. Illustrations, genealogical charts, maps and an extensive bibliography round out a book that will be welcomed by scholars and students of Spanish and Portuguese history and literature as well as by medievalists as the fullest account to date of Spanish history in the Middle Ages. **Medieval Colonialism** Robert Ignatius Burns, 2015-03-08. This first major study of tax structure in pre-Renaissance Spain gives new insight into the condition of the conquered people of postcrusade Valencia. Drawing on tax records, it provides the reader with a fascinating glimpse of life among the thirteenth-century Mudejars. By showing the financial links between a medieval ethnic enclave and the dominant society, the author illuminates aspects of intergroup relations that have previously been neglected. This volume is the second in the author's trilogy on Muslim society in Eastern Spain. **The Antechamber** Helmut Puff, 2023-10-31. Helmut Puff invites readers to visit societies and spaces of the past through the lens of a particular temporal modality: waiting. From literature, memoirs, manuals, chronicles, visuals, and other documents, Puff presents a history of waiting anchored in antechambers, interior rooms designated and designed for people to linger. In early modern continental Western Europe, antechambers became standard in the residences of the elites. As a time-space infrastructure, these rooms shaped encounters between unequals. By imposing spatial distance and temporal delays, antechambers constituted authority, rank, and power. Puff explores both the logic and the experience of waiting in such formative spaces, showing that time divides as much as it unites and that far from what people have said about early moderns, they approached living in time with apprehensiveness. Unlike how contemporary society primarily views the temporal dimension, to early modern Europeans, time was not an objective force external to the self but something that was tied to acting in time. Divided only by walls and doors, waiters sought out occasions to improve their lot. At other times, they disrupted the scripts accorded them. Situated at the intersection of history, literature, and the history of art and architecture, this wide-ranging study demonstrates that waiting has a history that has much to tell us about social and power relations in the past and present.

**Ramon Lull** Edgar Allison Peers, 1929. **The Western Mediterranean Kingdoms** David S. H. Abulafia, David Bates, 2014-06-17. A pioneering account of the dynastic struggle between the kings of Aragon and the Angevin kings of Naples, which shaped the commercial as well as the political map of the Mediterranean and had a profound effect on the futures of Spain, France, Italy, and Sicily. David Abulafia does it full justice, reclaiming from undeserved neglect one of the formative themes in the history of the Middle Ages.

**Vienna and Versailles** Jeroen Frans Jozef Duindam, 2003-08-14. This book brings vividly to life the courtiers and servants of the imperial

court in Vienna and the royal court at Paris Versailles Drawing on a wealth of material masterfully set in a comparative context the book makes a unique contribution to the field of court studies Staff numbers costs and hierarchies daily routines and ceremonies court favourites and the nature of rulership the integrative and centripetal forces of the central courtly establishment all are seen in a long term comparative perspective that highlights both the similarities and the distinctiveness of developments in France and the Habsburg lands In the process most conventional views of each court and of court life in general are challenged and an alternative interpretation emerges Finally by relocating the household in the heart of the early modern state Vienna and Versailles forces us to rethink the process of statebuilding and the notion of absolutism
