The Conservation Movement Miles Glendinning,2013 Shortlisted for the 2014 SAHGB Alice Davis Hitchcock Medallion Certainly ancient structures have long been treated with care and reverence in many societies including classical Rome and Greece But only in modern Europe and America in the last two centuries has this care been elaborated and energised into a forceful dynamic ideology a Conservation Movement infused with a sense of historical destiny and loss that paradoxically shared many of the characteristics of Enlightenment modernity Miles Glendinning s new book authoritatively presents for the first time the entire history of architectural conservation and traces its dramatic fluctuations in ideas and popularity ending by questioning whether its recent international ascendancy can last indefinitely

Architecture and the Unconscious John Shannon Hendrix,Lorens Eyan Holm,2016-06-17 There are a number of recent texts that draw on psychoanalytic theory as an interpretative approach for understanding architecture or that use the formal and social logics of architecture for understanding the psyche But there remains work to

be done in bringing what largely amounts to a series of independent voices into a discourse that is greater than the sum of its parts in the way that say the architect Peter Eisenman was able to do with the architecture of deconstruction or that the historian Manfredo Tafuri was able to do with the Marxist critique of architecture The discourse of the present volume focuses specifically for the first time on the subject of the unconscious in relation to the design perception and understanding of architecture It brings together an international group of contributors who provide informed and varied points of view on the role of the unconscious in architectural design and theory and in doing so expand architectural theory to unexplored areas enriching architecture in relation to the humanities The book explores how architecture engages dreams desires imagination memory and emotions how architecture can appeal to a broader scope of human experience and identity Beginning by examining the historical development of the engagement of the unconscious in architectural discourse and the current and historical theoretical and practical intersections of architecture and psychoanalysis the volume also analyses the city and the urban condition

The City and the Skin Mickeal Milocco Borlini, Lelio di Loreto, Carlalberto Amadori, 2020-01-30 In this Urban Corporis volume The city and the skin we asked the authors to read define and interpret the role of the skin as a facade as a protection as a compositional image of urban revelation Without formal restrictions without ethical preconceptions the skin as part of the building designed to mediate the relationship The architectural skin understood as the technological system of delimitation between architectural space and unbuilt environment can be analyzed as a boundary system between interior and exterior the most evident expression of the identity of an artifact In this dual role of border and interface receptive as active the skin of an architecture seen also through art is charged with a double value an element of covering and protection and at the same time a tool of relationship and interface in fact towards the external world *Preparatory Architectural Investigation in the Restoration of Historical Buildings* Krista de Jonge, K. van Balen, 2002
