world stage of a new great power In this extensively illustrated book an international team of experts explores the war in all its different aspects From its causes to its consequences from the strategy of the politicians to the tactics of the generals the course of the war is charted and its political and human consequences assessed The legacy of the war to end wars in poetry and prose in collective memory and political culture is with us still eighty years after that first Armistice Day This remarkable book helps us understand that legacy

The Cambridge Illustrated History of Warfare Geoffrey Parker, 2021-08-05 The new edition of The Cambridge Illustrated History of Warfare written and updated by a team of nine distinguished military historians examines how war was waged by Western powers across a sweeping timeframe beginning with classical Greece and Rome moving through the Middle Ages and the early modern period down to the wars of the twenty first century in Afghanistan Iraq and Syria The book stresses five essential aspects of the Western way of war a combination of technology discipline and an aggressive military tradition with an extraordinary capacity to respond rapidly to challenges and to use capital rather than manpower to win Although the focus remains on the West and on the role of violence in its rise each chapter also examines the military effectiveness of its adversaries and the regions in which the West's military edge has

been and continues to be challenged *Empires of the Sky* Alexander Rose,2021-05-25 The Golden Age of Aviation is brought to life in this story of the giant Zeppelin airships that once roamed the sky a story that ended with the fiery destruction of the Hindenburg Genius a definitive tale of an incredible time when mere mortals learned to fly Keith O'Brien The New York Times At the dawn of the twentieth century when human flight was still considered an impossibility Germany's Count Ferdinand von Zeppelin vied with the Wright Brothers to build the world's first successful flying machine As the Wrights labored to invent the airplane Zeppelin fathered the remarkable airship sparking a bitter rivalry between the two types of aircraft and their innovators that would last for decades in the quest to control one of humanity's most inspiring achievements And it was the airship not the airplane that led the way In the glittery 1920s the count's brilliant protégé Hugo Eckener achieved undreamed-of feats of daring and skill including the extraordinary Round the World voyage of the Graf Zeppelin At a time when America's airplanes rickety deathtraps held together by glue screws and luck could barely make it from New York to Washington D C Eckener's airships serenely traversed oceans without a single crash fatality or injury What Charles Lindbergh almost died doing crossing the Atlantic in 1927 Eckener had effortlessly accomplished three years before the Spirit of St Louis even took off Even as the Nazis sought to exploit Zeppelins for their own nefarious purposes Eckener built his masterwork the behemoth Hindenburg a marvel of design and engineering Determined to forge an airline empire under the new flagship Eckener met his match in Juan Trippe the ruthlessly ambitious king of Pan American Airways who believed his fleet of next-generation planes would vanquish Eckener's coming airship armada It was a fight only one man and one technology could win Countering each other's moves on the global chessboard each seeking to wrest the advantage from his rival the struggle for mastery of the air was a clash not only of technologies but of business diplomacy politics personalities and the two men's vastly different dreams of the future *Empires of the Sky* is the sweeping untold tale of the duel that transfixed the world and helped create our modern age **Haunted Histories in America** Nancy

Hendricks,2020-10-06 If you believe in ghosts you're in good company *Haunted Histories* brings America's most ghostly locales to life illuminating their role in shaping U S history and detailing how they became the nation's most feared places *Haunted Histories* takes readers on a state-by-state journey across the United States exploring the nation's most feared places Along the way the text introduces readers to new ghostly tales and takes a fresh look at familiar stories and locations with an eye to history From well-known spooky spots like Salem Massachusetts to such lesser-known ones as the Shanghai Tunnels of Portland Oregon where spirits are supposedly trapped readers will discover not only where America's most haunted places are but also why they are said to be haunted The ghosts of the doomed Donner Party allow readers to experience the arduous and often deadly journey of America's westward wagon trains while different kinds of spirits haunting old distilleries allow readers to discover how whiskey almost derailed the new American nation before it was born This book can be studied for academic purposes as a historical reference used as a source for classroom assignments or

Newton-Matza,2014-03-26 From the Salem Witch Trials of 1692 to the Sandy Hook school massacre of 2012 this two volume encyclopedia surveys tragic events natural and man made famous and forgotten that helped shape American history

Tragedies and disasters have always been part of the fabric of American history Some gave rise to reactions that profoundly influenced the nation Others dominated public consciousness for a moment then disappeared from collective memory

Organized chronologically Disasters and Tragic Events examines these moments covering both the familiar and the obscure and probing their immediate and long term effects Unlike other works that concentrate on a particular type of disaster for example weather or medicine related tragedies this two volume encyclopedia has no such limits Its entries range from natural disasters such as hurricanes and tornadoes to civic disturbances environmental disasters epidemics and medical errors transportation accidents and more The work is a perfect supplement for history classes and will also prove of great interest to the general reader

The Age of Catastrophe John David Ebert,2012-09-13

Disasters both natural and man made are on the rise Indeed a catastrophe of one sort or another seems always to be unfolding somewhere on the planet We have entered into a veritable Age of Catastrophes which have grown both larger and more complex and now routinely very widespread in scope The old days of the geographically isolated industrial accidents of the sinking of a Titanic or the explosion of a Hindenburg together with their isolated causes and limited effects are over Now disasters on the scale of Hurricane Katrina the BP oil spill or the Japan tsunami and nuclear reactor accident threaten to engulf large swaths of civilization This book analyzes the efforts of Westerners to keep the catastrophes outside while maintaining order on the inside of society These efforts are breaking down Nature and Civilization have become so intertwined they can no longer be separated Natural disasters moreover are becoming increasingly more difficult to differentiate from man made Instructors considering this book for use in a course may request an examination copy here

during the First World War convincing governments and public alike that they had a role in peacetime proved far more challenging The Americans as inventors of heavier than air powered flight had briefly courted with a passenger airline across Tampa Bay in 1914 yet it took a further nine years for mail to be flown coast to coast In 1919 a British company made the first international scheduled flight between London and Paris but the continuation of regular services was thwarted by a less than enthusiastic government that allowed its generously subsidised French competition for a short time at least to fly cross Channel passenger schedules unimpeded The British eventually realized that fast links with their Empire were vital followed the example of the French and Dutch who had forged air links with their cousins in North Africa and the Far East Meanwhile in South America the Germans forbidden under the Versailles Treaty from any major aircraft building were establishing cunning supremacy by forming airlines throughout South America and in China While America awaited a transcontinental passenger service Juan Trippe's Pan American Airways was crossing swords with Ralph O'Neill of New York Rio Buenos Aires Line NYRBA for air supremacy between the US Brazil Argentina and elsewhere in Latin America that led to the formation of arguably the world's greatest airline In Russia Igor Sikorsky had built a vast passenger carrying aircraft the Il ya Muromets and politicians debated whether giant airships or fixed wing aircraft should rule the skies an issue that was put firmly to bed when the mighty German airship Hindenburg exploded while mooring at Lakehurst in 1937 Robert Bluffield's highly researched and detailed account tells the dramatic stories of explorers such as Kingsford Smith Lindbergh and Cobham and flamboyant entrepreneurs some well known others forgotten who risked fortunes and reputations to follow their dreams of reaching and ruling the skies over empires continents and oceans Against bewildering adversity corruption underhanded deals and dwindling resources these tenacious individuals braved the elements using primitive entirely unsuitable equipment to establish earth shrinking aerial services that criss crossed the great oceans and the globe's most inhospitable territories These are the stories of those pioneers of A ropostale CNAC Air Orient Imperial Airways KLM Deutsche Luft Hansa Pan Am SCADTA The Condor Syndicat Qantas and others that had a far reaching impact on the way the modern world would travel

Transports of Delight Peter Hancock, 2017-05-11 This inspiring book shows how the spiritual side of life with its thoughts feelings and aspirations is intimately bound up with our material technologies From the wonder of Gothic Cathedrals to the quiet majesty of lighter than air flight to the ultimate in luxury of the north Atlantic steamers Peter Hancock explores how these sequential heights of technology have enabled our dreams of being transported to new and uncharted realms to become reality Sometimes literally sometimes figuratively technology has always been there to make material the visions of our imagination This book shows how this has essentially been true for all technologies from Stonehenge to space station But technology is far from perfect Indeed the author argues here that some of the most public and tragic of its failures still remain instructive emblematic and even inspiring He reports on examples such as a Cathedral of the Earth Beauvais a Cathedral of the Seas Titanic and a Cathedral of the Air Hindenburg and tells their stories from the viewpoint of material

transcendence By interweaving their stories he reveals how technologies can succeed in elevating human beings and in taking them to whole new realms of being he explores and explains why these experiences are Transports of Delight
