Hiroshima Diary Journal Of A Japanese:

Hiroshima Diary Michihiko Hachiya M.D.,2011-12-01 The late Dr Michihiko Hachiya was director of the Hiroshima Communications Hospital when the world s first atomic bomb was dropped on the city Though his responsibilities in the appalling chaos of a devastated city were awesome he found time to record the story daily with compassion and tenderness His compelling diary was originally published by the UNC Press in 1955 with the help of Dr Warner Wells of the University of North Carolina at Chapel Hill who was a surgical consultant to the Atomic Bomb Casualty Commission and who became a friend of Dr Hachiya In a new foreword John Dower reflects on the enduring importance of the diary fifty years after the bombing *Hiroshima Diary, the Journal of a Japanese Physician, August 6-September 30, 1945, by Michihiko Hachiya,...*

Harper-Scott,2018-09-06 This thematic examination of Britten s operas focuses on the way that ideology is presented on stage To watch or listen is to engage with a vivid artistic testament to the ideological world of mid twentieth century Britain But it is more than that too because in many ways Britten s operas continue to proffer a diagnosis of certain unresolved problems in our own time Only rarely as in Peter Grimes which shows the violence inherent in all forms of social and psychological identification does Britten unmistakably call into question fundamental precepts of his contemporary ideology This has not however prevented some writers from romanticizing Britten as a quiet revolutionary This book argues in contrast that his operas and some interpretations of them have obscured a greater social and philosophical complicity that it is timely if at the same time uncomfortable for his early twenty first century audiences to address *The Atomic Bomb in Japanese Cinema* Matthew Edwards,2018-07-24 Seventy years after the nuclear attacks on Hiroshima and Nagasaki Japan is still dealing with the effects of the bombings on the national psyche From the Occupation Period to the present Japanese cinema had offered a means of coming to terms with one of the most controversial events of the 20th century From the monster movies Gojira 1954 and Mothra 1961 to experimental works like Go Shibata s NN 891102 1999 atomic bomb imagery features in all genres of Japanese film This collection of new essays explores the cultural aftermath of the bombings and its expression in Japanese cinema The contributors take on a number of complex issues including the suffering of the survivors hibakusha the fear of future holocausts and the danger of nuclear warfare Exclusive interviews with Go Shibata and critically acclaimed directors Roger Spottiswoode Hiroshima and Steven Okazaki White Light Black Rain are included War and State Terrorism Mark

Selden, Alvin Y. So, 2004-10-26 If the past hundred years will be remembered as a century of war Asia is surely central to that story Tracing the course of conflicts throughout the region this groundbreaking volume is the first to explore systematically the nexus of war and state terrorism Challenging states definitions of terrorism which routinely exclude their own behavior the book focuses especially on the nature of Japanese and American wars and crimes of war The authors also assess significant acts of terror instigated by other Asian nations including China Cambodia and Indonesia Offering a rare comparative perspective the authors consider how state terror leads to massive civilian casualties crimes of war and crimes against humanity In counterbalance they discuss anti war and anti nuclear movements and international efforts to protect human rights and the interwoven issues of responsibility impunity and memory Interdisciplinary and deeply informed by global perspectives this volume will resonate with readers searching for a deeper understanding of an epoch that has been dominated by war and terror Rethinking the Theatre of the Absurd Carl Lavery, Clare Finburgh Delijani, 2015-11-05

Rethinking the Theatre of the Absurd is an innovative collection of essays written by leading scholars in the fields of theatre performance and eco criticism which reconfigures absurdist theatre through the optics of ecology and environment As well as offering strikingly new interpretations of the work of canonical playwrights such as Beckett Genet Ionesco Adamov Albee Kafka Pinter Shepard and Churchill the book playfully mimics the structure of Martin Esslin s classic text The Theatre of the Absurd which is commonly recognised as one of the most important scholarly publications of the 20th century By reading absurdist drama for the first time as an emergent form of ecological theatre Rethinking the Theatre of the Absurd interrogates afresh the very meaning of absurdism for 21st century audiences while at the same time making a significant contribution to the development of theatre and performance studies as a whole The collection s interdisciplinary approach accessibility and ecological focus will appeal to students and academics in a number of different fields including theatre performance English French geography and philosophy It will also have a major impact on the new cross disciplinary paradigm of eco criticism **Nuclear Weapons and Scientific Responsibility** C.G. Weeramantry, 2021-10-11

Several years ago when this work first appeared it had become apparent that scientists who play such a key role in the nuclear enterprise needed to be alerted to the many questions of conscience and legality that were inextricably interlinked with their work These questions lay at the heart of the nuclear weapons problem for whatever the political and military leaders might ordain the manufacture of such weapons was a plain impossibility without the active assistance of the scientific profession Yet no substantive work on this topic had until then been attempted Such a work appeared at that time to be an urgent and important need If the problem was then acute and serious it is even more so now The power of nuclear science has grown and with it has grown the power of the individual scientist to initiate new developments The changes in the world order that have occurred in the intervening years enable individual scientists to hold themselves out as available for employment Those who seek their expertise may include not only governments but other entities as well The power of global destruction that

these scientists command renders it imperative that they be alerted on a continuing basis to the problems of conscience that arise Hence the need for a re issue of this work for which there had been many requests from concerned scientists professional groups socially concerned organisations and also from lawyers The book is re issued in its original form but updated by the inclusion of more recent work as contained in extracts from three judicial opinions upon the matter

Food and War in Mid-Twentieth-Century East Asia Katarzyna J. Cwiertka, 2016-04-15 War has been both an agent of destruction and a catalyst for innovation These two at first sight contradictory yet mutually constitutive outcomes of war waging are particularly pronounced in twentieth century Asia While 1945 marked the beginning of peaceful recovery for Europe military conflicts continued to play a critical role in the historical development of this part of the world In essence all wars in twentieth century Asia stemmed from the political vacuum that developed after the fall of the Japanese Wartime Empire intricately connecting one region with another Yet they have had often very diverse consequences shattering the homes of some and bringing about affluence to others Disarray of war may halt economic activities and render many aspects of life insignificant The need for food however cannot be ignored and the social action that it requires continues in all circumstances This book documents the effects of war on the lives of ordinary people through the investigation of a variety of connections that developed between war waging and the production distribution preparation and consumption of food throughout Asia since the 1930s The topics addressed range from issues at stake at the time of the conflicts such as provisioning the troops and food rationing and food relief for civilians to long term often surprising consequences of war waging and wartime mobilization of resources on the food systems diets and tastes of the societies involved The main argument of this volume is that war has not been a mere disruption but rather a central force in the social and cultural trajectories of twentieth century Asia Due to its close connection with human nourishment and comfort food stands central in the life of the individual On the other hand owing to its connection with profit and power food plays a critical role in the social and economic organization of a society What happens to food and eating is therefore an important index of change a privileged basis for the exploration of historical processes

War Stories Philip Dwyer, 2016-11-01 Although war memoirs constitute a rich varied literary form they are often dismissed by historians as unreliable This collection of essays is one of the first to explore the modern war memoir revealing the genre s surprising capacity for breadth and sophistication while remaining sensitive to the challenges it poses for scholars Covering conflicts from the Napoleonic era to today the studies gathered here consider how memoirs have been used to transmit particular views of war even as they have emerged within specific social and political contexts

Bombing to Win Robert A. Pape, 2014-04-11 From Iraq to Bosnia to North Korea the first question in American foreign policy debates is increasingly Can air power alone do the job Robert A Pape provides a systematic answer Analyzing the results of over thirty air campaigns including a detailed reconstruction of the Gulf War he argues that the key to success is attacking the enemy's military strategy not its economy people or leaders Coercive air power can succeed but not as cheaply as air enthusiasts would like to believe Pape examines the air raids on Germany Japan Korea Vietnam and Iraq as well as those of Israel versus Egypt providing details of bombing and governmental decision making His detailed narratives of the strategic effectiveness of bombing range from the classical cases of World War II to an extraordinary reconstruction of airpower use in the Gulf War based on recently declassified documents In this now classic work of the theory and practice of airpower and its political effects Robert A Pape helps military strategists and policy makers judge the purpose of various air strategies and helps general readers understand the policy debates *The Story of World War II* Henry Steele Commager, Donald L. Miller, 2010-05-11 Drawing on previously unpublished eyewitness accounts prizewinning historian Donald L Miller has written what critics are calling one of the most powerful accounts of warfare ever published Here are the horror and heroism of World War II in the words of the men who fought it the journalists who covered it and the civilians who were caught in its fury Miller gives us an up close deeply personal view of a war that was more savagely fought and whose outcome was in

greater doubt than readers might imagine This is the war that Americans at the home front would have read about had they had access to the previously censored testimony of the soldiers on which Miller builds his gripping narrative Miller covers the entire war on land at sea and in the air and provides new coverage of the brutal island fighting in the Pacific the bomber war over Europe the liberation of the death camps and the contributions of African Americans and other minorities He concludes with a suspenseful never before told story of the atomic bombing of Nagasaki based on interviews with the men who flew the mission that ended the war [Effects of the Accident at the Chernobyl Nuclear Powerplant](#) United States.
