## **His Only Hope A Child's View Of Organ Donation:**

**His Only Hope** Tony Huesman,1998 Explains organ donation to primary school level children Each page has 25 sentences with a colour drawing **Playing Through the Rough** James B. Cash,2000-12 **Children's Books in Print** R R Bowker Publishing,Bowker,1999-12 Organ Donation in Japan , Maria-Keiko Yasuoka,2015-04-16 Organ Donation in Japan A Medical Anthropological Study by Maria Keiko Yasuoka reveals insight into Japan as the country with the most severe organ shortages and the lowest numbers of organ donations among medically advanced countries The history of organ transplantation in Japan is a unique and troubled one Many academic hypotheses such as cultural barriers the Japanese concept of the dead body traditional beliefs and so on have been advanced to explain the situation However little research has yet revealed the truth behind the world of Japanese organ transplantation Yasuoka conducts direct interview research with Japanese concerned parties in regards to organ transplantation including transplant surgeons recipients and donor families In this book she analyzes their narrative responses considering their distinctive ideas interpretations and dilemmas and sheds light on the real reasons behind the issues Organ Donation in Japan is the first book to delve into the challenging and taboo Japanese concepts of life and death surrounding organ transplantation by thoroughly presenting and investigating the narratives of concerned parties The Story of a Heart Rachel Clarke,2024-09-10 One summer day nine year old Keira Ball was in a terrible car accident and suffered catastrophic brain injuries As the rest of her body began to shut down her heart continued to beat In an act of extraordinary generosity Keira's parents and siblings immediately agreed that she would have wanted to be an organ donor Meanwhile nine year old Max Johnson had been in a hospital for nearly a year valiantly fighting the virus that was causing his young heart to fail When Max's parents received the call they had been hoping for they knew it came at a terrible cost to another family in what Clarke calls the brutal arithmetic of transplant surgery The act of Keira's heart resuming its rhythm inside Max's body was a medical miracle But this was only part of the story While waiting on the transplant list Max had become the hopeful face of a campaign to change the UK's laws around organ donation Following his successful surgery Keira's mother saw the little boy beaming on the front page of the newspaper and knew it was the same boy whose parents had recently sent her an anonymous letter overflowing with gratitude for her daughter's heart The two mothers began to exchange messages and eventually decided to meet **Organ and Tissue Transplantation in the European Union** Yvon Englert,2023-10-20 These past years the media have focused public attention on malpractice in the field of organ donation with the risk of forgetting that organ donation provides an extraordinary hope of saving lives and gives a splendid example of human solidarity Transplantation was made possible by the development of scientific and medical knowledge together with the dedication of skilled teams throughout Europe The shortage of organs and tissue is the key factor for all the problems within the system the size of the European Union will help to deal with this reality and requires the cooperation of medical teams dispatching organisms and public health authorities at

the European level The transparency of a faultless organization from the technical and ethical points of view will increase the public s support of organ donation and decrease organ shortage The development of the European Union resulting in free movement within the international market makes harmonisation of the donation system unavoidable From the Introduction by Magda de Galan Belgian Minister of Health

New York Magazine ,1983-07-18 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine s consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea

**Organ and Tissue Transplantation** David Price,2017-05-15 Organ transplantation has been one of the miracles of modern day medicine but in addition to presenting enormous technical and clinical challenges it throws up major ethical and legal issues principally from the perspective of the donor Evolving capabilities in the spheres of both organ and tissue transplantation coupled with rapidly escalating demand assert consistent and critical pressure on our ethical and legal principles and frameworks including the expansion of the potential donor pool beyond the conventional categories of donor This volume brings together seminal papers analyzing such matters in the context of an ever increasingly important area of clinical practice

**The Heart of a Warrior: a Mom's Journey of Faith and Hope** , *Nursing Ethics* Janie B. Butts,Karen L. Rich,2016 Nursing ethics across the curriculum and into practice fourth edition prepares students and professionals for the moral issues encountered in nursing practice Healthcare ethics is constantly evolving to keep pace with new issues as they arise as well as new policies and laws The fourth edition has been completely revised to reflect the evolution of nursing ethics within health care Updated case studies research and legal

perspectives as well as the 2015 American Nurses Association's Code of ethics offer students and practitioners a wealth of current knowledge Page 4 de la couverture

**Strange Harvest** Lesley A. Sharp, 2006-10-04 Illuminates the wondrous yet disquieting medical realm of organ transplantation by drawing on the voices of those most deeply involved transplant recipients clinical specialists and the surviving kin of deceased organ donors This ethnographic study explores how these parties think about death loss and mourning

**Taking Sides** Carol Levine, 1989 *The National Reformer*, 1867

**The Best Interests of the Child in Healthcare** Sarah Elliston, 2007-11-06 Setting the scene Best interests and consent Refusal of consent Withholding and withdrawing treatment from infants and young children Medical research and innovative treatment Best interests between children donation of tissues and organs and conjoined twins [Children, Families, and Health Care Decision Making](#) Lainie Friedman Ross, 2002 ISSUES IN BIOMEDICAL ETHICS General Editors John Harris University of Manchester Soren Holm University of Manchester Consulting Editor Ranaan Gillon Director Imperial College Health Service London North American Consulting Editor Bonnie Steinbock Professor of Philosophy SUNY Albany The late twentieth century has witnessed dramatic technological developments in biomedical science and the delivery of health care and these developments have brought with them important social changes All too often ethical analysis has lagged behind these changes The purpose of this series is to provide lively up to date and authoritative studies for the increasingly large and diverse readership concerned with issues in biomedical ethics not just health care trainees and professionals but also social scientists philosophers lawyers social workers and legislators The series will feature both single author and multi author books short and accessible enough to be widely read each of them focused on an issue of outstanding current importance and interest Philosophers doctors and lawyers from several countries already feature among the contributors to the series It promises to become the leading channel for the best original work in this burgeoning field this book Lainie Friedman Ross presents an original and controversial examination of the moral principles that guide parents in making health care decisions for their children and the role of children in the decision making process She opposes the current movement to increase child autonomy in favour of respect for family autonomy She argues that children should be included in the decision making process but that parents should be responsible for their children's health care even after the children have achieved some threshold level of competency The first half of the book presents and defends a model of decision making for children's health care the second half shows how it works in various practical contexts considering children as research subjects and as patients organ donorship and issues relating to adolescent sexuality Implementation of Ross's model would result in significant changes in what informed consent allows and requires for paediatric health care decisions This is the first systematic medical ethics book that focuses specifically on children's health care It has important things to say to health care providers who work with children as well as to ethicists and public policy analysts

**Oxford Textbook of Palliative Care for Children** Richard Hain, Ann Goldman, Adam Rapoport, Michelle Meiring, 2021 Comprehensive in scope exhaustive in

detail and definitive in authority this third edition has been thoroughly updated to cover new practices current epidemiological data and the evolving models that support the delivery of palliative medicine to children This book is an essential resource for anyone who works with children worldwide Patients' Rights Amnon Carmi, Harry Wax, 2002

*Suffering and the Beneficent Community* Erich H. Loewy, 1991-09-27 This book grounds ethics in the capacity for suffering shared by all sentient beings and sees the avoidance and amelioration of suffering as the prima facie condition of moral interaction Loewy sees social contract as originating in the original nurturing of individuals and selfhood and autonomy as emerging in the embrace of beneficence Communities thus have an implicit obligation to their members which necessitates a just distribution of resources
