Radermecker,2021-05-25 Working with a data set accounting for 13 000 auction sales results Anne Sophie V Radermecker explores what contemporary buyers value when purchasing paintings of unknown or uncertain authorship and which variables influence price formation mechanisms in this market segment The principle finding of this book is not only that historical names matter in the art market but so do all other alternative identification strategies that art market players use to label anonymous paintings Indirect names provisional names and spatiotemporal designations function as substitutes for real names that simulate identities create ex post stories around the artworks offered for sale and consequently reduce information asymmetry about an artist s identity with at time quite unexpected effects on price **The Economics of American Art** Robert B. Ekelund Jr.,John D. Jackson,Robert D. Tollison,2017-07-03 The rapidly changing and evolving art market might appear to be chaotic to the casual observer with new highs potential lows and tastes and fashions changing season to season Economists however view the actions of buyers and sellers as constituting an identifiable market They have for some decades studied such issues as artistic productivity and death effects on prices investment returns and on the basis of the behavior and estimated prices in auction markets The Economics of American Art analyzes the most pervasive economic issues facing the art world applied to the whole spectrum of American art The book begins by looking at how a market for American art developed how the politics of the post war era shaped at least in large part the direction of American art and how this legacy continues into contemporary

art today The book then tackles several salient integral questions animating the American art world Are age and type of artist i e traditional or innovative related and if so how might they be related to productivity Is investment in American art a remunerative endeavor compared to other investment possibilities Do economic insights provide understanding of fakes fraud and theft of art particularly American art and is it possible to prevent art crime Is there is a boom or a bust in the market for contemporary American art as might be found in other markets The ongoing evolution of American art is attended by a massive number of influences and the economic concepts employed in this volume will complement other critical and important cultural studies of art Both practical and accessible The Economics of American Art will be essential for collectors auction houses American art experts of all kinds museums gallery owners and not least by economists with continuing scholarly interests in these matters

Painting the Inhabited Landscape Margaretta M. Lovell,2023-03-27 The impulse in much nineteenth century American painting and culture was to describe nature as a wilderness on which the young nation might freely inscribe its future the United States as a virgin land that is unploughed unfenced and unpainted Insofar as it exhibited evidence of a past its traces pointed to a geologic or cosmic past not a human one The work of the New England artist Fitz H Lane however was decidedly different In this important study Margaretta Markle Lovell singles out the more modestly scaled explicitly inhabited landscapes of Fitz H Lane and investigates the patrons who supported his career with an eye to understanding how New Englanders thought about their land their economy their history and their links with widely disparate global communities Lane s works depict nature as productive and allied in partnership with humans to create a sustainable balanced political economy What emerges from this close look at Lane s New England is a picture not of a virgin wilderness but of a land deeply resonant with its former uses and a human history that incorporates rather than excludes Native Americans as shapers of land and as agents in that history Calling attention to unexplored dimensions of nineteenth century painting Painting the Inhabited Landscape is a major intervention in the scholarship on American art of the period examining how that body of work commented on American culture and informs our

understanding of canon formation **Handbook of the Economics of Art and Culture** Victor A. Ginsburgh, David Throsby, 2006-09-13 Over the last 30 or 40 years a substantial literature has grown up in which the tools of economic theory and analysis have been applied to problems in the arts and culture Economists who have surveyed the field generally locate the origins of contemporary cultural economics as being in 1966 the year of publication of the first major work in modern times dedicated specifically to the economics of the arts It was a book by Baumol and Bowen which showed that economic analysis could illuminate the supply of and demand for artistic services the contribution of the arts sector to the economy and the role of public policy Following the appearance of the Baumol and Bowen work interest in the economics of the arts grew steadily embracing areas such as demand for the arts the economic functions of artists the role of the nonprofit sector and other areas Cultural economics also expanded to include the cultural or entertainment industries the media movies the publishing industry popular music as well as heritage and museum management property right questions in particular copyright and the role of new communication technologies such as the internet The field is therefore located at the crossroads of several disciplines economics and management but also art history art philosophy sociology and law The Handbook is placed firmly in economics but it also builds bridges across these various disciplines and will thus be of interest to researchers in all these different fields as well as to those who are engaged in cultural policy issues and the role of culture in the development of our societies Presents an overview of the history of art markets Addresses the value of art and consumer behavior toward acquiring art Examines the effect of art on economies of developed and developing countries around the world Hislop's Art Sales Index 2007 Duncan Hislop, 2006-10-01 Covering auction sales from August 2005 through July 2006 this title contains over 155 000 listings by almost 40 000 artists **Ulrich's International Periodicals Directory** Carolyn Farquhar Ulrich, 1988 Art Libraries Journal , 2007 Auction Prices of American Artists Art Sales Index Ltd, 1978 *The Handbook of Personal Wealth Management* Jonathan Reuvid, 2006 This important guide now fully updated for a second edition and once again endorsed by the Institute of Directors has been written for high earners and wealthy individuals who are looking to maximise returns on their capital and protect their accumulated wealth It offers authoritative and jargon free advice to how to structure personal and business related finances as well as providing an accessible overview of current financial products It includes details on strategies for sound wealth management as well as offering a full examination of the available securities and financial products including alternative investments and self managed investments It also reviews the more proactive alternatives of starting a business or becoming a business angel
