Shapiro, 2002-10-03 This book examines how France's revolutionary authorities handled political opposition in the year following the fall of the Bastille Though demands for more severe treatment of the enemies of the new regime were frequently and loudly expressed and though portents and warning signs of the coming unwillingness to tolerate opposition were hardly lacking political justice in 1789-90 was in fact characterized by a remarkable degree of indulgence and forbearance Through an investigation of the judicial affairs which attracted the most public attention in Paris during this period this study seeks to identify the factors which produced a temporary victory for policies of mildness and restraint

Politics in the Marketplace Katie L. Jarvis, 2019 Politics in the Marketplace integrates politics economics and gender to ask how the Dames des Halles invented notions of citizenship through everyday trade during the French Revolution While analyzing how marketplace actors shaped nascent democracy and capitalism it challenges the interpretation that revolutionary citizenship was inherently masculine from the outset *Music and Ceremony at Notre Dame of Paris,*

Department of Printed Books,1903 The Artisan and the European Town, 1500-1900 Geoffrey Crossick,2016-12-05 Artisans played a central role in the European town as it developed from the Middle Ages onwards Their workshops were at the heart of productive activity their guilds were often central to the political and legal order of towns and their culture helped shape civic ritual and the urban order These essays which have all been specially written for this collection explore the relationships between artisans and their towns across Europe between the beginning of the early modern period and the end of the 19th century They pay special attention to the processes of economic juridical and political change that have made the 18th and early 19th centuries a period of such significance Written by leading historians of European artisans the essays question the myths about artisans that have long pervaded research in the field The leading myth was that shared by the artisans themselves the myth of decline and the belief in each generation that artisans in the past had inhabited a better age These essays open up for debate the nature of artisanship the way economic change affected craft production the political role of artisans the cultural identification of the artisans with work and masculinity and the way changing urban society and changing urban structure posed threats to which the artisans had to respond
