Histoire Des Chemins De Fer En France:

, *Politics of Transport in Twentieth-Century France* Joseph Jones, 1984-07-01 Joseph Jones's study focuses on the period since World War I. In these years the stability of the transport world was shaken by the effect of automobile competition upon the railways near monopoly. A republican tradition based on fear of monopoly and protection of local facilities had emerged in the era when rail was king. In the 1930s and 1940s transport policy became a tug of war between supporters of this tradition and those who felt that a new approach was needed to cope with competition, economic depression and war. Legislative proposals led to heated discussion as railway companies, car manufacturers, truckers, oil companies, small business, local authorities and trade unions fought to defend their interests. Dr Jones's study of these conflicts based upon extensive archival research illustrates the tension between state planning, economic liberalism which has been the central issue in economic policy in twentieth century France.

People and Politics in France, 1848-1870 Roger Price, 2004-06-17 This 2004 book is about politicisation and political choice in the aftermath of the February Revolution of 1848 and the emergence of democracy in France. The introduction of male suffrage both encouraged expectations of social transformation and aroused intense fear. In these circumstances the election of Louis Napoleon Bonaparte as President of the Republic and his subsequent coup d'état were the essential features of a counter-revolutionary process which involved the creation of a system of democracy as the basis of regime legitimacy and as a prelude to greater liberalisation. The state positively encouraged the act of voting. But what did it mean? How did people perceive politics? How did communities and groups participate in political activity? These and many other questions concern the relationships between local issues and personalities and the national political culture, all of which impinged on communities increasingly as a result of substantial social and political change.

The Great Train Race Allan Mitchell, 2006-03-01 From their origins railways produced an intense competition between the two major continental systems in France and Germany. Fitting a new technology into existing political institutions and social habits, these two nations became inexorably involved in industrial and commercial rivalry that eventually escalated into the armed conflict of 1914. Based on many years of research in French and German archives, this study examines the adaptation of railroads and steam engines from Britain to the continent of Europe after the Napoleonic age. A fascinating example of how the same technology borrowed at the same time from the same source was assimilated differently by the two continental powers, this book offers a groundbreaking analysis of the crossroads of technology and politics during the first Industrial Revolution.

The Emergence of Modern Business Enterprise in France, 1800-1930 Michael Stephen Smith, 2006 In this magisterial study Michael Smith explains how France left behind small scale merchant capitalism for the large corporate enterprises that would eventually dominate its domestic economy and project French influence throughout the world. Arguing against the long standing view that French economic and business development was crippled by missed opportunities and entrepreneurial failures, Smith presents a story of considerable

achievement French companies made major contributions to the Second Industrial Revolution of 1880 1930 especially in ferrous and non ferrous metallurgy electrochemicals industrial gases and motor vehicles Rejecting the notion that France took a separate route to economic modernity Smith argues that it tracked other industrial nations along a path dominated by large scale production and corporate enterprise Technological and organizational capabilities acquired by French companies prior to 1930 played a key role in the country s rapid economic recovery after World War II and its broader economic success in the second half of the twentieth century Smith also addresses the distinctive characteristics of French economic and business development including the pivotal role of the French state the pervasive influence of French financiers and the significance of labor conflict This superb account is an invaluable contribution to business history and the history of modern France **Les premiers temps du chemin de fer à Cholet** Adrienna Surot,2004 Decisive Years in France, 1840-1847
