Mme de Staël and Political Liberalism in France Chinatsu Takeda, 2018-07-31 This book sheds light on the unique aspects of communal liberalism in Mme de Staël's writings and considers her contribution to nineteenth century French liberal political thought Focusing notably on the *Considérations sur les principaux événements de la Révolution française* it examines the originality of Staël's liberal philosophy Rather than contrasting liberalism with either multiculturalism or republicanism the book argues that Staël's communal liberalism challenges the conventions of nineteenth century political thought notably through her assertion of the need to institutionalize an organic intermediary connecting the two spheres an idea later advanced by thinkers such as Jürgen Habermas Offering a critical reappraisal of Staël's multifaceted work this book assesses the political impact of her work arguing that the political influence of the *Considérations* permeates the liberal historiography of the French Revolution up to the present day

French Historians in the Nineteenth Century F.L. van Holthoorn, 2019-05-22 This study is a reflection on the major historians of nineteenth century France and shows that near the end of the century a major change of perspective occurred The historians discussed in the opening sections of the book looked to the past for guidance while modern historians from the twentieth century onwards regard the past as a closed book which the historian has to open Guizot is the hero of the first section of the book in part two Comtesse d'Agoult Daniel Stern is specifically mentioned partly because she who wrote a splendid history of the revolution of 1848 tends to be ignored as a historian while Michelet and Tocqueville are still discussed The historians in

part three are transitional figures who politically and morally still belong to the nineteenth century but whose histories show the new approach to the past

The International Cyclopedia Harry Thurston Peck, 1898

The Making of the Citizen-Worker Federico Tomasello, 2023-07-31

Over the course of the 19th century European societies started thinking of themselves as civilisations of work. In the wake of the political and industrial revolutions, labour as a human activity and condition gradually came to embody a general principle of order, progress and governance. How did work become so central to our systems of citizenship and social recognition? The book addresses this question by considering the French context in the long transition between the 1789 and 1848 revolutions and focusing on a specific fragment of history in the early 1830s, marked by a pandemic crisis and the first consequences of industrialisation. It combines the analysis of both political institutions and social movements to retrace the rise of a labour-based social contract revolving around the citizen worker as the quintessential subject of rights. The first part of the book highlights the role played by the genesis of the modern social sciences and analyses it as a political process that established work as an object of governance and scientific investigation, thus fostering pioneering measures of welfare centred on work conditions. The second part focuses on the emergence of the concept of working class and the modern labour movement which structured the world of work as a collective political subject.
