Histoire Economique Et Populaire Du Moyen Age:

Making Money in Sixteenth-Century France Jotham Parsons, 2015-02-06 Coinage and currency abstract and socially created units of value and power were basic to early modern society By controlling money the people sought to understand and control their complex expanding and interdependent world In *Making Money in Sixteenth Century France* Jotham Parsons investigates the creation and circulation of currency in France The royal Cour des Monnaies centralized monetary administration expanding its role in the emerging modern state during the sixteenth century and assuming new powers as an often controversial repository of theoretical and administrative expertise The Cour des Monnaies Parsons shows played an important role in developing the contemporary understanding of money as a source of both danger and opportunity at the center of economic and political life More practically the Monnaies led generally successful responses to the endemic inflation of the era and the monetary chaos of a period of civil war Its work investigating and prosecuting counterfeiters shone light into a picaresque world of those who used the abstract and artificial nature of money for their own ends Parsons s broad multidimensional portrait of money in early modern France also encompasses the literature of the age in which money s arbitrary and dangerous power was a major theme

L' Économie du Royaume de France au siècle de Saint Louis

Gérard Sivery, 1984 tait il possible d analyser l économie du royaume de France au siècle de Saint Louis d en donner une analyse conjoncturelle de la mesurer après avoir construit un appareil statistique adquat L ouvrage de Gérard Sivery professeur d histoire médiévale à l Université de Lille III apporte une réponse positive cette interrogation L auteur disposant d une documentation quantitative neuve tenant compte de l influence du grand commerce et des nécessités de l approvisionnement de villes de plus en plus peuplées montre que les phénomènes économiques d un long XIIIe siècle sont beaucoup plus complexes qu on ne le dit trop souvent L ouvrage met en scène une France nouvelle et une France traditionnelle La première voit son économie agir aux grands changes et au dynamisme urbain au travers de cycles bien différents des crises de l économie traditionnelle perceptibles dès la fin du XIIe siècle et le début du XIIIe siècle Pour Gérard Sivery c est le temps de renversement de tendance entre les phases de prospérité et de dépression et celui d un ajustement entre l offre et la demande L innovation l organisation des circuits commerciaux l ajustement des taux d intérêt permettent par ailleurs de résorber les crises les plus graves L autre France reste attachée et pour longtemps encore une économie traditionnelle crasée par les famines et l éternelle rechute d un équilibre précaire entre la production et les besoins de la population En conclusion l auteur montre que cette contamination de la nouvelle économie n atteindra cependant pas tout le royaume et insiste sur le fait que c est lui le siècle de Saint Louis qui a lancé l économie cyclique et ses crises et non le XIXe siècle

Cambridge Illustrated History of the Middle Ages Robert Fossier, 1986 Lavishly illustrated and with numerous maps and charts this is the finest general introduction to the medieval world of recent times It provides an illustrated and accessible guide to medieval society from 350 to 1520 Commercial Agreements and Social Dynamics in Medieval Genoa Quentin van

Doosselaere, 2009-04-27 Commercial Agreements and Social Dynamics in Medieval Genoa is an empirical study of medieval long distance trade agreements and the surrounding social dynamics that transformed the feudal organization of men of arms into the world of Renaissance merchants Drawing on 20 000 notarial records the book traces the commercial partnerships of thousands of people in Genoa from 1150 to 1435 and reports social activity on a scale that is unprecedented for such an early period of history In combining a detailed historical reading with network modeling to analyze the change in the long distance trade relationships Quentin van Doosselaere challenges the prevailing western centric view of development He demonstrates that the history of the three main medieval economic frameworks that brought about European capitalism equity credit and insurance was not driven by strategic merchants economic optimizations but rather by a change in partners selections that reflected the dynamic of the social structure as a whole **Work and Wages** Michael
