## **Historians And The Living Past The Theory And Practice Of Historical Study:**

*Historians and the Living Past* Allan J. Lichtman, 1986      *Historians and the Living Past* Allan Lichtman, Valerie French, 1978 This book seeks to stimulate interest in the discipline of history by establishing its relevance to modern life and to teach the skills requisite for thinking about historical events and communicating ideas effectively      **Ancient Near Eastern History and Culture** William H. Stiebing Jr., 2016-07 This introduction to the Ancient Near East includes coverage of Egypt and a balance of political social and cultural coverage Organized by the periods kingdoms and empires generally used in Near Eastern political history the text interlaces social and cultural history with the political narrative This combination allows students to get a rounded introduction to the subject of Ancient Near Eastern history An emphasis on problems and areas of uncertainty helps students understand how evidence is used to create interpretations and allows them to realize that several different interpretations of the same evidence are possible This introduction to the Ancient Near East includes coverage of Egypt and a balance of political social and cultural coverage      **The Vital Past** Stephen Vaughn, 1985 The importance of history and its relevance to the present have seldom gone unquestioned in modern times This is particularly true in the United States born as the quintessentially modern nation where the image of a vast open frontier and the unofficial state creed of limitless progress have diminished the importance of the past and where the writings of Ralph Waldo Emerson proclaimed that nature and personal experience made tradition irrelevant for the self reliant American

**The Quest for the Historical Israel** George W. Ramsey, 1999-08-30 George W Ramsey offers a critical assessment of recent developments toward the study of early Old Testament history including principles and procedures of historical research and thoughts on the relationship of history and faith      **History and Historians** Davis D. Joyce, 1983-01-10 A collection of essays concerned with what history is why we should study it and how to do history The primary focus of the volume is historiography the history of historical writing or the study of historians and their interpretations of history

*World Civilization* Robin W. Winks, 1993-05 Robin W Winks placed particular emphasis on those developments that most directly explain the nature of the modern world social diffusion group and national consciousness technological change religious identities those aspects of intellectual history that have contributed most to our current dilemmas In turn this means that there is more in *World Civilization* A Brief History about nationalism imperialism or ethnic identities than there is about monarchies feudalism or diplomacy The result of the strategic and intellectual decisions made with respect to this textbook is that its proportions are not the customary ones Particular emphasis is placed on the early origins of civilizations on Greece and Rome and on the period of the so called barbarian invasions because it is by studying these periods that students may best learn how societies are formed Particular emphasis is also placed on the period from the French Revolution on for it is the events of the last two hundred years that have most closely shaped our present condition This book can be read straight through and in its entirety as an interpretive statement about Western history written by a person who

knew a good bit about non Western history and who could thus throw into perspective the unusual the commonplace and the comparable in that sector of history conventionally labeled Western The text draws on over thirty five years of discovering in the classroom what students themselves wish to ask about the past rather than what a body of scholars may have concluded they should wish to ask Though this book is largely about Western civilization it is also about world civilizations for from the eighteenth century forward and in many aspects of life much earlier the non West has interacted with the West in such a way as to make it virtually impossible to separate one from the other when dealing at this level of generalization As a teacher of the history of exploration and discovery of imperialism and decolonizati      *The Accounting Historians Journal* ,1981

**Teaching History for the Common Good** Keith C. Barton,Linda S. Levstik,2004-07-13 In Teaching History for the Common Good Barton and Levstik present a clear overview of competing ideas among educators historians politicians and the public about the nature and purpose of teaching history and they evaluate these debates in light of current research on students historical thinking In many cases disagreements about what should be taught to the nation s children and how it should be presented reflect fundamental differences that will not easily be resolved A central premise of this book though is that systematic theory and research can play an important role in such debates by providing evidence of how students think how their ideas interact with the information they encounter both in school and out and how these ideas differ across contexts Such evidence is needed as an alternative to the untested assumptions that plague so many discussions of history education The authors review research on students historical thinking and set it in the theoretical context of mediated action an approach that calls attention to the concrete actions that people undertake the human agents responsible for such actions the cultural tools that aid and constrain them their purposes and their social contexts They explain how this theory allows educators to address the breadth of practices settings purposes and tools that influence students developing understanding of the past as well as how it provides an alternative to the academic discipline of history as a way of making decisions about teaching and learning the subject in schools Beyond simply describing the factors that influence students thinking Barton and Levstik evaluate their implications for historical understanding and civic engagement They base these evaluations not on the disciplinary study of history but on the purpose of social education preparing students for participation in a pluralist democracy Their ultimate concern is how history can help citizens engage in collaboration toward the common good In Teaching History for the Common Good Barton and Levstik discuss the contribution of theory and research explain the theory of mediated action and how it guides their analysis and describe research on children s and adults knowledge of and interest in history lay out a vision of pluralist participatory democracy and its relationship to the humanistic study of history as a basis for evaluating the perspectives on the past that influence students learning explore four principal stances toward history identification analysis moral response and exhibition review research on the extent to which children and adolescents understand and accept each of these and examine how the stances might contribute to or detract from participation in a

pluralist democracy address six of the principal tools of history narrative structure stories of individual achievement and motivation national narratives inquiry empathy as perspective taking and empathy as caring and review research and conventional wisdom on teachers knowledge and practice and argue that for teachers to embrace investigative multi perspectival approaches to history they need more than knowledge of content and pedagogy they need a guiding purpose that can be fulfilled only by these approaches and preparation for participatory democracy provides such purpose Teaching History for the Common Good is essential reading for history and social studies professionals researchers teacher educators and students as well as for policymakers parents and members of the general public who are interested in history education or in students thinking and learning about the subject

**Michael Oakeshott and the Cambridge School on the History of Political Thought** Martyn P. Thompson, 2019-05-20 This book is a critique of Cambridge School Historical Contextualism as the currently dominant mode of history of political thought drawing upon Michael Oakeshott's analysis of the logic of historical enquiry While acknowledging that the early Cambridge School work represented a considerable advance towards genuinely historical histories of political thought this work identifies two major historiographical problems that have become increasingly acute The first is general an insufficiently rigorous understanding of the key concept of pastness necessarily presupposed in historical enquiry of all kinds The second is specific to histories of political thought a failure to do justice to the varieties of past political thinking especially differences between ideology and philosophy In addressing these problems the author offers a comprehensive account of the history of political thought that establishes the parameters not just of histories of ideological thinking but also of the much disputed character of histories of political philosophy Since rethinking history of political thought in Oakeshottian terms requires resisting current pressures to turn history into the servant of currently felt needs the book offers a sustained defence of the cultural value of modernist historical enquiry against its opponents An important work for political theorists historians of political thought and those researching intellectual history the philosophy of history and proposed new directions in contemporary historical studies

Space in the Medieval West Fanny Madeline, 2016-04-01 In the last two decades research on spatial paradigms and practices has gained momentum across disciplines and vastly different periods including the field of medieval studies Responding to this spatial turn in the humanities the essays collected here generate new ideas about how medieval space was defined constructed and practiced in Europe particularly in France Essays are grouped thematically and in three parts from specific sites through the broader shaping of territory by means of socially constructed networks to the larger geographical realm The resulting collection builds on existing scholarship but brings new insight situating medieval constructions of space in relation to contemporary conceptions of the subject

**Becoming the Second City** Richard Junger, 2010-10-01 Becoming the Second City examines the development of Chicago's press and analyzes coverage of key events in its history to call attention to the media's impact in shaping the city's cultural and historical landscape In concise extensively documented prose Richard Junger illustrates

how nineteenth century newspapers acted as accelerants that boosted Chicago's growth in its early history by continually making and remaking the city's image for the public Junger argues that the press was directly involved in Chicago's race to become the nation's most populous city a feat it briefly accomplished during the mid 1890s before the incorporation of Greater New York City irrevocably recast Chicago as the Second City The book is populated with a colorful cast of influential figures in the history of Chicago and in the development of journalism Junger draws on newspapers personal papers and other primary sources to piece together a lively portrait of the evolving character of Chicago in the nineteenth century Highlighting the newspaper industry's involvement in the business and social life of Chicago Junger casts newspaper editors and reporters as critical intermediaries between the elite and the larger public and revisits key events and issues including the Haymarket Square bombing the 1871 fire the Pullman Strike and the World's Columbian Exposition in 1893

**Ethnic Genealogy** Jessie Smith, 1983-11-22 This work will be useful to librarians to genealogists and to persons searching American Indian Asian American black American and Hispanic American ancestries Family researchers or librarians will find this comprehensive user friendly work invaluable Reference Books Bulletin

**Nearby History** David E. Kyvig, Myron A. Marty, 2000 In the Second Edition of Nearby History the authors have updated all chapters introduced information about internet sources and uses of newer technologies as well as updated the appendices

In Her Own Right Elisabeth Griffith, 1984-09-13 The first comprehensive fully documented biography of the most important woman suffragist and feminist reformer in nineteenth century America In Her Own Right restores Elizabeth Cady Stanton to her true place in history Griffith emphasizes the significance of role models and female friendships in Stanton's progress toward personal and political independence In Her Own Right is in the author's words an unabashedly great woman biography

*Resources of the City* Bill Luckin, 2017-03-02 The field of urban environmental history is a relatively new one yet it is rapidly moving to the forefront of scholarly research and is the focus of much interdisciplinary work Given the environmental problems facing the modern world it is perhaps unsurprising that historians geographers political natural and social scientists should increasingly look at the environmental problems faced by previous generations and how they were regarded and responded to This volume reflects this growing concern and reflects many of the key concerns and issues that are essential to our understanding of the problems faced by cities in the nineteenth and twentieth centuries Addressing a variety of environmental issues such as clean water supply the provision retention of green space and noise pollution that faced European and North American cities the essays in this volume highlight the common responses as well as the differences that characterised the reactions to these trans national concerns

"To Shoot, Burn, and Hang" Daniel N. Rolph, 1994 Using the oral accounts in conjunction with public records and documents as well as the latest scholarship Rolph probes deeply into the collective attitudes revealed by these episodes and places them in historical and cultural context

*Time's Reasons* Leonard Krieger, 2015-03-12 This original work caps years of thought by Leonard Krieger about the crisis of the discipline of history

His mission is to restore history's autonomy while attacking the sources of its erosion in various new histories which borrow their principles and methods from disciplines outside of history. Krieger justifies the discipline through an analysis of the foundations on which various generations of historians have tried to establish the coherence of their subject matter and of the convergence of historical patterns. The heart of Krieger's narrative is an insightful analysis of theories of history from the classical period to the present with a principal focus on the modern period. Krieger's exposition covers such figures as Ranke, Hegel, Comte, Marx, Acton, Troeltsch, Spengler, Braudel, and Foucault among others, and his discussion involves him in subtle distinctions among terms such as historicism, historicism, and historicity. He points to the impact on history of academic political radicalism and its results, the new social history. Krieger argues for the autonomy of historical principles and methods while tracing the importation in the modern period of external principles for historical coherence. *Time's Reasons* is a profound attempt to rejuvenate and restore integrity to the discipline of history by one of the leading masters of nineteenth and twentieth century historiography. As such, it will be required reading for all historiographers and intellectual historians of the modern period.
