identity Eighteenth century European architects understood the client's instrumental role in giving form and meaning to architectural space In a treatise published in 1745 the French architect Germain Boffrand determined that a visitor could judge the character of the master for whom the house was built by the way in which it is planned decorated and distributed This interdisciplinary volume addresses two key interests of contemporary historians working in a range of disciplines one the broad question of identity formation most notably as it relates to ideas of gender class and ethnicity and two the role played by different spatial environments in the production not merely the reflection of identity at defining historical and cultural moments By combining contemporary critical analysis with a historically specific approach the book's contributors situate ideas of space and the self within the visual and material remains of interiors in eighteenth century Europe In doing so they offer compelling new insight not only into this historical period but also into our own **Historic Preservation**

Arnold L. Markowitz,1980 *Northumbria* Robert Colls,2019-02-26 The North East is probably England's most distinctive region A place of strong character with a very special sense of its past it is as William Hutchinson remarked in 1778 truly historical ground This is a book about both the ancient Anglian kingdom of Northumbrian which stretched from the Humber to the Scottish border and the ways in which the idea of being a Northumbrian or a northerner or someone from the North East persisted in the area long after the early English kingdom had fallen It examines not only the history of the region but also the successive waves of identity that that history has bestowed over a very long period of time Successful nations write about themselves in these terms so why not regions Northumbria existed before England began but is still with us in name and in the way we think about ourselves A series of sections entitled Christian Kingdom Borderland and Coalfield New Northumbria Cultural Region and Northumbrian Island explore the region on the grand scale from the very beginning and bring a sharp sense of history to bear on the various threads that have influenced the making of modern regional identity The book is a work of exceptional scholarship Never before have so many acclaimed historians addressed together the issues which have affected this special region Clearly written and rich in ideas chapters explore the physical origins of Northumbria and consider just how the pressing political and military claims of adjoining states shaped and tempered it There are further chapters on art music mythology dialect history economy poetry politics religion antiquarianism literature and settlement They show how Northumbrians have lived and died and looked forward and back and these accounts of the North East's past will surely help in the shaping of its future *A Short History of British Architecture* Simon Jenkins,2024-11-07 Provocative elegant intriguing Jenkins is a bold imaginative writer brilliant at challenging old assumptions and encouraging you to look at British architecture in a new light Rory Stewart The story of Britain is revealed through its buildings and yet the language of architecture is a mystery to all but a few In this enlightening history spanning castles and cathedrals to factories and railway stations Jenkins translates the hidden narratives infused in the facades we walk past every day Britain's history has been formed by its politics religion and society and these influences can be seen in the architectural styles that have shaped its

landscape From pre Roman and the Middle Ages to the Renaissance and the Industrial Revolution Classical and Gothic styles surged and retreated from favour only to then be challenged by a new player Modernism a style that reflected the stunning technological advances of the second half of the twentieth century In this narrative history Simon Jenkins the bestselling champion of our national heritage introduces us to the singular eccentric and sometimes rather ordinary characters who shaped Britain Jenkins teaches readers to see the world anew demystifying the elitist language of architecture so that we can all appreciate the buildings around us Robert Willis (1800-1875) and the Foundation of Architectural History Alexandrina Buchanan,2013 The first full scale biography of Robert Willis the founding father of architectural history **British Sources of Information** P. Jackson,2003-09-02 This comprehensive and versatile reference source will be a most important tool for anyone wishing to seek out information on virtually any aspect of British affairs life and culture The resources of a detailed bibliography directory and journals listing are combined in this single volume forming a unique guide to a multitude of diverse topics British politics government society literature thought arts economics history and geography Academic subjects as taught in British colleges and universities are covered with extensive reading lists of books and journals and sources of information for each discipline making this an invaluable manual *The Architectural Instructor, Containing a History of Architecture from the Earliest Ages to the Present Time* Minard Lafever,1856
