Hilberts Program An Ebay On Mathematical Instrumentalism:

Hilbert's Programs and Beyond Wilfried Sieg, 2013-03-07 David Hilbert was one of the great mathematicians who expounded the centrality of their subject in human thought In this collection of essays Wilfried Sieg frames Hilbert s foundational work from 1890 to 1939 in a comprehensive way and integrates it with modern proof theoretic investigations

Hilbert, Göttingen and the Development of Modern Mathematics Joan Roselló, 2019-02-01 David Hilbert is one of the outstanding mathematicians of the twentieth century and probably the most influential This book highlights Hilbert s contributions to mathematics putting them in their historical social and cultural context In doing so particular attention is paid to Hilbert s axiomatic method and his proposal for the foundations of mathematics the so called Hilbert s program The book also discusses the development of algebraic number theory the theory of integral equations modern algebra and the structural image of mathematics In addition it considers the famous list of Mathematical Problems presented in Paris in 1900 the mathematical tradition of the University of Göttingen the great debate on the foundations of mathematics in the twenties between formalists and intuitionists and finally Hilbert s work on the theory of relativity and the foundations of quantum mechanics The book will primarily appeal to an academic audience although it will also be of interest to general interest science readers

David Hilbert's Lectures on the Foundations of Arithmetic and Logic 1917-1933 William Ewald, Wilfried Sieg, 2013-05-14 The core of Volume 3 consists of lecture notes for seven sets of lectures Hilbert gave often in collaboration with Bernays on the foundations of mathematics between 1917 and 1926 These texts make possible for the first time a detailed reconstruction of the rapid development of Hilbert s foundational thought during this period and show the increasing dominance of the metamathematical perspective in his logical work the emergence of modern mathematical logic the explicit raising of questions of completeness consistency and decidability for logical systems the investigation of the relative strengths of various logical calculi the birth and evolution of proof theory and the parallel emergence of Hilbert s finitist standpoint The lecture notes are accompanied by numerous supplementary documents both published and unpublished including a complete version of Bernays s Habilitationsschrift of 1918 the text of the first edition of Hilbert and Ackermann s *Grundgesetze der theoretischen Logik* 1928 and several shorter lectures by Hilbert from the later 1920s These documents which provide the background to Hilbert and Bernays s monumental *Grundgesetze der Mathematik* 1934 1938 are essential for understanding the development of modern mathematical logic and for reconstructing the interactions between Hilbert Bernays Brouwer and Weyl in the philosophy of mathematics

Theory of Algebraic Invariants David Hilbert, Bernd Sturmfels, 1993 An English translation of the notes from David Hilbert's course in 1897 on Invariant Theory at the University of Göttingen taken by his student Sophus Marxen

David Hilbert's Lectures on the Foundations of Arithmetic and Logic 1894-1917 William Ewald, Michael Hallett, Ulrich Majer, Wilfried Sieg, 2023-01-26 Volume 2 focuses on notes for lectures on the foundations of the mathematical sciences held by Hilbert in the period 1894-1917 They document Hilbert's first engagement with impossibility proofs his early attempts to formulate and address the problem of consistency first dealt with in his work on geometry in the 1890s his engagement with foundational problems raised by the work of Cantor and Dedekind his early investigations into the relationship between arithmetic set theory and logic his advocacy of the use of the axiomatic method generally his first engagement with the logical and semantical paradoxes and the first formal attempts to develop a logical calculus The Volume also contains Hilbert's address from 1895 which formed the preliminary version of his famous *Zahlbericht* 1897
