Himalaya Past And Present:

Himalaya, Past and Present Maheshwar P. Joshi, Allen C. Fanger, Charles Walter Brown, 1990 *Dimag He Dusman Heain*, 1990 Himalaya: Past and Present Maheshwar P. Joshi, 1990 **Democratisation in the Himalayas** Vibha Arora, N. Jayaram, 2017-02-03 Democratisation is a formidable task in the Himalayan region owing to its immense cultural heterogeneity. The process of democratisation has accentuated ethnic competition, assertion of identity and demand for ethnic homelands to protect, safeguard and promote political and development interests of various groups. This volume discusses competing interests, identity politics that permeates political formations, the transformations in the traditional forms of governance and their adaption to democratic institutions, the genesis and periodic eruptions of ethnic assertions and attempts to resolve ethnic conflict. It shows how recent efforts at deepening democratic values and implementing social justice have been resisted and contested. The book argues that the play of ethnicity, the creation of political parties and interest groups, the emergence of social movements and the voice of protest and opposition do not indicate a crisis in democracy but comprise the instruments by which the state is pushed towards reform, welfare and inclusive politics and is obliged to listen to the people. Rich in ethnographic research, this volume will be useful to scholars and researchers of social and political anthropology, political studies, South Asian studies, Nepal and Himalayan studies, sociology and development studies.

Ecology and Man in the Himalayas A. K. Kapoor, Satwanti Kapoor, 1994. The present volume emphasizes the importance of studying the structure and functioning of ecological systems and their mode of reaction on exposure to human intervention in the Himalayas. It stresses the impact of man on his environment and vice versa, considered in the areas of biological and adaptive entity as well as a social, cultural and economic being.

Routledge Handbook of Highland Asia Jelle J.P. Wouters, Michael T. Heneise, 2022-08-09. The Routledge Handbook of Highland Asia is the first comprehensive and critical overview of the ethnographic and anthropological work in Highland Asia over the past half a century. Opening up a grand new space for critical engagement, the handbook presents Highland Asia as a world region that cuts across the traditional divides inherited from colonial and Cold War area divisions: the Indian Subcontinent, South Asia, Southeast Asia, China, East Asia and Central Asia. Thirty-two chapters assess the history of research, identify ethnographic trends and evaluate a range of analytical themes that developed in particular settings of Highland Asia. They cover varied landscapes and communities from Kyrgyzstan to India, from Bhutan to Vietnam, and bring local voices and narratives relating trade and tribute, ritual and resistance, pilgrimage and prophecy, modernity and marginalization, capital and cosmos to the fore. The handbook shows that for millennia Highland Asians have connected far-flung regions through movements of peoples, goods and ideas, and at all times have been the enactors, repositories and mediators of world historical processes. Taken together, the contributors and chapters subvert dominant lowland narratives by privileging primarily highland vantages that reveal Highland Asia as an ecumene and prism that refracts and generates global history, social theory and human imagination. In

the currently unfolding Asian Century this compels us to reorient and re envision Highland Asia in ethnography in theory and in the connections between this world region made of hills highlands and mountains and a planetary context The handbook reveals both regional commonalities and diversities generalities and specificities and a broad orientation to key themes in the region An indispensable reference work this handbook fills a significant gap in the literature and will be of interest to academics researchers and students interested in Highland Asia Zomia Studies Anthropology Comparative Politics Conceptual History and Sociology Southeast Asian Studies Central Asian Studies and South Asian Studies as well as Asian Studies in general Himalaya - past and present : HPP ; [the yearly journal of the Association of Studies on Himalayas].

3.1992/93(1994) Maheshwar P. Joshi,1994 *Recasting Folk in the Himalayas* Stefan Fiol,2017-09-11 Colonialist nationalist and regionalist ideologies have profoundly influenced folk music and related musical practices among the Garhwali and Kumaoni of Uttarakhand Stefan Fiol blends historical and ethnographic approaches to unlock these influences and explore a paradox how the folk designation can alternately identify a universal stage of humanity or denote alterity and subordination Fiol explores the lives and work of Garhwali artists who produce folk music These musicians create art as both a discursive idea and as a set of expressive practices across strikingly different historical and cultural settings Juxtaposing performance contexts in Himalayan villages with Delhi recording studios Fiol shows how the practices have emerged within and between sites of contrasting values and expectations Throughout Fiol presents the varying perspectives and complex lives of the upper caste upper class male performers spearheading the processes of folklorization But he also charts their resonance with and collision against the perspectives of the women and hereditary musicians most affected by the processes Expertly observed *Recasting Folk in the Himalayas* offers an engaging immersion in a little studied musical milieu **South Asian Folklore** Peter Claus,Sarah Diamond,Margaret Mills,2020-10-28 With 600 signed alphabetically organized articles covering the entirety of folklore in South Asia this new resource includes countries and regions ethnic groups religious concepts and practices artistic genres holidays and traditions and many other concepts A preface introduces the material while a comprehensive index cross references and black and white illustrations round out the work The focus on south Asia includes Afghanistan Bangladesh India Pakistan and Sri Lanka with short survey articles on Tibet Bhutan Sikkim and various diaspora communities This unique reference will be invaluable for collections serving students scholars and the general public

Britain and Tibet 1765-1947 Julie G. Marshall,2005 This bibliography is a record of British relations with Tibet in the period 1765 to 1947 As such it also involves British relations with Russia and China and with the Himalayan states of Ladakh Lahul and Spiti Kumaon and Garhwal Nepal Sikkim Bhutan and Assam in so far as British policy towards these states was affected by her desire to establish relations with Tibet It also covers a subject of some importance in contemporary diplomacy It was the legacy of unresolved problems concerning Tibet and its borders bequeathed to India by Britain in 1947 which led to border disputes and ultimately to war between India and China in 1962 These borders are still in dispute today It also

provides background information to Tibet's claims to independence an issue of current importance The work is divided into a number of sections and subsections based on chronology geography and events The introductions to each of the sections provide a condensed and informative history of the period and place the books and article in their historical context Most entries are also annotated This work is therefore both a history and a bibliography of the subject and provides a rapid entry into a complex area for scholars in the fields of international relations and military history as well as Asian history

building culture throughout the Himalayas Based on transregional knowledge transfer raw materials have been able to find an ecologically and economically optimised destiny in particular local applications For this study samples were collected as raw material or originated from certain building components Samples were analysed according to their material properties and architectural application Traditional building techniques were examined and their correlation with traceable material qualities studied Clay specific properties such as colour grain size distribution grain shape hardness plasticity organic additives or bulk and clay mineral properties were used as comparative parameters This study gives fresh insight into the interaction between technical requirements environmental resources and material implementation It is the first scientific approach in studying the Himalayan earthen heritage in a wide scope and connecting material research and cultural heritage from various perspectives in particular archaeology architecture research on materials and building techniques

Plant Ecology of Indian Himalaya Rajendra Mohan Panda, 2022-09-28 This book discusses plant invasions and environmental impacts on the Himalayas through a novel procedure and helps to understand the influences of climate physiography soil and disturbance on plant richness in mountain systems Assessing invasion risks to mountain space under future climate change scenarios is highly significant for appropriate preparedness and this book details analytical and modeling techniques to assess the conditions of mountain ecosystem and ecology to better inform our preparation for future environmental challenges The book presents the state of the art understanding of the species environment relationships in a global biodiversity hotspot relatively unexplored areas for the Himalayan life form richness The book provides not only the academic but also the professional community and policymakers a review and update on modeling applications for determining interactions of the plant species with the environment of a subtropical mountain ecosystem across a climatic gradient Currently there is no book in the market addressing the implementation and applications of modeling in the Himalayan plant and environment continuum and most of the existing books cover the species richness pattern along the elevation gradient and basic ethnobotanical features of a mountain system Since the book covers the applications of novel methods and modeling for ecological analysis of mountain ecosystems it will also be significant for the professional market Therefore the book aims to fill the gap between scientists and professionals in the use of modeling strategies to monitor biodiversity in mountain systems for the formulation of conservation adaptation and mitigation principles

New Perspectives in Basin Analysis Karen L. Kleinspehn, Chris Paola, 2012-12-06 In the extensive field of earth sciences with its many subdisciplines the transfer of knowledge is primarily established via personal communication during meetings by reading journal articles or by consulting books Because more information is available than can be assimilated it is necessary for the individual to search selectively Books take more time from the inception of an idea until publication than any of the other means of communication mentioned As a consequence their function is somewhat different Many good books are a compilation of up to date knowledge and serve as reference or instruction manuals Some books are a collection of previously published papers

dealing with a certain topic while others may basically provide large sets of data or examples The Frontiers in Sedimentary Geology series was established both for students and practicing earth scientists who wish to either stay abreast of the most recent ideas or developments or to become familiar with an important topic in the field of sedimentary geology The series attempts to deal with subjects that are in the forefront of both scientific and economic interest The treatment of a subject in an individual volume should be a combination of topical regional and interdisciplinary approaches Although these three terms can be defined separately in reality they should flow into each other A topical treatment should relate to a major category of sedimentary geology European Bulletin of Himalayan Research ,2004 Environmental Humanities in the New Himalayas Dan Smyer Yü,Erik de Maaker,2021-06-16 Environmental Humanities in the New Himalayas Symbiotic Indigeneity Commoning Sustainability showcases how the eco geological creativity of the earth is integrally woven into the landforms cultures and cosmovisions of modern Himalayan communities Unique in scope this book features case studies from Bhutan Assam Sikkim Tibet Nepal Pakistan and Sino Indian borderlands many of which are documented by authors from indigenous Himalayan communities It explores three environmental characteristics of modern Himalayas the anthropogenic the indigenous and the animist Focusing on the sentient relations of human animal and spirit worlds with the earth in different parts of the Himalayas the authors present the complex meanings of indigeneity commoning and sustainability in the Anthropocene In doing so they show the vital role that indigenous stories and perspectives play in building new regional and planetary environmental ethics for a sustainable future Drawing on a wide range of expert contributions from the natural sciences social sciences and humanist disciplines this book will be of great interest to students and scholars of environmental humanities religion and ecology indigenous knowledge and sustainable development more broadly From the Hebrides to the Himalayas Constance F.
