Himalayan Perceptions:

Himalayan Perceptions Jack Ives, 2004-08-05 Analyzing new research relating to the Himalayan region this text challenges the widely held view from the 1970s and 1980s that the area faced environmental disaster and examines recent social and economic developments relating to the topic

Himalayan Perceptions Jack Ives, 2004 In the 1970s and 1980s many institutions agencies and scholars believed that the Himalayan region was facing severe environmental disaster due primarily to rapid growth in population that has caused extensive deforestation which in turn has led to massive landsliding and soil erosion This series of assumptions was first challenged in the book *The Himalayan Dilemma* 1989 Ives and Messerli Routledge Nevertheless the environmental crisis paradigm still commands considerable support including logging bans in the mountain watersheds of China India and Thailand and is constantly being promoted by the news media *Himalayan Perceptions* identifies the confusion of misunderstanding vested interests changing perceptions and institutional unwillingness to base development policy on sound scientific knowledge It analyzes the large amount of new research published since 1989 and totally refutes the entire construct It examines recent social and economic developments in the region and identifies warfare guerrilla activities and widespread oppression of poor ethnic minorities as the primary cause for the instability that pervades the entire region It is argued that the development controversy is further confounded by exaggerated reporting even falsification by news media environmental publications and agency reports alike

Himalayan Perceptions: Environmental Change and the Well-being of Mountain Peoples [ENHANCED] (Hardcover) Jack D. Ives, 2006

The Mountain Bernard Debarbieux, Gilles Rudaz, 2015-09-10 In *The Mountain* geographers Bernard Debarbieux and Gilles Rudaz trace the origins of the very concept of a mountain showing how it is not a mere geographic feature but ultimately an idea one that has evolved over time influenced by changes in political climates and cultural attitudes To truly understand mountains they argue we must view them not only as material realities but as social constructs ones that can mean radically different things to different people in different settings From the Enlightenment to the present day and using a variety of case studies from all the continents the authors show us how our ideas of and about mountains have changed with the times and how a wide range of policies from border delineation to forestry as well as nature protection and social programs have been shaped according to them A rich hybrid analysis of geography history culture and politics the book promises to forever change the way we look at mountains

Tourism - About Traveling and Vacationing in our Time Kurt Luger, 2025-03-24 Tourist travel has become part of the lifestyle of Western industrial society For today's travelers recreation and curiosity experiencing the world and gaining status have been the main motivations whereas generating income or profit has been the focus of the more or less professional service providers who still style themselves hosts But the benefits of tourism also have their drawbacks not least for the local residents who do not participate in tourism but are affected by traffic high prices in restaurants and housing Another loser is unprotected nature the environment as tourism infrastructure eats up the landscape As with any industry there are downsides to a business where the sun always seems to shine This book examines the many contradictions in hopes of promoting more conscious responsible forms of tourism

Perceptions of Climate Change from North India Aase J. Kvanneid, 2021-03-07 Perceptions of Climate Change from North India An Ethnographic Account explores local perceptions of climate change through ethnographic encounters with the men and women who live at the front line of climate change in the lower Himalayas From data collected over the course of a year in a small village in an eco sensitive zone in North India this book presents an ethnographic account of local responses to climate change resource management and indigenous environmental knowledge Aase Kvanneid's observations cast light on the precarious reality of climate change in this region and bring to the fore issues such as access to water NGO intervention and climate information for farmers In doing so she also explores classic topics in the study of rural India including ritual gender social hierarchy and political economy Overall this book shows how the cause and effect of climate change is perceived by those who have the most to lose and explores how the impact of climate change is being dealt with on a local and global scale This book will be of great interest to students and scholars of the anthropology of climate change environmental sociology and rural development

Mountain Geography Martin F. Price, Alton C. Byers, Donald A. Friend, Thomas Kohler, Larry W. Price, 2013-08-24 Mountains cover a quarter of the Earth's land surface and a quarter of the global population lives in or adjacent to these areas The global importance of mountains is recognized particularly because they provide critical resources such as water food and wood contain high levels of biological and cultural diversity and are often places for tourism and recreation and or of sacred significance This major revision of Larry

Price's book *Mountains and Man* 1981 is both timely and highly appropriate. The past three decades have been a period of remarkable progress in our understanding of mountains from an academic point of view. Of even greater importance is that society at large now realizes that mountains and the people who reside in them are not isolated from the mainstream of world affairs but are vital if we are to achieve an environmentally sustainable future. *Mountain Geography* is a comprehensive resource that gives readers an in-depth understanding of the geographical processes occurring in the world's mountains and the overall impact of these regions on culture and society as a whole. The volume begins with an introduction to how mountains are defined followed by a comprehensive treatment of their physical geography: origins, climatology, snow and ice, landforms and geomorphic processes, soils, vegetation and wildlife. The concluding chapters provide an introduction to the human geography of mountains: attitudes toward mountains, people living in mountain regions and their livelihoods and interactions within dynamic environments, the diverse types of mountain agriculture and the challenges of sustainable mountain development.

wants to know about Indian Military Rescue Operations Dr H K Pandey has a varied experience behind him being the present Head of the Department of Defence and Strategic Studies at Meerut College Meerut He has always positive attitude toward his subject His knowledge and mastery on the subject is enormous Manish Raj Singh is a student in the Department of Defence and Strategic Studies at Meerut College Meerut has shown keen interest and dedication towards the subject completely He is very hardworking and enthusiastic He has left no stones unturned to get the details about the topics of the subjects and comes out with the best possible outcome His knowledge of the subject is evident from the work produced in this detailed book The book has wonderfully covered the background political views role tasks and the major technological development during these military and rescue operations The book shall be of great help to the students of Defence Studies Military Science of various Colleges and Universities all over India to get a fair idea about the strengths of India s Operations to enhance their knowledge about operations for their use in subject for competitive examinations as applicable to them at various levels of their career The general readers too will get a fair idea about the strength of Indian Forces during these operations at national and international level This will give them the confidence to work hard in their concerned fields towards the development of a stronger India that is capable to take on its adversaries neighboring countries anytime and defeat their ongoing plans to imbalance its development as a power in South Asia I once again congratulate both the writers for giving a comprehensive concise look at Indian Operations through their book and wish them all the success in their future endeavors Maj Gen A K Shukla VSM **Mountain, Water, Rock, God** Luke Whitmore, 2018-11-27 A free ebook version of this title is available through Luminos University of California Press s Open Access publishing program Visit www.luminosoa.org to learn more In **Mountain Water Rock God** Luke Whitmore situates the disastrous flooding that fell on the Hindu Himalayan shrine of Kedarnath in 2013 within a broader religious and ecological context Whitmore explores the longer story of this powerful realm of the Hindu god Shiva through a holistic theoretical perspective that integrates phenomenological and systems based approaches to the study of religion pilgrimage place and ecology He argues that close attention to places of religious significance offers a model for thinking through connections between ritual narrative climate destabilization tourism development and disaster and he shows how these critical components of human life in the twenty first century intersect in the human experience of place Forest Guardians, Forest Destroyers Tim Forsyth, Andrew Walker, 2011-07-01 In this far reaching examination of environmental problems and politics in northern Thailand Tim Forsyth and Andrew Walker analyze deforestation water supply soil erosion use of agrochemicals and biodiversity in order to challenge popularly held notions of environmental crisis They argue that such crises have been used to support political objectives of state expansion and control in the uplands They have also been used to justify the alternative directions advocated by an array of NGOs In official and alternative discourses of economic development the peoples living in Thailand s hill country are typically cast as either guardians or destroyers of forest resources often depending on their ethnicity Political and historical factors

have created a simplistic misleading and often scientifically inaccurate environmental narrative. Hmong farmers for example are thought to exhibit environmentally destructive practices whereas the Karen are seen as linked to and protective of their ancestral home. Forsyth and Walker reveal a much more complex relationship of hill farmers to the land to other ethnic groups and to the state. They conclude that current explanations fail to address the real causes of environmental problems and unnecessarily restrict the livelihoods of local people. The authors' critical assessment of simplistic environmental narratives as well as their suggestions for finding solutions will be valuable in international policy discussions about environmental issues in rapidly developing countries. Moreover, their redefinition of northern Thailand's environmental problems and their analysis of how political influences have reinforced inappropriate policies demonstrate new ways of analyzing how environmental science and knowledge are important arenas for political control. This book makes valuable contributions to Thai studies and more generally to the fields of environmental science, ecology, geography, anthropology, and political science as well as to policy making and resource management in the developing world.

Contentious Geographies
Maxwell T. Boykoff, 2016-05-13

The human environment relationship intimately intertwined and often contentious is one of the most pressing concerns of the 21st century. Explored through an array of critical approaches, this book brings together case studies from across the globe to present significant cutting edge research into political ecologies as they relate to multi-form contestations over environments, resources, and livelihoods. Covering a range of issues such as popular discourses of environmental collapse, climate change, water resource struggles, displacement, agro-food landscapes, and mapping technologies, this edited volume works to provide a broad and critical understanding of the narratives and policies more subtly shaping and being shaped by underlying environmental conflicts. By exploring the power-laden processes by which environmental knowledge is generated, framed, communicated, and interpreted, *Contentious Geographies* works to reveal how environmental conflicts can be re-considered and thus re-opened to enhance efforts to negotiate more sustainable environments and livelihoods.
