Himalayan Ecology And Environment:

Ecology and Environment in the Himalayas Kuldip Singh Gulia, 2007 Today environment and ecology are the buzzwords. The pace of development and modernization has endangered the ecological balance of Himalaya. When the British brought railways in India in the late 18th century, the Himalayan jungles were denuded of the vast forests covers due to the demand for sleepers. When in early 19th century the Britishers attempted to curb wanton tree felling, there arose resentment among the people of Garhwal and Kumaon in Uttarakhand. But in later times those very women folk took to Chipko movement to curb tree felling. The book gives a multitude of ill effects of tree felling ranging from soil erosion to causing floods in the plains and depositing silt. The shrinking of various Himalayan glaciers has also created alarm among the global ecologists and environmentalists. Denudation of forests also has been causing landslides and endangering the wildlife. Now the efforts are being made to avert the man-made disaster. This book comes to grips with the magnitude of the problem in the entire Himalayan region.

In particular, this work covers relevant aspects of weather and climate, paleoclimate, snow, glacier and hydrology, ecology, forestry among other topics associated with the Himalayas. It highlights the role of the Himalayas in defining local to regional to global scale impact on weather and climate. Life in the Himalaya Maharaj K. Pandit, 2017-06-19 The collision of the Indian and Eurasian plates 50 million years ago created the Himalaya along with massive glaciers, intensified monsoon, turbulent rivers and an efflorescence of ecosystems. Today the Himalaya is at risk of catastrophic loss of life. Maharaj Pandit outlines the mountain's past in order to map a way toward a sustainable future.
