Himalayas, Environmental Problems S. K. Chadha, 1990 **Himalayan Snow and Glaciers** Jagdish Bahadur, 2004
Provides An Overview Of Himalayan Snow Glaciers Ice Ages Glaciation History Of Efforts For The Study Of Himalayan Glaciers Information Relating To Extent Of Snow Glacier Fields Their Characteristics Influence On The Climate Perennial Rivers Soil Erosion And Sediment Transport Environmental Problems Modern Technologies Such As Remote Sensing Etc

Environmental Problems in the Himalaya Sharad Singh Negi, 1982 *Environmental Sustainability from the Himalayas to the Oceans* Shikui Dong, Jayanta Bandyopadhyay, Sanjay Chaturvedi, 2017-01-23 The book is written in the backdrop of the environmental impacts of and future requirements from the natural environment for rapid economic growth that has characterized recent economic history of China and India especially over the past few decades The environmental impacts of such rapid economic changes have been more frequently than otherwise degrading in character Environmental impacts of economic activities create degraded natural ecosystems by over utilization of nature's provisioning ecosystem services from Himalaya to the Ocean as well by the use of the natural environment as sink for dumping of unmarketable products or unused inputs of economic activities Such processes affect wide range of ecosystem processes on which the natural environment including human population depend on Critical perspectives cast by various chapters in this book draw attention to the various ways in which space and power interact to produce diverse geographies of sustainability in a globalizing world They also address the questions such as who decides what kind of a spatial arrangement of political power is needed for sustaining the environment Who stands to gain or lose what when where and why from certain geographical areas being demarcated as ecologically unique fragile and vulnerable environments Whose needs and values are being catered to by a given ecosystem service What is the scope for critical inquiry into the ways in which the environment is imagined represented and resisted in both geopolitical struggles and everyday life The book provides insights to both academics from diverse disciplines and policy makers civil society actors interested in mutual exchange of knowledge between China and India **Geoenvironmental Hazards in Himalaya** Bindhy Wasini Pandey, 2002 *Environmental Concerns and Sustainable Development* Sakarama Somayaji, Ganesha Somayaji, 2009-01-01 At the dawn of this 21st century environmental concerns have received utmost attention from all segments of human society The extreme abuse of nature and ruthless hunt for material happiness are the reasons for post enlightenment destruction of the environment Many consider the issues related to environmental degradation as an environmental crisis During the last century humans have been exploiting nature not merely for need but also for greed Environmentally concerned individuals call for immediate action to stop being greedy and act positively In India too this environmental awareness is fast spreading and the Honourable Supreme Court of India has directed the Central and state governments to introduce courses regarding environmental issues at all levels of education This book is a compilation of research results pertaining to development environment and

sustainable development in the form of articles Mining in the Himalayas A.K. Soni, 2016-09-19 Himalaya the world's most prominent mountain system of the world is a source of sustenance for the social cultural and economic development of population across different countries Unscientific small scale mining for harnessing resources including minerals has caused ecosystem damage Therefore an integrated and holistic approach to deal with the resource management is required This book makes a focussed effort to explain how mining in the Himalaya is practiced with discussions pertaining to critiques and lacunas of mining and environmental practices Status of mining practices in Himalaya is included along with the legal environmental repercussions of mining **Hydrological Problems and Environmental Management in Highlands and Headwaters** Martin Haigh, 2017-10-19 This set of papers presents a description of the synthesis of hydrological problems and various environmental implications and management strategies for different highland and headwater regions of the world Regions covered include the Himalayas Russian mountains Amazonia and upland Wales **Mining Impacts and their Environmental Problems** José Marrugo Negrete, M. P. Jonathan, A.L. Ramanathan, S. Chidambaram, R. Nagarajan, Pankaj Kumar, 2025-02-12 This book entitled Mining Impacts and their Environmental Problems presents a comprehensive view on various mining activities and a wide spectrum of environmental challenges associated with it Case studies presented across global south such as Asia Africa and Latin America are the first of its kind which presents a holistic and deep insight into instead of about about this pressing environmental issue In this book thirteen chapters present various issues ranging from gold silver chromium lead coal mining and its impacts on ambient environmental soil water biodiversity degradation and ultimately on healthy living environment instead of human health living human health living in the surrounding area For this purpose different methodologies have been used they have used different methodologies for example instead of like using like using a water quality index hydro chemical characterization numerical simulation to identify the extent of pollution caused by instead of due to due to mining activities Later in the book it advocates the usage of advance mining technologies such as advanced oxidation processes decarbonization technologies and a biotechnological approach for the treatment of wastewater being generated due to mining activities or minimizing overall environmental degradation Finally it emphasizes on assessing risk zone delineation vulnerability analysis using cutting edge tools like numerical simulation GIS and remote sensing which will help designing robust management plans and sustainable transitions critically helpful for policy makers or decision makers *Ecology and Environment in the Himalayas* Kuldeep Singh Gulia, 2007 Today environment and ecology are the buzzwords The pace of development and modernization has endangered the ecological balance of Himalaya When the British brought railways in India in the late 18th century the Himalayan jungles were denuded of the vast forests covers due to the demand for sleepers When in early 19th century the Britishers attempted to curb wanton tree felling there arose resentment among the people of Garhwal and Kumaon in Uttarakhand But in later times those very women folk took to Chipko movement to curb tree felling The book gives a multitude of ill effects of

tree felling ranging from soil erosion to causing floods in the plains and depositing silt The shrinking of various Himalayan glaciers has also created alarm among the global ecologists and environmentalists Denudation of forests also has been causing landslides and endangering the wildlife Now the efforts are being made to avert the man made disaster This book comes to grips with the magnitude of problem in the entire Himalayan region *Himalayas, Ecology and Environment* S. K. Chadha, 1988 Contemporary Environmental Problems in Nepal Keshav Bhattarai, Dennis Conway, 2020-11-23 This monograph examines contemporary environmental challenges facing Nepal this landlocked country's representativeness in the wider South Asian context is both distinct and generalizable In large part this is because of its extremes of physiographical structure plains hill ranges mountainous massifs and wide range of altitudinal terrains which represent and replicate South Asian and East Asian continental conditions differing as markedly as humid tropical lowlands sub tropical hill ranges and temperate to sub arctic mountainous environments Associated forest regimes in which deforestation and reforestation patterns have evolved in recent times and differing densities of settlement and cleared agricultural landscapes in each of these altitudinal zones add to the environmental diversity of Nepal Associated fauna and exotic species are in various states of endangerment especially Bengal tigers one horned rhinos wild elephants crocodile musk deer and peacocks to name a few so that their forested and mountainous habitats as Wild Life Reserves also deserve our attention and are featured in this monograph's remit *Frontiers in Environmental Geography* Onkar Singh, 1993 Contributed articles based on environmental and socioecological studies in India **Environmental Challenges and Governance** Sacchidananda Mukherjee, Debashis Chakraborty, 2015-03-02 The economies located in East South and Southeast Asia have witnessed an interesting growth sustainability trade off over the last decades While growth considerations have paved ways for deepened ties with growing trade investment waves and increasing population pressure necessitated exploitation of hitherto unutilized natural resources focus on environmental sustainability has been a recent consideration The growth impetus still playing a key role in these economies it becomes imperative that the countries effectively address the key sustainability concerns e.g air and water pollution land degradation loss of biodiversity climate change issues like CO₂ emissions etc But how prepared is the governance mechanism of these countries covering not only the legislative and administrative framework but also involvement of the judiciary presence of spirited civil society and active engagement of stakeholders in policy framing dialogues to rise up to these challenges The book seeks an answer to this question through the environmental governance mechanism and natural resource conservation policies in three vibrant regions within Asia A holistic development dimension of sustainable development path emerges through discussion of policies adopted by developed Japan South Korea upper middle China Malaysia developing India Indonesia Philippines Sri Lanka Thailand and least developed countries Bangladesh Myanmar Nepal Environment : Problems And Policies(encyclopaedia Of Environment), Vol# 2 Ed. K.R. Gupta, 2005 Encyclopaedia Of Environment Has A Wide Coverage And Comprehensively Studies The Global Environmental Change And

Environmental Degradation Mainly Caused By Human Interference Air Pollution And Ozone Depletion Greenhouse Effects Climatic Change Land Degradation Deforestation Desertification Loss Of Biodiversity Surface And Groundwater Contamination Hazardous Wastes And Agricultural Pollution And Several Other Problems Related To Environment That Are Of Primary Concern It Is Highly Likely That Environmental Degradation Would Reduce The Capacity Of Human Societies To Maintain Their Lifestyles At Existing Levels Since The Driving Forces Of Global Economy May No Longer Be Able To Use In Sustained Manner The Limited Resources Of The Earth Although The Consequences Of Environmental Degradation Are Sometimes Not Recognized But In Many Cases They Are Intentionally Ignored Because Of The Illusory Higher Economic Gains Realising The Urgent Need For Arresting The Trend For Developing Awareness In The Readers About The Preservation Of Biodiversity And Its Significance For Life Sustainability And Equity And For Warning Against The Consequences Of Environmental Exploitation As Well The Present Encyclopaedia Of Environment Has Been Compiled It Not Only Studies The Problems Related To Environment But Also Suggests Suitable Remedial Measures Attempts Have Been Made To Include In These Well Documented Volumes All The Latest Major Policies Adopted By The United Nations Organisation And Its Affiliated Agencies As Well As By The Developed And Developing Countries Across The World The First Four Volumes Of The Encyclopaedia Include Papers On Environment Glossary Of Global Warming And A Detailed Bibliography To Enable The Readers To Pursue The Study Further The Following Five Volumes Include International Regional And National Conventions Protocols Treaties And Agreement Relating To Environment And The Indian Laws For Clean Environment And Pollution Control The Book Would Be Highly Useful For Students And Researchers Engaged In The Study Of Environment It Would Also Be Useful To Government Executives And Ngos Concerned With Environment And Pollution Problems Since The Laymen Are Deeply Interested In Clean Environment The Book Would Be Of Great Interest To Them Environment and the poor development H. Jeffrey Leonard, 1989-01-01 This volume one of the ODC's U S Third World Policy Perspectives series offers useful steps for policymakers concerned with the critical challenges of integrating environment and development concerns Jessica Tuchman Matthews World Resources Institute Six out of every ten of the world's people are being inexorably pushed by agricultural modernization and continuing high population growth rates into ecologically vulnerable environments tropical forests dryland and hilly areas and the fringes of great urban centers Unless development strategies support their capabilities to ensure their own survival the 470 million people living in these vulnerable areas will be forced to meet their short term need to survive at the cost of long term ecological sustainability and the well being of future generations In response to these startling statistics the authors call for new policies and new forms of collaboration among participants at the local national and international levels They offer practical and stimulating recommendations to bring together population planners water engineers health professionals bankers among others to find solutions to both poverty and environmental problems **Climate Change and Environmental Issues** Narayan Singh, Amit Kumar Thakur, P L Sharma, Pankaj

Sharma,2016-06-01 Climate change is one of the greatest challenges of the 21st century Climate is changing across our planet largely as a result of human activities The indicators of climate change include physical responses such as changes in the surface temperature atmospheric water vapour severe climatic events melting of glaciers and a rise in sea level Mountain ecosystems being exceptionally fragile are prone to both natural and anthropogenic drivers of change which ranges from volcanic and seismic events and flooding to global climate change and of vegetation and soils resulting from inappropriate agricultural and forestry practices and extractive industries Environmental issues directly affect agricultural productivity famine and pandemics health economy and ecology In this light environmental protection the practice of protecting the environment on individual community organizational or governmental level assumes a significant role This book provides a holistic coverage of the basics of climate change changes in biodiversity phytosociological changes and thus proposes a comprehensive set of solutions to resolve various issues related to environment and climate change This book would be beneficial for researchers policy makers academicians environmentalists and university students
