Public Buildings Proposals United States. Congress. Senate. Committee on Environment and Public Works,1983 Public Space and the Ideology of Place in American Culture Miles Orvell,Jeffrey L. Meikle,2009 We typically take public space for granted as if it has continuously been there yet public space has always been the expression of the will of some agency person or institution who names the space gives it purpose and monitors its existence And often its use has been contested These new essays written for this volume approach public space through several key questions Who has the right to define public space How do such places generate and sustain symbolic meaning Is public space unchanging or is it subject to our subjective perception Do we given the public nature of public space have the right to subvert it These eighteen essays including several case studies offer convincing evidence of a spatial turn in American studies They argue for a re visioning of American culture as a history of place making and the instantiation of meaning in structures boundaries and spatial configurations Chronologically the subjects range from Pierre L Enfant s initial majestic conceptualization of Washington D C to the post modern realization that public space in the U S is increasingly a matter of waste Topics range from parks to cities to small towns from open air museums to airports encompassing the commercial marketing of place as well as the subversion and re possession of public space by the disenfranchised Ultimately public space is variously imagined as the site of social and political contestation and of aesthetic change
