HOW TO LEARN AND TEACH IN MEDICAL SCHOOL Mark E. Quirk,1994-01-01 This book can be used by students faculty and administrators to enhance the process of medical education Medical students can use it to develop and refine their learning skills assess their individual learning needs identify resources to meet these needs and to prepare themselves for critical learning events and transitions Faculty can use this book to understand the learning process and develop teaching skills thereby providing a framework for critically assessing how they teach Administrators can use it to expose inadequacies in the medical education process and to strengthen the teaching and learning environment Certain chapters of this book could serve as required readings for a medical school course on learning The development and implementation of such a course and the commensurate application of the espoused principles of learning and teaching to the educational process would signal true medical educational reform It would signify that critical attention is being paid to those aspects of learning medicine thought to be crucial reading the literature self directedness critical thinking problem solving lifelong learning and creativity Such a course would be as important as any basic science course or clinical rotation to the training of future physicians who would use these skills throughout their professional lives The book could serve as a foundation for faculty development with medical educators In this regard Part One provides insight into how medical students learn and has significant implications for teaching Parts Two and Three provide practical guidelines for teaching and curriculum development from a learner centered perspective

Forum ,1982 Factors of Academic Achievement Ucharan Deka,1993 In academic achievement nature and nurture play a combined role Nature implies certain innate or inherited factors such as intelligence potentiality and personality while nurture contributing such things as may be found in homes school neighbourhood and the wider society To ascertain the relative importance of nature and nurture is an arduous task It endeavours to pinpoint such important factors as would give the reader a better understanding and insight into school success and failure

The Ropewalker Jaan Kross,2016-07-28 The first part in an epic historical trilogy The Estonian answer to Wolf Hall by the nation's greatest modern writer Jaan Kross's trilogy dramatises the life of the renowned Livonian Chronicler Balthasar Russow whose greatest work described the effects of the Livonian War on the peasantry of what is now

Estonia Like Hilary Mantel's Thomas Cromwell Russow is a diamond in the rough a thoroughly modern man in an Early Modern world rising from humble origins to greatness through wit and learning alone As Livonia is used as a political football by the warring powers of Russia Sweden Poland and Lithuania he continues to climb the greasy pole of power and influence Even as a boy Russow has the happy knack of being in the right place and saying the right thing at the right time He is equally at home acting as friend and confidante to his ambitious patron and as champion for his humble rural relatives Can anything halt his vertiginous rise Like most young men he is prey to temptations of the flesh

Geospatial Technologies and Homeland Security Daniel Sui, 2008-05-25 Homeland security and context In the Geographical Dimensions of Terrorism GDOT Cutter et al 2003 the first book after 9 11 to address homeland security and geography we developed several thematic research agendas and explored intersections between geographic research and the importance of context both geographical and political in relationship to the concepts of terrorism and security It is good to see that a great deal of new thought and research continues to flow from that initial research agenda as illustrated by many of the papers of this new book entitled Geospatial Technologies and Homeland Security Research Frontiers and Future Challenges Context is relevant not only to understanding homeland security issues broadly but also to the conduct of research on geospatial technologies It is impossible to understand the implications of a homeland security strategy let alone hope to make predictions conduct meaningful modeling and research or assess the value and dangers of geospatial technologies without consideration of overarching political social economic and geographic contexts within which these questions are posed

Language vs. Reality N. J. Enfield, 2024-03-05 A fascinating examination of how we are both played by language and made by language the science underlying the bugs and features of humankind's greatest invention Language is said to be humankind's greatest accomplishment But what is language actually good for It performs poorly at representing reality It is a constant source of distraction misdirection and overshadowing In fact N J Enfield notes language is far better at persuasion than it is at objectively capturing the facts of experience Language cannot create or change physical reality but it can do the next best thing reframe and invert our view of the world In Language vs Reality Enfield explains why language is bad for scientists who are bound by reality but good for lawyers who want to win their cases why it can be dangerous when it falls into the wrong hands and why it deserves our deepest respect Enfield offers a lively exploration of the science underlying the bugs and features of language He examines the tenuous relationship between language and reality details the array of effects language has on our memory attention and reasoning and describes how these varied effects power narratives and storytelling as well as political spin and conspiracy theories Why should we care what language is good for Enfield who has spent twenty years at the cutting edge of language research argues that understanding how language works is crucial to tackling our most pressing challenges including human cognitive bias media spin the post truth problem persuasion the role of words in our thinking and much more
