documentation originating from large estates small sharecroppers tenant and owner farmers alike has survived Drawing on that rich body of sources this book examines book keeping and account practices in farm management across Europe with case studies ranging from Westphalia and the Rhineland to France and Switzerland over three centuries It considers who kept these records and their motivations how practices changed and developed across the period and in what ways and to what extent accounts and accounting influenced the development of agriculture It also examines the role of farmers own organisations and government in encouraging higher standards of accounting The Introduction and chapters 7 and 9 are available as Open Access under the Creative Commons licence CC BY NC ND La littérature française contemporaine
