profiles the most important American mountaineers including such figures as John C. Frémont, John Muir, Annie Peck, Bradford Washburn, Charlie Houston, and Bob Bates relating their exploits both at home and abroad. Isserman traces the evolving social, cultural, and political roles mountains played in shaping the country. He describes how American mountaineers forged a brotherhood of the rope modeled on America's unique democratic self-image that characterized climbing in the years leading up to and immediately following World War II. And he underscores the impact of the postwar rucksack revolution including the advances in technique and style made by pioneering dirtbag rock climbers. A magnificent, deeply researched history, *Continental Divide* tells a story of adventure and aspiration in the high peaks that makes a vivid case for the importance of mountains to American national identity. *Transactions of the Kansas State Historical Society, 1905-1906*

Edney, Mary Sponberg Pedley, 2020-05-15 Since its launch in 1987, the History of Cartography series has garnered critical acclaim and sparked a new generation of interdisciplinary scholarship. Cartography in the European Enlightenment: the highly anticipated fourth volume offers a comprehensive overview of the cartographic practices of Europeans, Russians, and the Ottomans both at home and in overseas territories from 1650 to 1800. The social and intellectual changes that swept Enlightenment Europe also transformed many of its mapmaking practices. A new emphasis on geometric principles gave rise to improved tools for measuring and mapping the world, even as large-scale cartographic projects became possible under the aegis of powerful states. Yet older mapping practices persisted. Enlightenment cartography encompassed a wide variety of processes for making, circulating, and using maps of different types. The volume's more than four hundred encyclopedic articles explore the era's mapping, covering topics both detailed, such as geodetic surveying, thematic mapping, and map collecting, and broad, such as women and cartography, cartography and the economy, and the art and design of maps. Copious bibliographical references and nearly one thousand full-color illustrations complement the detailed entries. *A History of the World in 12 Maps* Jerry Brotton, 2013-11-14 A New York Times Bestseller. Maps allow the armchair traveler to roam the world, the diplomat to argue his points, the ruler to administer his country, the warrior to plan his campaigns, and the propagandist to boost his cause. Rich and beautiful. Wall Street Journal. Throughout history, maps have been fundamental in shaping our view of the world and our place in it. But far from being purely scientific objects, maps of the world are unavoidably ideological and subjective, intimately bound up with the systems of power and authority of particular times and places. Mapmakers do not simply represent the world; they construct it out of the ideas of their age. In this scintillating book, Jerry Brotton examines the significance of 12 maps from the almost mystical representations of ancient history to the satellite-derived imagery of today. He vividly recreates the environments and circumstances in which each of the maps was made, showing how each conveys a highly

individual view of the world Brotton shows how each of his maps both influenced and reflected contemporary events and how by considering it in all its nuances and omissions we can better understand the world that produced it Although the way we map our surroundings is more precise than ever before Brotton argues that maps today are no more definitive or objective than they have ever been Readers of this beautifully illustrated and masterfully argued book will never look at a map in quite the same way again A fascinating and panoramic new history of the cartographer s art The Guardian The intellectual background to these images is conveyed with beguiling erudition There is nothing more subversive than a map The Spectator A mesmerizing and beautifully illustrated book The Telegraph **The Bookseller, Newsdealer and Stationer** ,1904
