Screening the Stage Bert Cardullo,2006 This book examines the historical cultural and aesthetic relationships between theater and film As we enter the 21st century almost all artists students and critics working in theater will have had earlier and greater exposure to film than to theater In fact film has become central to the way in which we perceive and formulate stories images ideas and sounds At the same time film and video occupy an increasingly significant place in theater study both for the adaptation of plays and for the documentation and preservation of theatrical performances Yet far too often theater and film artists as well as educators make the jump from one medium to the other without being fully aware of the ways in which the qualities of each medium affect content and artistic expression This book is intended to fill such a gap by providing a theoretical and practical foundation for understanding the effect that film and drama have had and continue to have on each other s development Moreover this study provides a history of the relationship between drama and cinema starting with the pre cinematic late 19th century impulse towards capturing spectacular action on the stage and examining the artistic and commercial interaction between movies and plays both in popular and experimental work throughout the 20th century Important subjects treated in this book include stage versus screen acting the adaptation process itself the theatrical as well as the cinematic avant garde and the portability or adaptability of dramatic character

Dewey, Russell, Whitehead Brian Patrick Hendley,2010-03-19 In Philosophers as Educators Brian Patrick Hendley argues that philosophers of education should reject their preoccupation with defining terms and analyzing concepts and embrace the philosophical task of constructing general theories of education Hendley discusses in detail the educational philosophies of John Dewey Bertrand

Russell and Alfred North Whitehead He sees in these men excellent role models that contemporary philosophers might well follow Hendley believes that like these mentors philosophers should take a more active practical role in education Dewey and Russell ran their own schools and Whitehead served as a university administrator and as a member of many committees created to study education **Analysis and Approach to the Development of an Advanced Multimedia Instructional System** ,1970 *The Poetics of the Cinema* Edward Warrington Hudlin,1983 *Cuba in the American Imagination* Louis A. Pérez,2008 One of the foremost historians of Cuba analyzes the metaphorical and depictive motifs that have been used to describe Cuba and their political effectiveness as they have persisted and changed since the early nineteenth century
