Handbook of Biological Control T. W. Fisher, Thomas S. Bellows, L. E. Caltagirone, D. L. Dahlsten, Carl B.

Huffaker, G. Gordh, 1999-09-20 For many years the use of chemical agents such as pesticides and herbicides has been effective in controlling the many varieties of pests that infest both agricultural crops and backyard gardens. However, these pests are gradually becoming resistant to these agents because the agents themselves are acting as selective factors making the pests better and better able to resist and persist. As a result, the use of biological controlling agents is increasing. This book is a comprehensive and authoritative handbook of biological control.

Draft Environmental Impact Statement

Susan E. Feinman, John C. Matheson, 1978 **Current Therapy in Medicine of Australian Mammals** Larry Vogelnest, Timothy Portas, 2025-06-02

Current Therapy in Medicine of Australian Mammals provides up to date knowledge of Australian mammal medicine. This revised edition is a companion volume to *Medicine of Australian Mammals*, a text that remains relevant and current although there have been significant advances in Australian mammal medicine and surgery since its publication in 2008. Together, these two texts remain the most comprehensive source of information on medicine of Australian mammals available. This book is divided into two sections. The first includes detailed chapters on general topics and topics relevant to multiple taxa, including a new chapter on assessment, triage, and treatment of bushfire affected wildlife. The second section provides updates of current knowledge relevant to specific taxa. Each chapter is authored by Australian experts. Several appendices provide useful reference data and information on clinical reference ranges, recommended venipuncture sites, chemical restraint agent doses and regimens, a drug formulary, and dental charts. *Current Therapy in Medicine of Australian Mammals* is clinically oriented with an emphasis on practical content and easy to use reference material and is a must have for veterinarians, students, biologists, zoologists, wildlife carers, and other wildlife professionals. This volume also complements updates and utilises the resources of other books such as *Radiology of Australian Mammals* (Vogelnest and Allan, 2015), *Pathology of Australian Native Wildlife* (Ladds, 2009), *Haematology of Australian Mammals* (Clark, 2004), and *Australian Mammals: Biology and Captive Management* (Second Edition, Jackson, 2025).

The Oxford Handbook of Social Influence (Stephen G. Harkins, Kipling D. Williams, Jerry M. Burger, 2017-07-07) The study of social influence has been central to social psychology since its inception. In fact, research on social influence predated the coining of the term social psychology. Its influence continued through the 1960s when it made seminal contributions to the beginning of social psychology's golden age. However, by the mid 1980s, interest in this area waned, while at the same time, and perhaps not coincidentally, interest in social cognition waxed. Now, the pendulum is swinging back, as seen in growing interest in non-cognitive motivational accounts. *The Oxford Handbook of Social Influence* will contribute to a resurgence of interest in social influence that will restore it to its once preeminent position. Written by leading scholars, the chapters cover a variety of topics related to social influence, incorporating a range of levels of analysis: intrapersonal, interpersonal, and intragroup, and both source (the influencers) and target (the influenced) effects. The volume also examines theories that are most relevant to social influence, as well as social influence in applied settings. The chapters contribute to the renaissance of interest in social

influence by showing that it is time to reexamine classic topics in social influence by illustrating how integrations elaborations that advance our understanding of social influence processes are now possible by revealing gaps in the social influence literature and by suggesting future lines of research Perhaps the most important of these lines of work will take into account the change from traditional social influence that occurs face to face to social media mediated influence that is likely to characterize many of our interactions in the future
