Reform in the Progressive-Era South Rebecca S. Montgomery,2018-12-05 Celeste Parrish and Educational Reform in the
Progressive Era South follows a Civil War orphan s transformation from a Southside Virginia public school teacher to a
nationally known progressive educator and feminist In this vital intellectual biography Rebecca S Montgomery places
feminism and gender at the center of her analysis and offers a new look at the postbellum movement for southern
educational reform through the life of Celeste Parrish Because Parrish s life coincided with critical years in the destruction
and reconstruction of the southern social order her biography provides unique opportunities to explore the links between
southern nationalism reactionary racism and gender discrimination Parrish s pursuit of higher education and a professional
career pitted her against male opponents of coeducation who regarded female and black dependency as central to southern
regional distinctiveness When coupled with women s lack of formal political power this resistance to gender equality
discouraged progress and lowered the quality of public education throughout the South The marginalization of women within
the reform movement headed by the Conference for Education in the South further limited women s contributions to regional
change Although men welcomed female participation in grassroots organization much of women s work was segregated in
female networks and received less public acknowledgement than the reform work conducted by men Despite receiving little
credit for their accomplishments by working on the margins women were able to use the southern movement and its
philanthropic sponsors as alternate sources of influence and power By exploring the consequences of gender discrimination
for both educational reform and the influence of southern progressivism Rebecca S Montgomery contributes a nuanced
understanding of how interlocking hierarchies of power structured opportunity and influenced the shape of reform in the U S

Journal of Education Thomas Williams Bicknell,Albert Edward Winship,Anson Wood Belding,1903 *Schooling in the*
Antebellum South Sarah L. Hyde,2016-10-19 In *Schooling in the Antebellum South* Sarah L Hyde analyzes educational
development in the Gulf South before the Civil War not only revealing a thriving private and public education system but also
offering insight into the worldview and aspirations of the people inhabiting the region While historians have tended to
emphasize that much of the antebellum South had no public school system and offered education only to elites in private

institutions Hyde's work suggests a different pattern of development in Louisiana Mississippi and Alabama where citizens actually worked to extend schooling across the region As a result students learned in a variety of settings in their own homes with a family member or hired tutor at private or parochial schools and in public free schools Regardless of the venue Hyde shows that the ubiquity of learning in the region proves how highly southerners valued education As early as the 1820s and 1830s legislators in these states sought to increase access to education for less wealthy residents through financial assistance to private schools Urban governments in the region were the first to acquiesce to voters demands establishing public schools in New Orleans Natchez and Mobile The success of these schools led residents in rural areas to lobby their local legislatures for similar opportunities Despite an economic downturn in the late 1830s that limited legislative appropriations for education the economic recovery of the 1840s ushered in a new era of educational progress The return of prosperity Hyde suggests coincided with the maturation of Jacksonian democracy a political philosophy that led southerners to demand access to privileges formerly reserved for the elite including schooling Hyde explains that while Jacksonian ideology inspired voters to lobby for schools the value southerners placed on learning was rooted in republicanism they believed a representative democracy needed an educated populace to survive Consequently by 1860 all three states had established statewide public school systems Schooling in the Antebellum South successfully challenges the conventional wisdom that an elitist educational system prevailed in the South and adds historical depth to an understanding of the value placed on public schooling in the region

Pitman's Journal of Commercial Education ,1892 *The American State Normal School* C. Ogren,2005-04-30 The American State Normal School is the first comprehensive history of the state normal schools in the United States Although nearly two hundred state colleges and regional universities throughout the U S began as normal schools the institutions themselves have buried their history and scholars have largely overlooked them As these institutions later became state colleges and or regional universities they distanced themselves from the low status of elementary literally erasing physical evidence of their normal school past In doing so they buried the rich history of generations of students for whom attending normal school was an enriching and sometimes life changing experience Focusing on these students the first wave of non traditional students in higher education The American State Normal School is a much needed re examination of the state normal school This book was subject of an annual History of Education Society panel for best new books in the field

Journal of the National Education Association ,1923 **Business as Usual** Caroline Jack,2024-10-22 How corporations used mass media to teach Americans that capitalism was natural and patriotic exposing the porous line between propaganda and public service Business as Usual reveals how American capitalism has been promoted in the most ephemeral of materials public service announcements pamphlets educational films and games what Caroline Jack calls sponsored economic education media These items which were funded by corporations and trade groups who aimed to sell America to Americans found their way into communities classrooms and workplaces and onto the

airwaves where they promoted ideals of free enterprise under the cloaks of public service and civic education They offered an idealized vision of US industrial development as a source of patriotic optimism framed business management imperatives as economic principles and conflated the privileges granted to corporations by the law with foundational political rights held by individuals This rhetoric remains dominant a harbinger of the power of disinformation that so besets us today Jack reveals the funding production and distribution that together entrenched a particular vision of corporate responsibility and in the process shut out other hierarchies of value and common care

Color in the Classroom Zoe Burkholder,2011-10-05

Between the turn of the twentieth century and the Brown v Board of Education decision in 1954 the way that American schools taught about race changed dramatically This transformation was engineered by the nation s most prominent anthropologists including Franz Boas Ruth Benedict and Margaret Mead during World War II Inspired by scientific racism in Nazi Germany these activist scholars decided that the best way to fight racial prejudice was to teach what they saw as the truth about race in the institution that had the power to do the most good American schools Anthropologists created lesson plans lectures courses and pamphlets designed to revise what they called the race concept in American education They believed that if teachers presented race in scientific and egalitarian terms conveying human diversity as learned habits of culture rather than innate characteristics American citizens would become less racist Although nearly forgotten today this educational reform movement represents an important component of early civil rights activism that emerged alongside the domestic and global tensions of wartime Drawing on hundreds of first hand accounts written by teachers nationwide Zo Burkholder traces the influence of this anthropological activism on the way that teachers understood spoke and taught about race She explains how and why teachers readily understood certain theoretical concepts such as the division of race into three main categories while they struggled to make sense of more complex models of cultural diversity and structural inequality As they translated theories into practice teachers crafted an educational discourse on race that differed significantly from the definition of race produced by scientists at mid century Schoolteachers and their approach to race were put into the spotlight with the Brown v Board of Education case but the belief that racially integrated schools would eradicate racism in the next generation and eliminate the need for discussion of racial inequality long predated this Discussions of race in the classroom were silenced during the early Cold War until a new generation of antiracist multicultural educators emerged in the 1970s

Enjoying the Melody of Expression: An Mental Symphony within **Journal With Quotations On Education**

In some sort of consumed by monitors and the ceaseless chatter of immediate interaction, the melodic elegance and psychological symphony created by the prepared term frequently disappear into the backdrop, eclipsed by the constant noise and disruptions that permeate our lives. Nevertheless, located within the pages of **Journal With Quotations On Education** an enchanting literary value overflowing with organic thoughts, lies an immersive symphony waiting to be embraced. Constructed by a wonderful musician of language, this interesting masterpiece conducts visitors on an emotional trip, skillfully unraveling the hidden melodies and profound affect resonating within each cautiously crafted phrase. Within the depths with this touching assessment, we will discover the book is main harmonies, analyze its enthralling publishing model, and submit ourselves to the profound resonance that echoes in the depths of readers souls.
