Keeler Sr.,2013-01-22 The question of the meaning of life challenges each one of us even as our schools attempt to channel us in our teen years into a choice for a vocation Attempting to answer this question this book first explores science and philosophy then examines faith and the scriptures and finally searches for the real historical Jesus to develop an answer This book delves right into the major issues of the nature of the world the nature of God and a search for Jesus without adherence to the previously established theological principles of the Christian church A critical and analytical approach has been used in this work as it begins with some of the most basic questions about life and our existence on this planet starting with an examination of the physical world using both traditional physics and advanced theoretical physics concepts to explain the nature of the universe The first chapter includes a discussion of the nature of God and proposes some initial responses to the primary question posed about the reason for our existence In the second chapter a substantive definition of faith is proposed This chapter also recommends applying reason and critical analysis to an understanding of the scriptures The third chapter takes a rigorous intellectual view of the gospels to explain the nature of Jesus to identify his uniqueness and to finalize the answer to the question previously proposed No attempt has been made to write a textbook or to cover all of the theological topics in this field *Christian Mind in the Emerging World* Peter Tze Ming Ng,Wing Tai Leung,Vaughan King Tong Mak,2018-10-31 In response to challenges from the emerging world this book brings together

The Human World in the Physical Universe Nicholas Maxwell, 2001 How is it possible for the world as we experience it to exist embedded in the physical universe How can there be sensory qualities consciousness freedom science and art friendship love justice all that which gives meaning and value to life if the world really is more or less as modern science tells us it is This is the problem that is tackled by this book The solution proposed is that physics describes only a selected aspect of all that exists that aspect which determines the way events unfold Sensory qualities inner experiences consciousness meaning and value all these exist but lie beyond the scope of physics and of that part of science that can be reduced to physics Furthermore these human features of the world are to be explained and understood not scientifically but personalistically a kind of understanding distinct from and not reducible to science This view that the world is riddled with what may be called double comprehensibility leads to a proposed solution to the philosophical mind body problem and to the problem of free will it leads to a reinterpretation of Darwin's theory of evolution and to an account of the evolution of consciousness and free will After a discussion of the location of consciousness in the brain the book concludes with a proposal as to how academic inquiry might be changed so that it becomes a kind of inquiry rationally designed to help humanity create a more civilized human world in the physical universe
