Theory and Practice of Adult and Higher Education Victor C.X. Wang,2016-10-01 A volume on Theory and Practice of Adult and Higher Education or Foundations of Adult and Higher Education will appeal to both our graduate students and faculty as so many of them have been taking courses in both program areas and have been concerned with their defined areas of expertise Although theories and practices in Adult Education and in Higher Education are being used interchangeably there is a lack of scholarly work that connects existing theories and practices across the two fields The

proposed ground breaking volume will cover topics theories practices in both fields of Adult Education and of Higher Education and in doing so will bring to the fore the connections that make these two fields truly inseparable The proposed volume will therefore generate new knowledge to share among faculty graduate students and other researchers who practice not only in Adult Education but also in Higher Education

Quality of Higher Education Yihuan

Zou,2022-09-01 Quality in higher education was not invented in recent decades universities have always possessed mechanisms for assuring the quality of their work The rising concern over quality is closely related to the changes in higher education and its social context Among others the most conspicuous changes are the massive expansion diversification and increased cost in higher education and new mechanisms of accountability initiated by the state With these changes the traditional internally enacted academic quality keeping has been given an important external dimension quality assurance which requires higher education institutions to continuously demonstrate and improve performance and which also provides new systems of rewards and sanctions However the complex impacts of quality assurance policies have shown a need to further understand the quality issue in higher education This book is about constructing a more inclusive understanding of quality in higher education through combining the macro meso and micro levels i e from the perspectives of national policy higher education institutions as organizations in society individual teaching staff and students It covers both theoretical constructions for understanding quality and empirical investigation in the Chinese context The questions addressed are How is quality of higher education perceived by the institution teaching staff and students respectively What are the main concerns for the institution teaching staff and students in their own pursuit of quality It has been concluded that quality of higher education is not only about educational quality but also about expanding life chances for the students prosperity in the administrative system for the teaching staff and organizational prosperity for the institution With regard to quality assurance and accountability in higher education special attention should be given to the values pursued and be careful to balance between immediate single value efficiency and sustainable development and a wider range of values that higher education serves

The SAGE Encyclopedia of Online Education Steven L. Danver,2016-09-20 Online education both by for profit institutions and within traditional universities has seen recent tremendous growth and appeal but online education has many aspects that are not well understood The SAGE Encyclopedia of Online Education provides a thorough and engaging reference on all aspects of this field from the theoretical dimensions of teaching online to the technological aspects of implementing online courses with a central focus on the effective education of students Key topics explored through over 350 entries include Technology used in the online classroom Institutions that have contributed to the growth of online education Pedagogical basis and strategies of online education Effectiveness and assessment Different types of online

education and best practices The changing role of online education in the global education system **Handbook of Research on Technology Tools for Real-World Skill Development** Rosen, Yigal, Ferrara, Steve, Mosharrafa, Maryam, 2015-10-19 Education is expanding to include a stronger focus on the practical application of classroom lessons in an effort to prepare the next generation of scholars for a changing world economy centered on collaborative and problem solving skills for the digital age The Handbook of Research on Technology Tools for Real World Skill Development presents comprehensive research and discussions on the importance of practical education focused on digital literacy and the problem solving skills necessary in everyday life Featuring timely research based chapters exploring the broad scope of digital and computer based learning strategies including but not limited to enhanced classroom experiences assessment programs and problem solving training this publication is an essential reference source for academicians researchers professionals and policymakers interested in the practical application of technology based learning for next generation education **Online Nursing Education: A Collaborative Approach** Melissa Robinson, Henny Breen, 2020-11-09 The increase of online nursing education programs has furthered the need for nursing faculty to have specific preparation for online teaching Drawing from the authors extensive experience teaching online nursing education programs Online Nursing Education A Collaborative Approach is unlike any other text It was written and designed for faculty teaching online post licensure students in a nursing education degree program post master s certificate program advanced practice program or other advanced education related degree program This unique text takes a theoretical approach and includes practical examples as well as sample curriculum course design and policies Topics covered include strategies for teaching online learning through writing in an online classroom experiential learning in online programs generational differences in online learning and more practical discussions backed by evaluation studies and qualitative research **Faith-Based Education That Constructs** HeeKap Lee, 2010-08-09 Constructivism is everywhere It is a hot issue at this time in the field of philosophy education technology and religion However can constructivism be an alternative approach in faith based education While some conclude that Jesus knew learning was an active knowledge creating process and that he always encouraged his disciples to think deeply and go beyond the surface level others would find that constructivism undercuts faith based education because of its claims to relativity For example constructivists claim that meaning is imposed on the world by us rather than existing in the world independently from us Thus they proclaim that truth is relative to particular times places and people Christians hold that truth does exist absolutely So how can there be a way forward for faith based educators who see the good in the constructivist approach In Faith Based Education that Constructs readers will find a unique approach whereby constructivism may appropriately be applied to a faith based education setting Although disagreement can occur between constructivism and faith based education this book concludes that constructivist thought and Christian faith based education are in the end congruent and harmonious in significant ways Those faith based educators who continue to hold cautionary

views of radical constructivist assertions against absolute truths need not disregard all other aspects of constructivism
