Alessandro Agnetis, Jean-Charles Billaut, Stanisław Gawiejnowicz, Dario Pacciarelli, Ameer Soukhal, 2014-01-31 Scheduling theory has received a growing interest since its origins in the second half of the 20th century Developed initially for the study of scheduling problems with a single objective the theory has been recently extended to problems involving multiple criteria However this extension has still left a gap between the classical multi criteria approaches and some real life problems in which not all jobs contribute to the evaluation of each criterion In this book we close this gap by presenting and developing multi agent scheduling models in which subsets of jobs sharing the same resources are evaluated by different criteria Several scenarios are introduced depending on the definition and the intersection structure of the job subsets Complexity results approximation schemes heuristics and exact algorithms are discussed for single machine and parallel machine scheduling environments Definitions and algorithms are illustrated with the help of examples and figures **Metaheuristics for Production Systems**

Who's Gonna Water My Tomatoes? Michael A. Szolowicz, 2024-09-25 Who's Gonna Water My Tomatoes School Gardens Kitchens and the Search for Educational Authenticity updates an old concept for our modern age utilizing school gardens and culinary kitchens where students grow prepare and eat their own food Over a century ago the educational philosopher John Dewey proposed reforming education around the needs of the whole child emphasizing academic learning and the child's social needs for effective participation in a democratic society In Dewey's view children would best learn by engaging in authentic experiences that would introduce complement and complete their regular classroom experiences Dewey talked about school gardens and kitchens as two specific laboratories where children could apply what they were learning in school in daily life Today the tensions between experiential learning and the more rote learning often found in regular classrooms remain Educators increasingly find themselves accountable to the narrow performance pressures imposed by standardized testing pressures that often squeeze out the joys and possibilities for more authentic and engaging learning found in real world experiences This book explores Dewey's philosophy with particular attention given to experiential learning's relationship to gardens and kitchens The school garden and kitchen movement itself has ebbed and flowed over the last hundred years in response to changing societal and educational pressures This history leads to the present day where the edible schoolyard movement is experiencing a new spring as educators parents and school communities find value in edible schoolyard's possibilities for providing more wholistic education that better meets the academic social and emotional needs of students The book focuses on a network of edible schoolyards by introducing educators teachers principals and staff who are making edible schoolyards happen today Their vision and motivations form in their favorite lessons and in the connections between garden and kitchen experiences to the more traditional subject matter favored on state tests Suggestions and resources for starting new edible schoolyards including suggested recipes are provided for those who want to get growing with their own edible schoolyards Perfect for courses such as Educational Reform Educational History Educational Philosophy Educational Leadership Curriculum Development and Transformation Experiential Learning Project Based Learning and Educational Policy Environments [The Routledge Handbook of Chinese Second Language Acquisition](#) Chuanren Ke, 2018-03-29 The Routledge Handbook of Chinese Second Language Acquisition is the first reference work of its kind The handbook contains twenty contributions from leading experts in the field of Chinese SLA covering a wide range of topics such as social contexts linguistic perspectives skill learning individual differences and learning settings and testing Each chapter covers historical perspectives core issues and key findings research approaches pedagogical implications future research direction and additional references The Routledge Handbook of Chinese Second Language Acquisition is an essential reference for Chinese language teachers and researchers in Chinese applied linguistics and second language acquisition **Clearing Services Global Markets** Tina P.
